Leadership for good starts here
We recognise and pay respect to the Elders and communities – past, present, and emerging – of the lands that the University of Sydney's campuses stand on. For thousands of years they have shared and exchanged knowledges across innumerable generations for the benefit of all.
Why choose Sydney?

Start your leadership journey and create a future with impact.

Whether you’re finishing high school, continuing your undergraduate studies, pursuing your passion or looking to advance your career, our flexible degree course structures enable you to create and follow your own path.
1st in Australia for graduate employability*

4th in the world for graduate employability*

41st overall in world university rankings**

100+ majors and minors to pursue your interests across disciplines

250+ international exchange partners and one of the largest student mobility programs in Australia***

260+ clubs and societies to enrich your student experience

420K+ alumni forming an influential worldwide network

* QS Graduate Employability Rankings 2022
** QS World University Rankings 2023
*** Australian Universities International Directors’ Forum Learning Abroad Benchmarking 2021 (in 2022)
University life

University is about so much more than just what happens in the classroom – so make the most of it!

Expand your university experience with our 260+ student clubs and societies, 30 cafes, bars and food outlets, live performance spaces, museums and art galleries, 24-hour libraries, Olympic-size swimming pool, fully equipped gym and sports facilities, climbing wall and heritage-listed graffiti tunnel – to name just a few of the things that make up life at Sydney!

Our diverse community of students is made up of more than 32 cultural groups and 130 nationalities, so you’ll be able to make friends from all around the world. And our co-curricular activities offer a diverse, supportive and vibrant student experience for you to gain new skills, develop your hobbies – and have fun!

“Being a member of ViSUS (the Vietnamese International Student at the University of Sydney community) was one of the most precious experiences of my first year at the University of Sydney. I was able to make more friends, expand my network and also help more people during my study at the University.”

Minh Anh Vuong
Bachelor of Commerce (Marketing and Visual Arts)
Home country: Vietnam
TRAVEL THE WORLD
WHILE YOU STUDY

See the world and graduate with a global perspective. We have one of the largest student mobility programs in Australia.* We’ve partnered with over 250 universities in more than 40 countries to give you access to global opportunities that will broaden your horizons. 130 of our partner universities are ranked in the top 200 worldwide,** including past programs at Harvard, Sciences Po, and the London School of Economics.

There are so many ways you can add an international experience to your degree, including short-term, semester-long and year-long options; overseas field schools and in-country intensives; short-term summer programs; overseas professional work placements; and even virtual experiences.

When you join us at the University of Sydney, you’ll have plenty of help in all areas of student life. Here are just a few of the ways we support your health, wellbeing and academic achievement.*

**Welcome and arrival**
- Orientation to university
- Settling into Sydney
- Adjusting to student life
- Opportunities to meet fellow students and staff
- Information about available support services

**Disability and accessibility services**
- Accessible buildings and facilities
- Assistive technologies
- Alternative formatting
- Lecture support
- Academic adjustments

**Accommodation**
- Residential colleges
- On-campus student housing
- Off-campus living

**Language and learning**
- Intensive preparation programs
- English language programs
- Online learning resources
- One-to-one coaching

**Academic learning support**
- Bridging courses
- Academic language workshops
- Mathematics learning support
- Online learning resources
- One-to-one consultations
- Peer programs

**Career support**
- International student career development program
- Support with transition to the Australian workplace
- Employability skills workshops
- Careers fairs and events where you can meet employers
- Sydney CareerHub online jobs database

**Financial wellbeing**
- Scholarships, bursaries and interest-free loans
- Help with essential living costs and study-related expenses

**Health and physical wellbeing**
- Doctors
- Dentists
- Optometrists
- Physiotherapists
- Pharmacists
- Childcare Information

**Mental health**
- Clinical psychologists and counsellors
- Mental health support services
- Workshops for success
- Resilience training

**Faith**
- Multifaith chaplaincy
- Chaplains from 12 faith groups available for consultations
- Dedicated prayer rooms

* More information about our student support services is available at:
  - sydney.edu.au/learning-support
* Some of these services involve fees or other costs.
Funding your studies

Whether you’re an undergraduate, postgraduate or research student, we offer a range of scholarships to support you.

**Vice-Chancellor’s International Scholarship**
This is a prestigious scholarship awarded on academic merit to exceptional international students to pursue coursework studies. Value: Up to $40,000.

**Faculty scholarships**
We also offer faculty-specific scholarships for international students, depending on your Faculty or University School.

**Research Training Program International Scholarship**
Many high-achieving students apply for a research degree and a scholarship at the same time. The Research Training Program International Scholarship, funded by the Australian Government, covers tuition fees, Overseas Student Health Cover, relocation costs and a living allowance.

Browse the full list of scholarships:
- sydney.edu.au/scholarships/international

**Other funding options**
As an international student, you may be eligible for student loans or benefits from your home government, some of which the University of Sydney is accredited to administer.
- sydney.edu.au/study/int-loans

**Department of Foreign Affairs and Trade (DFAT) Australia Awards**
This Australian Government scholarship attracts scholars of the highest calibre from countries that have a development partnership with Australia. It covers full tuition fees and provides a living allowance.

Did you know?
The University of Sydney is only 5km from the:
– Sydney CBD
– Harbour Bridge
– Opera House
Student accommodation

Experience campus life at your doorstep

Whether you choose to live on or off campus, you’ll have a wide range of accommodation options to choose from.

Living on campus
- Residential colleges offer fully furnished single rooms with daily meals provided.
- University residences offer fully furnished single rooms with shared living, learning and study spaces.

Living off campus
The University’s campuses are surrounded by vibrant and multicultural suburbs. You can choose to live in independently run student housing or in private rental accommodation.

New to Sydney?
We recommend you book a temporary place to stay before committing to longer-term accommodation.
Wherever you choose to live when you arrive and throughout your studies with us, our Accommodation Services website is a great place to get started. It’s full of helpful advice on all your accommodation options and expected costs. It also allows you to register for a place at University-owned housing.
- sydney.edu.au/accommodation

For further information on the approximate costs involved in living in Sydney, including transport, groceries and other everyday expenses as well as accommodation costs, visit:
- sydney.edu.au/study/accommodation/living-costs.html

“I live on campus as a Resident Assistant at the Queen Mary Building. I find it very helpful in making new friends, learning from different cultures, and challenging myself to step out of my comfort zone. I participate in so many events like sports, arts, cooking sessions and hiking.”

Zihan Wang
Master of Commerce (Extension)
Home country: China
Residential college ($397–687 per week)

Residential colleges are located on campus and externally managed to provide options to suit your needs.

**Preparation programs**

These university preparation programs – also known as enabling courses – offer alternative pathways to university admission while providing strong academic foundations that enable you to thrive in your university studies.

Delivered on behalf of the University of Sydney by Navitas (trading as Taylors College, CRICOS Provider Code: 01682E), these programs are ideal for international students who do not have the existing qualifications or grades to gain direct admission to a degree course at the University of Sydney.

They have been designed by the University to include subjects that prepare you for your university studies, as well as other subjects of wider interest to you.

If you successfully complete your preparation program and meet all other admission requirements of your chosen course, you will be offered a place at the University. Some courses have limited numbers of places available, so admission may also be dependent on availability of places.

**A quality teaching and learning experience**

The University oversees the delivery of these programs, as well as the student experience, progression and outcomes – so you’re assured of the highest-quality teaching and learning experience and the best preparation for your university studies.

**Academic and personal support**

Taylors College staff will assist you with settling in to life in Australia, while also supporting you to achieve your academic goals. The Academic Support team will help you with any academic issues, while their Student Support and Experience Team will help you with any personal issues relating to your health and wellbeing.

**The University of Sydney Foundation Program (USFP)**

This program is available in Extended, Standard and Intensive formats. This means you can complete the program in as little as 40 weeks or up to 75 weeks, depending on your abilities and preference.

Intakes are as follows:
- 75-week Extended Program (CRICOS Course Code: 048302A) commences in January and July
- 52-week Standard Program (CRICOS Course Code: 022310D) commences in January and July
- 40-week Intensive Program (CRICOS Course Code: 036126M) commences in April and October.

For more information, visit

**High Achievers Preparation Program (HAPP)**

This accelerated program is designed for high-achieving students who have excellent academic results and English skills, but just missed out on direct entry to the University. This program will fast-track you into the first year of a bachelor’s degree at the University within 3.5 months, with dedicated mentoring to familiarise you with the University and keep you on track for success.

This program is available only for certain international qualifications.

Intake for this course is as follows:
- 14-week program (CRICOS Course Code: 089556F) commences in September.

For more information, visit

**How to apply**

“I believe diversity is something that’s celebrated at the University of Sydney. Every student is encouraged to achieve their potential.”

Sarea Bhar  
Bachelor of Science (Psychology)  
Bachelor of Advanced Studies (Marketing)  
Home country: Australia
University study isn’t just about gaining credentials – it’s about investing your time to discover what you really love doing.

Start by thinking about which subjects interest you, as well as how you like to learn and what you want from your university experience.
Want to design the future? When you study at Sydney you’ll combine your creative flair with finely tuned technical skills to shape the spaces, services and experiences – both physical and digital – in which we live, work and play.

**Combining creativity and technology**
Develop the big-picture thinking needed to address global challenges, and graduate ready for a career that’s creatively driven and technically challenging.

“We studying at the University of Sydney has put me in touch with global architectural practice and equipped me with a plethora of new problem-solving skills. I am grateful to the team of researchers and educators that go out of their way to support and uplift their students.”

**Luis Philippsen**
Master of Architecture (2022)
Home country: Germany
A degree in the Arts and Social Sciences will hone your analytical skills and help you to become an independent thinker who is able to form and articulate judgements based on argument and evidence. Acquire the skills that will set you up for careers you can imagine now – and those that don’t exist yet.

Transformative careers in every industry

In a world as disrupted as ours, Arts graduates’ capacity for leadership, creativity and analysis has never been more relevant or sought after by employers. Invest in a future where you will be sustained by your passion for your work, and where your skills will be valued contributions to the world.

Economics

Economics is a fascinating and diverse discipline. This important field addresses a range of issues that we face in modern life, playing a central role in shaping our society at every level.

Solve complex, global challenges
Economics is crucial to understanding and solving the major problems and unique challenges the world faces today. Our economics courses equip you with the skills, knowledge, flexibility and industry expertise to address these issues, make real-world differences and succeed in your career – wherever it takes you. You’ll graduate with a globally relevant and highly sought-after qualification.

“Studying the mathematical side of Economics has allowed me to develop strong analytical and integral critical-thinking skills, while also aiding me in making decisions that focus on optimising the outcome, thus acting as stepping stones for my career.”

Dhyana Nikunj Shah
Bachelor of Economics
Home country: India

Join an outstanding and diverse graduate community, contributing in valuable ways across the globe.

We offer Australia’s most popular economics program.*

You’ll study and engage with your peers in our new, architecturally designed Social Sciences Hub.

*Higher Education Student Collection 2019, Department of Education, Skills and Employment
Do what you love and make a world of difference through teaching or social work. At Sydney you’ll be challenged to explore complex ideas and issues in your chosen field, and you’ll graduate as an informed and effective practitioner.

Help shape the lives of the next generation

With strong connections in both the education and social work sectors our placement program encourages meaningful practical experiences. Throughout your course you’ll apply your theoretical knowledge in real-world settings and develop the professional skills to graduate with confidence.

We’re ranked 26th in the world for education.*

Our teacher education degrees are accredited by the NSW Education Standards Authority (NESA).

Our social work degrees are accredited by the Australian Association of Social Workers (AASW).

“The knowledge I’ve obtained at The University of Sydney was very beneficial in helping me solve the current issues of English language teaching and learning. I have become a more critical thinker in order to be ready to face the challenges ahead.”

Anggi Saputra Simorangkir
Master of Education (TESOL)
Home country: Indonesia

* QS World University Rankings by Subject 2023
Our fantastic new multimillion-dollar engineering and technology precinct includes unique student learning spaces.

We’re creating a digital, sustainable, healthier future by educating tomorrow’s leaders and pioneering technological research. If you’re passionate about developing innovative and sustainable solutions to some of the world’s greatest challenges, then a degree in engineering, project management or computer science at Sydney is right for you.

Solve tomorrow’s problems today

Our digitally focused curriculum prepares you for the jobs of the future. From space engineering and the built environment to cybersecurity and nanotechnology, our broad range of specialisations, majors and cross-disciplinary units, as well as our award-winning Professional Engagement Program ensures that you’re able to pursue your passions while standing out in the job market.

“I am really lucky that I got the chance to learn about data science. As Semester One commenced, I taught myself how to code in R, a space where I could enhance my creativity and problem-solving skills.”

Josephine Antonio
Bachelor of Advanced Computing
Home country: Indonesia

2nd

We’re ranked second in Australia and 29th globally for computer science and engineering.*

$200M

We’ve invested more than $200m into our facilities, including new study spaces and cutting-edge research labs.

1200+

You’ll gain professional experience through our award-winning programs and network of 1200+ industry partners.

* Academic Ranking of World Universities (ARWU) 2022
With more than 165 years of research-led education, we are proud to be recognised as one of the world’s leading law schools. Together with one of our five partner degrees, your Sydney law degree will equip you with highly sought-after skills to become a leader in your chosen career and create change in a global environment.

Learn from the best legal minds

16th
We’re ranked 16th in the world for law.*

You’ll apply classroom-learned knowledge to real-world cases with social justice and law reform activities.

Our strategic international partnerships provide you with global opportunities to study with world-leading universities abroad.

“My combined degree will provide me with knowledge regarding both the legal and business disciplines, enabling me to better prepare for my dream job as a corporate lawyer. The diverse modules especially from [the Open Learning Environment] will develop my soft skills such as public speaking and critical thinking.”

Yee Ler Chua
Bachelor of Laws and Bachelor of Commerce
Home country: Malaysia
There has never been a better time to study medicine and health. With healthcare professionals in high demand across the world we are empowering future leaders in the field. Choose from the largest range of health degrees of any Australian university, and graduate ready to enter the health workforce.

Our degrees will kickstart your career in health
Health care is one of the fastest-growing industries around the world. At Sydney you’ll learn from academic experts and students in a range of health disciplines to develop a range full suite of invaluable skills from patient interaction to teamwork, leadership and research.

“I wanted to take a break from clinical medicine and the Master of International Public Health was a good fit as it had a broad scope and helped me explore different facets of public health and research. The highlight of my degree was the research exposure which I got working with distinguished professors which helped me line up a PhD in sports and exercise science. This helped me set up my career trajectory.”

Dr Najeeb Soomro
Chief Medical Officer, Pakistan Cricket Board
Master of International Public Health (2021)
Home country: Pakistan

We’re ranked in the top 25 worldwide for medicine, nursing, anatomy and physiology, pharmacy and sports-related subjects.*

You’ll learn in our new state-of-the-art Susan Wakil Health Building.

Gain hands-on experience through our network of clinical placements across eight major health districts.

* QS World University Rankings by Subject 2023
The Sydney Conservatorium of Music has been at the forefront of Sydney’s musical and cultural life for more than 100 years. Our diverse range of programs is designed to allow you to develop your unique musical voice, and includes classical performance, jazz, music composition for creative industries or the concert hall, digital music and media, contemporary music, Indigenous music, Asian music, music theatre, musicology and music education.

**Make the music you want to hear**

The Conservatorium offers some of the best facilities for studying music in the Asia-Pacific region. You’ll have plenty of opportunities to perform or to have your work performed or recorded. As part of your studies you’ll also have extensive opportunities to rehearse and perform with some of our ensembles led by industry experts, including our Symphony Orchestra, Wind Symphony, Choir, Jazz Big Band, Modern Music Ensemble and Early Music Ensemble.

“Studying at the Sydney Conservatorium of Music has exposed me to innumerable opportunities that have satisfied my craving for limitless self-expression that catalyses my introspective journey of self-discovery. It has been a wonderful experience for me.”

Noriko Wijaya
Bachelor of Music (Performance)
Home country: Indonesia

Complement your music degree with a specialisation of your choice from the University’s shared pool of majors and minors.*

Apply for a wide range of merit and equity scholarships worth $1.5 million annually.

Learn directly from acclaimed musicians, award-winning scholars and music industry leaders.

* Only available in the Bachelor of Music and in the Bachelor of Music degrees combined with the Bachelor of Advanced Studies
Studying science opens up a whole world of opportunities. Whether you dream of joining the forefront of scientific research, learning to analyse and think critically, or making the planet a better place, studying science will give you highly sought-after skills for a huge range of careers.

Learn from world-leading scientists
You’ll be taught by dedicated scientific experts, including members of the Australian Academy of Science, Australian Research Council Fellows and other prestigious prize winners. Study in world-class facilities, including our multimillion-dollar Life, Earth and Environmental Sciences (LEES) Building, the Sydney Nanoscience Hub and the world-renowned Charles Perkins Centre.

“I’ve been given the opportunity to deliver workshops for international students to guide and make their transition to uni easier, including teaching high school students about psychology and neuroscience. This built my confidence as a researcher-and-psychologist-to-be.”

Gal Matana
Bachelor of Science Advanced (Psychology and Neuroscience)
Home country: Israel

You’re ranked second in Australia and and 25th in the world for life sciences and medicine.*

You’ll learn from experts at the University of Sydney Nano Institute, the Charles Perkins Centre and Taronga Conservation Society Australia.

You can choose from our range of flexible science degrees or professionally accredited courses, including in psychology and veterinary medicine.

* QS World University Rankings by Subject 2023
“I chose the University of Sydney as I wanted to study alongside like-minded individuals on a beautiful campus. The university has a great reputation for Commerce and Law.”

Monica Cho
Bachelor of Commerce and Bachelor of Laws
Home country: Australia
Undergraduate courses 2024
The Sydney undergraduate experience

Apply your passions inside and outside the classroom as you:
- **work with industry and community leaders** through internships and work placements to get you job-ready, no matter what you study
- **follow all your interests** through our shared pool of majors and minors and gain expertise in a second field that sits outside your primary degree
- **develop a global mindset** by taking advantage of international experiences and one of the largest study abroad and international exchange programs in Australia
- **extend your skills and gain an edge** by combining your primary degree with our Bachelor of Advanced Studies, which lets you access advanced coursework and projects, develop specialist skills, and tailor your degree to your passions
- **build your academic and leadership capabilities** with our innovative Dalyell Scholars stream for high-achieving students
- **support your career aspirations** with our unique Open Learning Environment (OLE), which gives you access to a diverse range of online learning modules and workshops to master new skills or home in on your special interests.

Whatever path you choose, your experience with us will be truly unique. You’ll gain the technical knowledge and expertise, along with the practical skills and real-world experiences that employers are looking for – and that the world needs.
Building your degree

As long as you fulfil the requirements of your chosen degree, there are many ways in which you can shape your study and uni experience.

Your degree will require you to complete a sequence of related units of study, working towards your chosen area of expertise. This sequence might be called a stream, a program or a specialisation, depending on how much study it requires and/or the accepted terminology within your field. But the most common terms you’ll hear are major and minor. A major is usually made up of eight units of study, and a minor is made up of six.

Some degrees have set components that you must complete. For example, the Bachelor of Psychology requires you to complete the Psychology Program. Other degrees are more flexible, allowing you to select from a wide range of relevant majors and minors. Examples of this kind of degree are the Bachelor of Arts, the Bachelor of Science and the Bachelor of Commerce.

Make your degree unique
If your degree allows you access to our shared pool of majors and minors (see page 33), you could choose to study a couple of units or even an entire major or minor in a field that would usually sit outside your degree. For example, you could enjoy learning Korean while studying science.

Study overseas
Through our global mobility program, you can choose to spend a few weeks, a semester or even a full year studying at an overseas university as part of your degree.

Gain a competitive edge
Undertake a research project with an honours year, a common pathway to a PhD.

− sydney.edu.au/honours

Access our Open Learning Environment
Some degrees allow you to complete units from our Open Learning Environment (OLE), where you can extend your skills and knowledge by exploring other fields of study. These short online tutorials and masterclasses boost your personal and professional development – and some even include overseas experiences.

Get a head start on real-world experience
Don’t forget that in addition to your regular study, you can also build in internships and work placements, allowing you to start gaining real-world experience while you study.

Sample degree structure
Here’s an example of what uni could look like for you. Once you’re here, we provide lots of support and course planning tools to help you access the full range of opportunities across your area(s) of study.

OLE = Open Learning Environment
(minimum requirement is 6 credit points).

“It’s been fantastic to study at the University. I’ve met people from around the world, stepped outside of my comfort zone and had many hands-on experiences with lab work and demonstrations, which have improved my confidence in my work!”

Nicolas Cheah Zang Yu
Bachelor of Science and Bachelor of Advanced Studies (Medical Science)
Home country: Malaysia
Follow your interests. *All of them.*

With more than 100 options to choose from, our shared pool of majors and minors allows you to explore a wide range of study areas.

If your course allows access to our shared pool of majors and minors, you could study a couple of units or even an entire major or minor in a field that would usually sit outside your degree.

For example, you could complement a major in marketing with the study of design. You can pursue all your interests, acquire expertise in a second field of study and build interdisciplinary knowledge and skills, preparing you for your future career.

“I fell in love with the range of majors available at the University of Sydney. Moreover, students also get the opportunity to pick a second major or a minor from the shared pool, allowing me to expand my interest in subjects outside of my chosen faculty.”

Audi Chuadri  
Bachelor of Commerce  
(Business Information Systems and Finance)  
Home country: Indonesia

# Undergraduate courses

## Architecture, design and planning

### B Architecture and Environments

- **ATAR:** 80  
- **IB:** 29  
- **Entry:** Feb  
- **Duration (full time):** 3 years  
- **Assumed knowledge:** English Advanced and Mathematics Advanced or higher

**Programs, majors and minors**  
Core areas of study include architectural and environmental design, architectural history and theory, architectural sciences and technologies, property and sustainability, urban design and planning. The University of Sydney School of Architecture, Design and Planning electives may include acoustics, lighting, structures and interaction design.

**Career possibilities**  
Architect (with additional study), roles in property, real estate and construction, project manager, urban designer, urban planner

### B Design (Interaction Design)

- **ATAR:** 75  
- **IB:** 26  
- **Entry:** Feb/Jul  
- **Duration (full time):** 3 years (single)/4 years (combined)  
- **Dalyell by invitation**  
- **Assumed knowledge:** Mathematics Advanced or higher

**Programs, majors and minors**  
Core areas of study include app design, creative technology, design thinking, graphic design, information architecture, physical computing, sound design, user experience (UX) and user-centred design. The four design studios focus on user experience design, interaction design, information visualisation, and interactive product design. Related units may be taken from Arts and Social Sciences, Business, Engineering, Computer Science, Music and Visual Arts. In the combined Design (Interaction Design)/B Advanced Studies, you will also take a major from the shared pool.

**Career possibilities**  
Interaction designer, UX designer, creative director, business developer, marketing consultant, communications adviser, project manager, design manager, web and multimedia designer, multimedia strategist, creative technologist

### B Design in Architecture

- **ATAR:** 90  
- **IB:** 54  
- **Entry:** Feb  
- **Duration (full time):** 3 years  
- **Assumed knowledge:** English Advanced and Mathematics Advanced or higher

**Programs, majors and minors**  
Core areas of study include architectural design, architectural history and theory, architectural technologies, architecture workshops, environment and sustainability, professional practice and architectural communications. You can take electives from the University of Sydney School of Architecture, Design and Planning, as well as from other faculties and schools.

**Career possibilities**  
Architect (with additional study), architectural technologist, interior and spatial designer, urban designer, project manager, property developer

**Combine this degree with**  
B Engineering Honours (Civil)

### B Design in Architecture (Honours)/M Architecture

- **ATAR:** 92  
- **IB:** 55  
- **Entry:** Feb  
- **Duration (full time):** 5 years  
- **Assumed knowledge:** English Advanced and Mathematics Advanced or higher

**Programs, majors and minors**  
Core areas of study include architectural design, history and theory, technologies, architecture workshops, environment and sustainability, professional practice and architectural communications. You can take electives from the University of Sydney School of Architecture, Design and Planning, as well as from other faculties and schools.

**Career possibilities**  
Architect, design manager, academic

For assumed knowledge, mathematics prerequisites and other important information, see table notes on page 66.
**Arts and social sciences**

**B Arts**

- ATAR: 75
- IB: 26
- Entry: Feb/Jul
- Duration (full time): 4 years (combined)
- Dalyell by invitation
- Assumed knowledge: Depends on majors or units of study chosen

**Programs, majors and minors**

In the B Arts, you will choose one major from the options below and a minor or second major from these options or from the shared pool. You'll also have access to the Open Learning Environment.

- Chinese Studies
- Criminology
- Cultural and Cultures
- Archaeology
- Art History
- Asian Ancient History
- Anthropology
- Arabic Language

**Career possibilities**

Anthropologist, archaeologist, artist, historian, business administrator or manager, historian, heritage specialist, foreign affairs and trade officer, government policy officer, information specialist, journalist, museum or gallery curator, language specialist, media and communications officer, editor or publisher, researcher, sociologist. This degree equips you with the breadth and depth of knowledge and the critical and analytical skills to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future.

**Combine B Arts with**

B Engineering Honours, B Laws, B Social Work, D Medicine, M Nursing

**B Arts/B Advanced Studies**

- ATAR: 98
- IB: 41
- Entry: Feb/Jul
- Duration (full time): 4 years
- Dalyell by application
- Assumed knowledge: Depends on majors or units of study chosen

**Programs, majors and minors**

Refer to B Arts/B Advanced Studies for degree requirements. As a Dalyell Scholar, you will undertake 12 credit points of distinctive Dalyell units complemented by a suite of additional enrichment opportunities including mentoring, professional skill development, co-curricular activities, and the option of a global mobility experience. You’ll also complete units from the Open Learning Environment.

**Career possibilities**

Anthropologist, archaeologist, business administrator or manager, economist, editor or publisher, foreign affairs and trade officer, government policy officer, historian, language specialist, journalist, museum or gallery curator, public relations manager. This degree equips you with the breadth and depth of knowledge and the critical and analytical skills to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future.

**B Arts/B Advanced Studies (Dalyell Scholars)**

- ATAR: 85
- IB: 31
- Entry: Feb/Jul
- Duration (full time): 4 years
- Dalyell by invitation
- Assumed knowledge: Depends on majors or units of study chosen

**Programs, majors and minors**

This stream requires completion of a program in international and global studies which includes a major in Global Studies, a minor in a language from the School of Languages and Cultures, and a minimum of 12 credit points of study abroad/exchange. A second major, which may be an extension of the language minor, must be taken from those available in the B Arts or from the shared pool. You’ll also have access to the Open Learning Environment. In the final year of the combined degree, you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**

Community development program manager, diplomat, foreign aid worker, foreign correspondent, human rights advocate, international business consultant, policy adviser, trade negotiator

**B Arts/B Advanced Studies (International and Global Studies)**

- ATAR: 85
- IB: 31
- Entry: Feb/Jul
- Duration (full time): 4 years
- Dalyell by invitation
- Assumed knowledge: Depends on majors or units of study chosen

**Programs, majors and minors**

This stream requires completion of a program in Languages. You will complete two language majors as well as translation-focused units, and have the opportunity to complete electives from the shared pool. You’ll also have access to the Open Learning Environment. You will have the opportunity to apply for exchange scholarships to undertake exchange semesters, as well as opportunity for short-term study programs with our international partners.

In the final year of the combined degree, you will complete advanced coursework units in languages, multilingual projects and translation in up to three languages.

**Career possibilities**

Language localisation specialist, public relations officer, public policy officer, foreign affairs and trade officer, researcher, translator. This degree equips you with global capability plus the breadth and depth of knowledge and the critical and analytical skills to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future with an international focus.

**Professional recognition**

The course is an Endorsed Qualification for the National Accreditation Authority for Translators and Interpreters (NAATI) at the Certified Translator level. Graduates who wish to become Certified Translators will need to take the certification test.
**Arts and social sciences**

### B Arts/B Advanced Studies (Media and Communications)

**ATAR:** 90  
**IB:** 34  
**Entry:** Feb  
**Duration (full time):** 4 years  
**Assumed knowledge:** Depends on majors or units of study chosen

**Programs, majors and minors**  
This stream requires completion of a program in Media and Communications, including a major in Media Studies. A second major must be taken from those available in the B Arts or from the shared pool. You’ll also have access to the Open Learning Environment. In the final year of the combined degree you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**  
Corporate communications officer, information officer, journalist (print, online, radio, television), market or media researcher, producer, public relations officer, public policy officer

### B Arts/B Advanced Studies (Politics and International Relations)

**ATAR:** 87  
**IB:** 32  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Dalyell by invitation**  
**Assumed knowledge:** Depends on majors or units of study chosen

**Programs, majors and minors**  
This stream requires completion of a program, including a major in Politics and International Relations. A second major must be taken from those available in the B Arts or from the shared pool. You’ll also have access to the Open Learning Environment. In the final year of the combined degree you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**  
Current affairs journalist, government and public service administrator, non-government or private sector administrator, policy researcher and consultant, political adviser, think-tank participant. This degree will equip you to pursue a wide range of careers where knowledge of the interactions between international and domestic politics is necessary.

### B Arts (Dual Degree, Sciences Po, France)

**ATAR:** 80 + other admission criteria  
**IB:** 29 + other admission criteria  
**Entry:** Aug (in France)  
**Duration (full time):** 2 + 2 years  
**Dalyell by invitation**  
**Assumed knowledge:** Depends on majors or units of study chosen  
**Additional admission criteria**  
Admission to the Sciences Po dual degrees is highly competitive and determined jointly by the University of Sydney and Sciences Po. Applicants to the Bachelor of Arts and Bachelor of Economics dual degrees with Sciences Po need to be recent school leavers – transfer applicants are not eligible to apply. In addition to meeting the academic requirements of an accepted secondary education (Year 12) qualification, you need to submit an online application directly to the University, including a personal statement, resume and school reports or transcripts from the past three years, as well as attend an online interview. For more information about admission criteria, tuition fees and the application process, visit the relevant course page: sydney.edu.au/courses

**Career possibilities**  
Anthropologist, archaeologist, business administrator or manager, economist, editor or publisher, foreign affairs and trade officer, government policy officer, historian, language specialist, journalist, museum or gallery curator, public relations manager, researcher, sociologist

**Programs, majors and minors**  
This dual degree enables you to work towards both a B Arts degree at Sciences Po in France for the first two years, and a B Arts degree at the University of Sydney for the remaining two years. As part of your B Arts at the University of Sydney, you’ll have access to the shared pool of majors and minors. Refer to the B Arts for University of Sydney-based majors. For information on studies in France, including units of study, refer to the Sciences Po website: www.sciencespo.fr/en

### B Visual Arts

**B Visual Arts/B Advanced Studies**

**ATAR:** 90 + portfolio  
**IB:** 24 + portfolio  
**Entry:** Feb  
**Duration (full time):** 3 years (single)/4 years (combined)

**Programs, majors and minors**  
You will study across many areas in contemporary art, including ceramics, glass, jewellery, painting, photography, print media, screen arts and sculpture. In the combined degree, you will also take a major from a range of majors offered across the University, and complete advanced coursework units, including a substantial research, community, industry or entrepreneurship project, or an honours project in the final year.

**Career possibilities**  
Artist, arts writer, craftsperson, curator, digital artist, art educator (with further tertiary qualifications), exhibition designer, filmmaker, illustrator, painter, product designer, sound artist, web and multimedia designer

**Additional admission criteria**  
You will also be assessed based on a portfolio of artwork. You are required to submit the portfolio by the relevant deadline. When submitting the portfolio online, you will need to include a short statement describing one of the more developed projects in your portfolio.
Business

**B Commerce**

**B Commerce/B Advanced Studies**

<tr>
<td>Assumed knowledge: Mathematics Advanced or higher</td>
</tr>
</tbody>
</table>

**Programs, majors and minors**
You will choose one major from the options below and a second major (mandatory for B Commerce/B Advanced Studies) or a minor either from the shared pool or from these options: Accounting; Banking (major only); Business Analytics; Business Information Systems; Business Law; Finance (major only); Industrial Relations and Human Resource Management; Innovation and Entrepreneurship; International Business; Management and Leadership; Marketing; Professional Accounting (program). In the final year of the combined degree you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**
Accountant, business analyst, entrepreneur, enterprise architect, financial dealer and broker, human resources specialist, international business consultant, investment banker, management consultant, marketing executive, policy adviser, project manager

**Combine B Commerce with**
- B Advanced Computing, B Engineering Honours, B Laws

**B Commerce/B Advanced Studies (Dalyell Scholars)**

</tr>
</tbody>
</table>

**Programs, majors and minors**
Refer to B Commerce/B Advanced Studies. As a Dalyell Scholar, you will undertake 12 credit points of distinctive Dalyell units complemented by a suite of additional enrichment opportunities, including mentoring, professional skill development, co-curricular activities, and the option of a global mobility experience.

**Career possibilities**
Accountant, business analyst, entrepreneur, enterprise architect, financial dealer and broker, human resources specialist, international business consultant, investment banker, management consultant, marketing executive, policy adviser, project manager

**Combine B Commerce with**
- B Advanced Computing, B Engineering Honours, B Laws

Economics

**B Economics**

**B Economics/B Advanced Studies**

**Programs, majors and minors**
You will complete a program in Economics which includes a major from the list below, and a second major (mandatory for B Economics/B Advanced Studies) or a minor from the shared pool or from the following: Economics; Econometrics; Financial Economics; Environmental, Agricultural and Resource Economics. You'll also complete units from the Open Learning Environment. In the final year of the combined degree you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**
Accountant, banker, business consultant, business information systems analyst, economic analyst, economist, financial manager, government or non-government organisation worker, human resource manager, industrial relations specialist, researcher, social policy adviser. This degree will equip you with the capabilities to develop economic and social policy and to work in fields such as business, banking, financial markets and consulting in both the private and public sectors.

**Combine B Economics with**
- B Laws

**B Economics (Dual Degree, Sciences Po, France)**

</tbody>
</table>

**Programs, majors and minors**
Refer to B Economics for University of Sydney-based majors. For further information on studies in France, including units of study, refer to the Sciences Po website: www.sciencespo.fr/en

**Career possibilities**
Accountant, banker, business consultant, business information systems analyst, economic analyst, economist, financial manager, human resource manager, industrial relations specialist, researcher, social policy adviser

**Additional admission criteria**
See B Arts (Dual Degree, Sciences Po, France) on page 38.

Admission to the Sciences Po dual degree is highly competitive and determined jointly by the University of Sydney and Sciences Po. For more information visit sydney.edu.au/courses
### Education and social work

#### B Education (Early Childhood)

<table>
<thead>
<tr>
<th>ATAR: 75</th>
<th>IB: 26</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb</td>
<td>Duration (full time): 4 years</td>
</tr>
</tbody>
</table>

**Programs, majors and minors**
You’ll study specialist units in early childhood education, development, and professional practice, complemented by generalist units in an Education Studies major, offered by the Faculty of Arts and Social Sciences.

**Career possibilities**
Teacher in a range of early learning centres and preschools (birth–5 years). Qualified early childhood teachers are in high demand and early childhood education is a high priority for both federal and state governments in Australia.

**Professional recognition**
Australian Children’s Education and Care Quality Authority (ACECQA)

#### B Education (Health and Physical Education)*

<table>
<thead>
<tr>
<th>ATAR: 80 + statement</th>
<th>IB: 29 + statement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb</td>
<td>Duration (full time): 4 years</td>
</tr>
</tbody>
</table>

**Prerequisites:** NSW Education Standards Authority (NESA) requirement of Band 5 in three HSC subjects, one of which must be English (Standard or Advanced or ESL/EALD), or equivalent.

**Programs, majors and minors**
You’ll take core units of study in education and professional studies along with discipline study in Health and Physical Education. You’ll also need to select a second teaching area from: Aboriginal studies, biology, chemistry, drama, English, history (ancient and modern), languages and mathematics. Professional experience placements (totalling 80 days) begin in the first year of the course and progressively increase until the final placement, when you will be competent to teach under minimal supervision.

**Career possibilities**
Teacher in secondary schools or careers in training and human resource settings, community health, coaching, recreation and sport

**Professional recognition**
NSW Education Standards Authority (NESA)

#### B Education (Primary)*

<table>
<thead>
<tr>
<th>ATAR: 85 + statement</th>
<th>IB: 31 + statement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb</td>
<td>Duration (full time): 4 years</td>
</tr>
</tbody>
</table>

**Prerequisites:** NSW Education Standards Authority (NESA) requirement of Band 5 in three HSC subjects, one of which must be English (Standard or Advanced or ESL/EALD), or equivalent; and Band 4 in Mathematics Standard (or equivalent) or higher.

**Assumed knowledge:**
For the Mathematics specialisation: Mathematics Standard or higher
For the Science specialisation: Any HSC Science subject (or equivalent)

**Programs, majors and minors**
Throughout this degree you’ll take generalist units of study in education and professional studies, along with an interdisciplinary unit offered by the Faculty of Arts and Social Sciences. The program provides an AITSL-recognised Primary Teaching Specialisation in English and the option for advanced students to complete a Primary Teaching Specialisation in Mathematics, Science and Technology, or Primary Languages. This degree covers all the key learning areas (primary subject areas), with special attention to the mandatory areas of Aboriginal education, Teaching English to Speakers of Other Languages (TESOL) and special education. Professional experience placements (totalling 80 days) begin in the second year of the course and progressively increase until the final placement, when you will be competent to teach under minimal supervision.

**Career possibilities**
Teacher in primary schools, curriculum consultant, educational administrator, educational researcher, government policy adviser

**Professional recognition**
NSW Education Standards Authority (NESA)

#### B Education (Secondary)

**B Education/B Advanced Studies (Secondary)**

<table>
<thead>
<tr>
<th>ATAR: 80 + statement</th>
<th>IB: 29 + statement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb</td>
<td>Duration (full time): 4 years (single) /5 years (combined)</td>
</tr>
</tbody>
</table>

**Programs, majors and minors**
In this new, revitalised degree, you’ll take core units of study in education, along with intensive study and professional experience in two teaching areas and units from the Open Learning Environment. Your two teaching areas can be selected from either Arts or Science, in areas including: Aboriginal Studies, Biology, Business Studies, Chemistry, Drama, Economics, English, Geography, History, Judaic Studies, Languages, Linguistics, Mathematics, Physics, and Teaching English to Speakers of Other Languages (TESOL). You will need to complete at least a minor in your first teaching area. Professional experience placements (totalling 80 days) begin in the third year of the course and progressively increase until the final placement, when you will be competent to teach under minimal supervision.

**Career possibilities**
Teacher in secondary schools in areas including Aboriginal studies, biology, chemistry, drama, English, history, languages, mathematics, physics, and TESOL; curriculum consultant, educational administrator, educational researcher, government policy adviser, human resource manager

**Professional recognition**
NSW Education Standards Authority (NESA)

---

*For assumed knowledge, mathematics prerequisites and other important information, see table notes on page 66.*
## Education and social work

### B Social Work

<table>
<thead>
<tr>
<th>ATAR: 75</th>
<th>IB: 26</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb</td>
<td>Duration (full time): 4 years</td>
</tr>
</tbody>
</table>

**Assumed knowledge:** Depends on majors or units of study chosen.  

**Programs, majors and minors**  
The Social Work program includes studies in mental health, social justice practice, work with children and families, social policy, human service systems, domestic violence, disability, disasters and climate change, impacts of poverty, First Nations studies and social research. You will learn to work alongside diverse groups and communities in Australia and overseas addressing critical social issues.  

**Career possibilities**  
Aged care worker, children and families support worker, community worker in programs for people with disabilities, migrant and refugee liaison officer, international development worker, social policy adviser  

**Professional recognition**  
Australian Association of Social Workers  

### B Arts/B Social Work

<table>
<thead>
<tr>
<th>ATAR: 75</th>
<th>IB: 26</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb</td>
<td>Duration (full time): 5 years</td>
</tr>
</tbody>
</table>

**Assumed knowledge:** Depends on majors or units of study chosen.  

**Programs, majors and minors**  
You will choose a major from the B Arts, and a second major or a minor either from those options or from the shared pool. You must complete a major in Sociology, or a minor in either Sociology or Social Policy. You will also complete the Social Work professional program alongside your BA for four years. Social work includes mental health, social justice practice, work with children and families, social policy, human service systems, domestic violence and research.  

**Career possibilities**  
Social worker in health, community services, ageing, disability, mental health, community development, social policy, disasters and climate change, leadership and work with non-government organisations in Australia and overseas. Career opportunities also available related to the major chosen from the B Arts degree. See B Arts for more career possibilities.  

**Professional recognition**  
Australian Association of Social Workers  

### Additional admission criteria

**Applicants for all Bachelor of Education degrees (except Early Childhood) are required to complete a brief personal statement as part of the application for admission. This requirement also applies to the Bachelor of Music (Music Education).**  
For more information, visit [sydney.edu.au/teacher-education-personal-statement](http://sydney.edu.au/teacher-education-personal-statement)  

**^ NESA prerequisites for teaching degrees**  
The New South Wales Education Standards Authority (NESA) requires students entering the following teaching degrees to achieve a minimum of three Band 5s in their NSW HSC, one of which needs to be English (Standard or Advanced or English as a Second Language (ESL) or English as an Additional Language or Dialect (EALD) or equivalent):  
- Bachelor of Education (Health and Physical Education)  
- Bachelor of Education (Primary)  
- Bachelor of Music (Music Education)  

**Additionally, the Bachelor of Education (Primary) requires students to achieve Band 4 in Mathematics Standard (or equivalent) or higher.**  
For equivalent requirements for other Australian Year 12 qualifications, refer to the UAC website: [uac.edu.au/future-applicants/admission-criteria/year-12-qualifications](http://uac.edu.au/future-applicants/admission-criteria/year-12-qualifications)
# Engineering and computer science

## B Advanced Computing

<table>
<thead>
<tr>

<tr>
<td>Dalyell by invitation</td>
<td></td>
</tr>
<tr>
<td>Mathematics prerequisite may apply‡</td>
<td></td>
</tr>
<tr>
<td>Assumed knowledge:</td>
<td>Mathematics Extension 1</td>
</tr>
</tbody>
</table>

You’ll choose one computing major from the list below, with the option of also choosing either a second major or a minor from this list or from the shared pool: Computer Science, Computational Data Science, Cybersecurity, Software Development. You’ll also have access to the Open Learning Environment to broaden your skills and explore other areas of study.

### Career possibilities
Computer programmer, computer system administrator, consultant, entrepreneur, information services manager, systems analyst, software engineer, user experience designer, web developer and manager.

### Majors
For B Science: Depends on majors or units of study chosen.

### Professional recognition
This degree is accredited by the Australian Computer Society. Our graduates are recognised internationally through the Seoul Accord.

### Combine this degree with
B Commerce, B Science, B Science (Health), B Science (Medical Science)

## B Advanced Computing/B Commerce

</tbody>
</table>

**Specialisations**
You may choose an Aeronautical Engineering specialisation that focuses on aerospace systems or aerospace research. You may also broaden your studies by choosing a specialisation in Engineering Data Science, Innovation and Entrepreneurship, Humanitarian Engineering or Computer Systems. Specialisations are optional. If you are a high-achieving student with an ATAR of 99+ (or equivalent) you may apply for Space Engineering.

**Career possibilities**
Design research and certification in the airline/aerospace industry, general engineering positions, and manufacturing and assembly.

**Professional recognition**
This engineering degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**
B Arts, B Commerce, B Laws, B Project Management, B Science

### B Engineering Honours (Biomedical)

<table>
<thead>

</tr>
</tbody>
</table>

**Specialisations**
You may choose a Biomedical Engineering specialisation in Nanoscale Biotechnology, Biocomputation, Bionics and Bioelectronics or Biomedical Modelling and Design. You may also broaden your studies by choosing a specialisation in Engineering Data Science, Innovation and Entrepreneurship, Humanitarian Engineering or Computer Systems. Specialisations are optional.

**Career possibilities**
Biomedical engineers design and manufacture implantable and external medical devices. Careers include instrumentation engineer, device design engineer, medical device assessor, quality control and validation engineer, patent examiner, clinical support specialist, and field service engineer, for medtech companies, hospitals, medical research centres, and government institutions.

**Professional recognition**
This engineering degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**
B Arts, B Commerce, B Laws, B Project Management, B Science, B Science (Health), B Science (Medical Science)

### B Engineering Honours (Chemical and Biomolecular)

<td>Assumed knowledge: Mathematics Extension 1 and Chemistry</td>
</tr>
</tbody>
</table>

**Specialisations**
You may choose a Chemical and Biomolecular Engineering specialisation in Biochemical and Food Technologies, Chemical and Digital Technologies, Chemical Engineering for Energy or Chemical Engineering for the Environment. You may also broaden your studies by choosing a specialisation in Engineering Data Science. Specialisations are optional.

**Career possibilities**
Research the properties of raw materials in order to design solutions that help manage resources, protect the environment and improve health and safety products and procedures.

**Professional recognition**
This degree is accredited by Engineers Australia and the Institution of Chemical Engineers. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**
B Arts, B Commerce, B Laws, B Project Management, B Science

### B Engineering Honours (Civil)

<table>
<thead>
<tr>

</tbody>
</table>

**Specialisations**
You may choose a Civil Engineering specialisation in Structures, Environmental Fluids, Integrated Building Engineering, Geotechnical Engineering, Humanitarian Engineering, Project Management, or Transport. You may also broaden your studies by choosing a specialisation in Engineering Data Science, Innovation and Entrepreneurship, or Computer Systems. Specialisations are optional.

**Career possibilities**
Aid worker; roles with airport and harbour authorities, banks, construction and mining companies; roles in project management and public works; engineering and infrastructure consultant; humanitarian engineer; town planner; sustainability specialist.

**Professional recognition**
This degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**
B Arts, B Commerce, B Design in Architecture, B Laws, B Project Management, B Science
**Engineering and computer science**

**B Engineering Honours (Dalyell Scholars)**

**ATAR:** 98  
**IB:** 41  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Dalyell by application**  
**Mathematics prerequisite may apply**  
**Assumed knowledge:** Mathematics Extension 1 and either Physics or Chemistry, depending on the engineering stream (refer to the relevant stream)

**Specialisations**

As a Dalyell Scholar, you will undertake 12 credit points of distinctive Dalyell units complemented by a suite of additional enrichment opportunities, including mentoring, professional skill development and the option of a global mobility experience.

**Career possibilities**

Along with career options from your chosen stream, the valuable insights you gain through your studies as a Dalyell Scholar will set you apart from your peers and open up a range of opportunities across the public and private sectors, including: business, banking, consulting, entrepreneurship and project management.

**Professional recognition**

The Dalyell stream is completed within an Engineering stream accredited by Engineers Australia. Our graduates are also recognised internationally through the Washington Accord of the International Engineering Alliance.

**B Engineering Honours (Electrical)**

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Mathematics prerequisite may apply**  
**Assumed knowledge:** Mathematics Extension 1 and Physics

**Specialisations**

You may choose an Electrical Engineering specialisation in Computer Engineering, Internet of Things, Intelligent Information Engineering, Power Engineering or Telecommunications Engineering. You may also broaden your studies by choosing a specialisation in Engineering Data Science, Innovation and Entrepreneurship, or Humanitarian Engineering. Specialisations are optional.

**Career possibilities**

Grid maintenance and stability contractor, industry power supply engineer, power transmission and generating systems engineer, roles with specialised consulting companies and telecommunications.

**Professional recognition**

This engineering degree is accredited by Engineers Australia. Our graduates are also recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**

B Arts, B Commerce, B Laws, B Project Management, B Science

**B Engineering Honours (Flexible First Year)**

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb  
**Duration (full time):** 4 years  
**Mathematics prerequisite may apply**  
**Assumed knowledge:** Mathematics Extension 1, Physics and/or Chemistry

**Specialisations**

After commencing your studies in the Flexible First Year stream, you will have the opportunity to pursue an area of specialisation once you have transferred to a stream. Refer to the individual engineering streams for areas in which you may be able to specialise.

**Career possibilities**

Refer to individual engineering streams for examples.

**Professional recognition**

Students in the Flexible First Year pathway transfer to an Engineering stream accredited by Engineers Australia. Our graduates are also recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**

B Arts, B Commerce, B Laws, B Project Management, B Science

**B Engineering Honours (Mechanical)**

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Mathematics prerequisite may apply**  
**Assumed knowledge:** Mathematics Extension 1 and Physics

**Specialisations**

You may choose a Mechanical Engineering specialisation in Energy and the Environment, Computational Engineering, Mechanical Design, Thermofluids, Materials Science and Engineering, or Industrial and Product Design Engineering. You may also broaden your studies by choosing a specialisation in Engineering Data Science, Innovation and Entrepreneurship, Humanitarian Engineering or Computer Systems. Specialisations are optional. If you are a high-achieving student with an ATAR of 99+ (or equivalent) you may apply for Space Engineering.

**Career possibilities**

Roles in automated facilities, automatic control systems, biomedical implant design, construction, design of automotive, underwater exploration and space vehicles, environmental pollution control, manufacturing industry, and mineral exploration

**Professional recognition**

This degree is accredited by Engineers Australia. Our graduates are also recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**

B Arts, B Commerce, B Laws, B Project Management, B Science

**B Engineering Honours (Mechatronic)**

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Mathematics prerequisite may apply**  
**Assumed knowledge:** Mathematics Extension 1 and Physics

**Specialisations**

You may choose a Mechatronic Engineering specialisation in Robotics and Intelligent Systems. You may also broaden your studies by choosing a specialisation in Engineering Data Science, Innovation and Entrepreneurship, Humanitarian Engineering or Computer Systems. Specialisations are optional. If you are a high-achieving student with an ATAR of 99+ (or equivalent) you may apply for Space Engineering.

**Career possibilities**

Roles in automatic control systems, product design and development, robotics and automation for advanced manufacturing, and software design and development for real-time computer systems

**Professional recognition**

This degree is accredited by Engineers Australia. Our graduates are also recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**

B Arts, B Commerce, B Laws, B Project Management, B Science

---

For assumed knowledge, mathematics prerequisites and other important information, see table notes on page 66.
### B Engineering Honours (Software)

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and Physics  

**Specialisations**  
You may choose a Software Engineering specialisation in Computer Engineering, Engineering Data Science, Internet of Things or Intelligent Information Engineering. You may also broaden your studies by choosing a specialisation in Innovation and Entrepreneurship, or Humanitarian Engineering. Specialisations are optional.

**Career possibilities**  
Roles in artificial intelligence, control systems, database management, information technology, internet programming, language compilers, multimedia and telecommunication software systems, real-time software engineering and reliable biomedical systems.

**Professional recognition**  
This degree is accredited by Engineers Australia and the Australian Computer Society. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance and the Seoul Accord.

**Combine this degree with**  
B Arts, B Commerce, B Laws, B Project Management, B Science

---

### B Engineering Honours with Space Engineering

**ATAR:** 97  
**IB:** 39  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and Physics  

**Programs and majors**  
Space Engineering is available to students in Aeronautical, Mechanical and Mechatronic streams — refer to the relevant stream. Space Engineering covers studies in aerospace systems, electronic devices and circuits, orbital mechanics, space vehicle design, and systems engineering.

**Career possibilities**  
Along with career options from your chosen stream, you can apply your specialised knowledge of the space environment to careers in the aerospace, defence, environmental and research sectors.

**Professional recognition**  
Space Engineering is completed within an Engineering stream accredited by Engineers Australia. Our graduates are also recognised internationally through the Washington Accord of the International Engineering Alliance.

**Combine this degree with**  
B Arts, B Commerce, B Laws, B Project Management, B Science

### B Engineering Honours/B Arts

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 5.5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and either Physics or Chemistry, depending on the engineering stream (refer to the relevant stream). For B Arts: Depends on majors or units of study chosen.

**Specialisations and majors**  
In addition to the relevant B Engineering Honours stream requirements, you will take a major from B Arts.

**Career possibilities**  
Refer to relevant B Engineering Honours stream and B Arts.

**Professional recognition**  
This engineering degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

---

### B Engineering Honours/B Commerce

**ATAR:** 95  
**IB:** 37  
**Entry:** Feb/Jul  
**Duration (full time):** 5.5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and either Physics or Chemistry, depending on the engineering stream (refer to the relevant stream). For B Commerce: Depends on majors or units of study chosen.

**Specialisations and majors**  
In addition to the relevant B Engineering Honours stream requirements, you will take a major from B Commerce.

**Career possibilities**  
Refer to relevant B Engineering Honours stream and B Commerce.

**Professional recognition**  
This combined degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

---

### B Engineering Honours (Civil)/B Design in Architecture

**ATAR:** 90  
**IB:** 34  
**Entry:** Feb  
**Duration (full time):** 5 years  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and Physics. For Architecture: English Advanced.

**Specialisations and majors**  
Refer to the B Engineering Honours (Civil) stream and B Design in Architecture for requirements.

**Career possibilities**  
Aid worker; roles with airport and harbour authorities; architect (with further study); roles in architectural technology, banking, construction and mining; engineering and infrastructure consultant; humanitarian engineer; roles in interior and spatial design; roles with municipal councils and in project management, property development, public works and urban design; sustainability specialist

**Professional recognition**  
This combined degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.
## Engineering and computer science

### B Engineering Honours/B Project Management

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 5 years  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and either Physics or Chemistry, depending on the engineering stream; refer to the relevant stream

**Specialisations and majors**  
In addition to the B Engineering stream requirements, you will undertake a selection of core project management units of study.

**Career possibilities**  
Refer to the relevant B Engineering Honours stream and B Project Management.

**Professional recognition**  
This combined degree is accredited by Engineers Australia and the Project Management Institute Global Accreditation Centre. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

### B Engineering Honours/B Science

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1 and either Physics or Chemistry, depending on the Engineering stream (refer to the relevant stream). For B Science: Depends on majors or units of study chosen.

**Specialisations and majors**  
In addition to the relevant B Engineering Honours stream requirements, you will take a major from B Science.

**Career possibilities**  
Refer to the relevant B Engineering Honours stream and B Science.

**Professional recognition**  
This combined degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

### B Engineering Honours (Biomedical)/B Science (Health)

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1, Chemistry, Biology

**Programs and majors**  
In addition to the B Engineering Honours (Biomedical) stream requirements, you will complete a Health major in B Science (Health).

**Career possibilities**  
Refer to B Engineering Honours (Biomedical) stream and B Science (Health).

**Professional recognition**  
This combined degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

### B Engineering Honours (Biomedical)/B Science (Medical Science)

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb/Jul  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** Mathematics Extension 1, Chemistry, Biology

**Specialisations and majors**  
In addition to the relevant B Engineering Honours stream requirements, you will complete a program in Medical Science, including a Medical Science major in B Science (Medical Science).

**Career possibilities**  
Refer to the relevant B Engineering Honours stream and B Science (Medical Science).

**Professional recognition**  
This combined degree is accredited by Engineers Australia. Our graduates are recognised internationally through the Washington Accord of the International Engineering Alliance.

### B Project Management

**ATAR:** 80  
**IB:** 29  
**Entry:** Feb/Jul  
**Duration (full time):** 3 years  
**Mathematics prerequisite may apply‡**

**Assumed knowledge:** Mathematics Advanced and/or higher (depending on major chosen); other assumed knowledge: Depends on major or units of study chosen

**Programs and majors**  
Choose one major either from the project management options in Construction or Built Environment, or from the shared pool of majors. Built Environment major units are offered by the University of Sydney School of Architecture, Design and Planning. You can also take a project management minor in People and Change, or Project Controls.

**Career possibilities**  
Professional and management roles in property development, construction, mining, events, IT, banking and finance, state or federal government, and consultancy roles in the engineering, water health or energy sectors

**Professional recognition**  
This degree is accredited by the Project Management Institute Global Accreditation Centre for Project Management Education programs.

Combine this degree with B Engineering Honours

For assumed knowledge, mathematics prerequisites and other important information, see table notes on page 66.
**B Arts/B Laws**

**ATAR:** 95.5  
**IB:** 38  
**Entry:** Feb  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Assumed knowledge:** For B Arts: Depends on the majors or units of study chosen. For B Laws: English Advanced.

**Programs, majors and minors**

Refer to B Arts. Units of study for B Laws:  
First year: Foundations of Law, Legal Research, Torts.  
**Second year:** Civil and Criminal Procedure, Contracts, Criminal Law.  
Third year: Torts and Contracts II, Public International Law, Public Law, Legal Research II.  
**Fifth year:** Private International Law A and seven elective units of study.

**Career possibilities**

Refer to B Arts. For B Laws: Solicitor, barrister, magistrate, judge, and roles in diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy and public policy.

---

**B Commerce/B Laws**

**ATAR:** 95.5  
**IB:** 38  
**Entry:** Feb  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** For B Commerce: Mathematics Advanced or higher, other assumed knowledge depends on majors or units of study chosen. For B Laws: English Advanced.

**Programs, majors and minors**

Refer to B Commerce. Units of study for B Laws:  
First year: Foundations of Law, Legal Research, Torts.  
**Second year:** Civil and Criminal Procedure, Contracts, Criminal Law.  
Third year: Torts and Contracts II, Public International Law, Public Law, Legal Research II.  
**Fifth year:** Private International Law A and seven elective units of study.

**Career possibilities**

Refer to B Commerce. For B Laws: Solicitor, barrister, magistrate, judge, and roles in diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy and public policy.

---

**B Economics/B Laws**

**ATAR:** 95.5  
**IB:** 38  
**Entry:** Feb  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** For B Economics: Mathematics Advanced or higher. For B Laws: English Advanced.

**Programs, majors and minors**

Refer to B Economics. Units of study for B Laws:  
First year: Foundations of Law, Legal Research, Torts.  
**Second year:** Civil and Criminal Procedure, Contracts, Criminal Law.  
Third year: Torts and Contracts II, Public International Law, Public Law, Legal Research II.  
**Fifth year:** Private International Law A and seven elective units of study.

**Career possibilities**

Refer to B Economics. For B Laws: Solicitor, barrister, magistrate, judge, and roles in diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy and public policy.

---

**B Engineering Honours/B Laws**

**ATAR:** 95.5  
**IB:** 38  
**Entry:** Feb  
**Duration (full time):** 6.5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Assumed knowledge:** For B Engineering Honours: Mathematics Extension 1 and either Physics or Chemistry (depending on the engineering stream chosen). For B Laws: English Advanced.

**Programs, majors and minors**

In addition to the relevant B Engineering Honours stream requirements, you will undertake law units of study. Units of study for B Laws:  
First year: Foundations of Law, Legal Research, Torts.  
**Second year:** Civil and Criminal Procedure, Contracts, Criminal Law.  
Third year: Torts and Contracts II, Public International Law, Public Law, Legal Research II.  
**Fifth year:** Private International Law A and seven elective units of study.

**Career possibilities**

Refer to relevant B Engineering Honours stream. For B Laws: Solicitor, barrister, magistrate, judge, and roles in diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy and public policy.

---

**B Science/B Laws**

**ATAR:** 95.5  
**IB:** 38  
**Entry:** Feb  
**Duration (full time):** 5 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply‡**  
**Advanced stream:** Available  
**Assumed knowledge:** For B Science: Mathematics Advanced and/or higher (depending on units of study chosen); other assumed knowledge depends on majors or units of study chosen. For B Laws: English Advanced.

**Programs, majors and minors**

Refer to B Science. Please note that the only stream available in this combined degree is the Dalyell stream. Units of study for B Laws:  
First year: Foundations of Law, Legal Research, Torts.  
**Second year:** Civil and Criminal Procedure, Contracts, Criminal Law.  
Third year: Torts and Contracts II, Public International Law, Public Law, Legal Research II.  
**Fifth year:** Private International Law A and seven elective units of study.

**Career possibilities**

Refer to B Science and the possibilities below for science-specific careers: Environmental lawyer, urban and regional planner, occupational health and safety specialist, forensic science technician, science policy specialist, technical specialist or associate undertaking intellectual property cases in science patents, copyright and trademark disputes. For B Laws: Solicitor, barrister, magistrate, judge, and roles in diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy and public policy.
**Programs, majors and minors**
You will cover studies in anatomy, biological sciences, equipment and imaging techniques, image processing, pathology, physics, psychology and radiation biology.

**Career possibilities**
Diagnostic radiographer, with the possibility of working in a range of settings, such as small regional clinics, large metropolitan imaging departments, and hospital emergency departments.

**Professional recognition**
Medical Radiation Practice Board of Australia

---

**B Applied Science (Exercise and Sport Science)**

**ATAR:** 80  
**IB:** 29  
**Entry:** Feb  
**Duration (full time):** 3 years  
**Assumed knowledge:** Chemistry and Mathematics Advanced or higher

**Programs, majors and minors**
You will complete a major in Exercise Science, and a minor or second major in Physical Activity and Health. You can also take electives or an optional major or minor from the shared pool, or access the Open Learning Environment to broaden your learning. You will complete two practicum experiences in the final year. For the combined degree you must complete a second major, selecting either the Physical Activity and Health major or a major from the shared pool.

**Career possibilities**
Accredited exercise scientist, coach, personal trainer, strength and conditioning specialist. Our graduates find careers in the sport, fitness and health industries; work health and safety; injury prevention; public health; exercise rehabilitation; research and technology; education and health; and medical insurance.

**Professional recognition**
See the course page at sydney.edu.au/courses

---

**B Applied Science (Exercise Physiology)**

**ATAR:** 89  
**IB:** 53  
**Entry:** Feb  
**Duration (full time):** 4 years  
**Assumed knowledge:** Chemistry and Mathematics Advanced or higher

**Programs, majors and minors**
You will complete a major in Exercise Science, clinical exercise practice, ergonomics, exercise physiology, functional anatomy, motor control and behaviour.

**Career possibilities**
Exercise physiologist. As an accredited exercise physiologist, you will have the opportunity to work across all sectors of health care, including cardiac rehabilitation, musculoskeletal rehabilitation, mental health, long-term rehabilitation following spinal cord injury, ageing, occupational rehabilitation and programs for people with an intellectual disability.

**Professional recognition**
See the course page at sydney.edu.au/courses

---

**B Applied Science (Occupational Therapy)**

**ATAR:** 91  
**IB:** 54  
**Entry:** Feb  
**Duration (full time):** 4 years

**Programs, majors and minors**
You will complete a major or minor in Disability and Participation and cover studies in physical and psychosocial capacity as well as human anatomy, neuroscience, occupational therapy theory and practice, disability rights and participation and infancy and preschool occupational performance. You will also undertake a wide variety of placements totalling 1000 hours.

**Career possibilities**
Occupational therapist. The breadth of occupational therapy means you can diversify your career while staying within the same profession. For example, you could work in the National Disability Insurance Scheme (NDIS), one-on-one in rehabilitation with stroke or cancer survivors, then work with babies in a neonatal intensive care unit or young adults in a community mental health program.

**Professional recognition**
Occupational Therapy Board of Australia, Australian Health Practitioner Regulation Agency, Occupational Therapy Council of Australia and World Federation of Occupational Therapists

---

**B Applied Science (Physiotherapy)**

**ATAR:** 97.5  
**IB:** 40  
**Entry:** Feb  
**Duration (full time):** 4 years  
**Assumed knowledge:** Chemistry and Physics

**Programs, majors and minors**
You will cover studies in biomechanics, clinical exercise practice, ergonomics, exercise physiology, functional anatomy, motor control and behaviour.

**Career possibilities**
Physiotherapist. You can choose from a diverse range of physiotherapy and health promotion career options in both the public and private sectors, in settings such as healthcare organisations as well as sports, schools and community, and private practice.

**Professional recognition**
Australian Physiotherapy Council and Australian Health Practitioner Regulation Agency (AHPRA)
# Medicine and health

## B Applied Science (Speech Pathology)

| ATAR: | 92 |
| IB: | 35 |
| Entry: | Feb |
| Duration (full time): | 4 years |

**Programs**

You will study anatomy, neurobiology, psychology and research methods alongside a range of speech pathology units such as communication, linguistics, language development and disorder, speech, phonology, literacy, hearing loss, dysphagia, stuttering and voice. You will also undertake multiple clinical placements to gain essential professional experience.

**Career possibilities**

Speech pathologist. You can be employed across diverse settings, including hospitals and community health, mental health and justice services, aged care facilities, non-government organisations, education, and private practice.

**Professional recognition**

Speech Pathology Australia

## B Arts/D Medicine

| ATAR: | 99.95 + other admission criteria |
| IB: | 45 + other admission criteria |
| Entry: | Feb |
| Duration (full time): | 7 years |
| Dalyell by invitation |
| Mathematics prerequisite may apply‡ |

**Assumed knowledge:** For B Arts: Depends on majors or units of study chosen. For Medicine: Mathematics Advanced or higher.

**Programs, majors and minors**

Refer to B Arts. You will choose a major from the options available in the B Arts, and either a second major or a minor from those options or the shared pool. During the B Arts, you will also complete foundational knowledge units for medicine (in science), a zero-credit-point subject in medicine, and Open Learning Environment units. If you become a Dalyell Scholar, you will complete 12 credit points of distinctive Dalyell units designed to cultivate high-level graduate attributes. You will also have access to a suite of additional enrichment opportunities. In the Doctor of Medicine component, practical experience – including contact with patients and observation of the physical aspects of disease – commences in the first year and continues to the final year.

**Career possibilities**

Registered medical practitioner in a variety of specialties, subject to further training, (e.g. medicine, surgery, general practice, mental health, women’s health, child and adolescent health), biomedical and clinical research, teaching, health advocacy, health service management

**Professional recognition**

Australian Medical Council (AMC)

## B Arts/M Nursing

| ATAR: | 80 |
| IB: | 29 |
| Entry: | Feb |
| Duration (full time): | 4 years |

**Assumed knowledge:** For B Arts: Depends on the majors or units of study chosen; For M Nursing: None.

**Programs, majors and minors**

Refer to B Arts. You will choose a major from the B Arts and electives from those available in the B Arts or the shared pool. You’ll also have access to the Open Learning Environment. The areas of study include: Acute care, aged care, chronic illness, clinical practice, Indigenous health, mental health, pharmacology, physiology, professional practice, social and health policy.

**Career possibilities**

Registered nurse in a range of healthcare areas including emergency, intensive care, mental health, cancer and palliative care, aged care, child and adolescent health, community health, education and research. Allows for study in other areas of interest.

**Professional recognition**

Leads to registration to practice as a nurse in Australia with Australian Health Practitioner Regulation Agency

## B Nursing (Advanced Studies)

| ATAR: | 80 |
| IB: | 29 |
| Entry: | Feb |
| Duration (full time): | 3 years |

**Programs, majors and minors**

Focus areas for nursing: Acute care, aged care, child and adolescent health, chronic illness, clinical practice, Indigenous health, mental health, pharmacology, physiology, primary health care, professional practice, social and health policy

**Career possibilities**

Registered nurse in a range of healthcare areas, including emergency, intensive care, mental health, cancer and palliative care, aged care, child and adolescent health, education and research

**Professional recognition**

Leads to registration to practice as a nurse in Australia with Australian Health Practitioner Regulation Agency.

## B Oral Health

| ATAR: | 82 |
| IB: | 30 |
| Entry: | Feb |
| Duration (full time): | 3 years |

**Assumed knowledge:** Biology and/or Chemistry

**Programs, majors and minors**

Your studies will include dental hygiene and dental therapy service as well as oral health promotion.

**Career possibilities**

Oral health therapist, dental hygienist, dental therapist, community oral health educator/consultant/advocate

**Professional recognition**

Australian Dental Council, Dental Board of Australia
**Medicine and health**

**B Pharmacy (Honours)/M Pharmacy Practice**

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb  
**Duration (full time):** 5 years  
**Mathematics prerequisite may apply†**  
**Assumed knowledge:** Mathematics Advanced or higher, Biology and Chemistry  

**Programs, majors and minors**  
Your studies will integrate knowledge and skills in biology, physiology, pharmaceutical sciences, pharmaceutics, pharmacology and pharmacy practice. In the fourth year, you will undertake your honours research project, which could be based overseas in pharmacy-related settings or in the pharmaceutical industry. Work-integrated learning is a key component of this course, and the fifth year (M Pharmacy Practice) has been developed to meet the Australian Pharmacy Council pre-registration training requirements to become a registered pharmacist and to meet the requirement to complete one year of supervised practice training. Completion of a major is not a requirement in this degree.

**Career possibilities**  
Registered pharmacist in a community pharmacy (community practice) or hospital pharmacy; researcher within a university or research institute; or roles in the pharmaceutical industry in drug development, production or marketing.

**Professional recognition**  
This degree is accredited by the Australian Pharmacy Council and the supervised practice component is approved by the Pharmacy Board of Australia.

**B Pharmacy and Management (Honours)/M Pharmacy Practice**

**ATAR:** 85  
**IB:** 31  
**Entry:** Feb  
**Duration (full time):** 6 years  
**Mathematics prerequisite may apply†**  
**Assumed knowledge:** Mathematics Advanced or higher, Biology and Chemistry  

**Programs, majors and minors**  
Your studies will integrate knowledge and skills in biology, physiology, pharmaceutical sciences, pharmaceutics, pharmacology and pharmacy practice, as well as business. In the fifth year, you will undertake your honours research project, which could be based overseas in pharmacy-related settings or in the pharmaceutical industry. Work-integrated learning is a key component of this course, and the sixth year (Master of Pharmacy Practice) has been developed to meet the Australian Pharmacy Council pre-registration training requirements to become a registered pharmacist and to meet the requirement to complete one year of supervised practice training. Completion of a major is not a requirement in this degree.

**Career possibilities**  
Registered pharmacist in a community pharmacy (community practice) or hospital pharmacy; researcher within a university or research institute; or roles in the pharmaceutical industry in drug development, production or marketing.

**Professional recognition**  
This degree is accredited by the Australian Pharmacy Council and the supervised practice component is approved by the Pharmacy Board of Australia.

**B Science/D Dental Medicine**

**ATAR:** 99.6 + other admission criteria  
**IB:** 44 + other admission criteria  
**Entry:** Feb  
**Duration (full time):** 7 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply†**  
**Advanced stream:** Available  
**Assumed knowledge:** For B Science: Mathematics Advanced and/or higher (depending on units of study chosen); other assumed knowledge depends on majors or units of study chosen. For D Dental Medicine: None.  

**Programs, majors and minors**  
During the B Science, you may choose from a wide range of majors and minors from across the sciences. Refer to B Science. You will also complete foundational knowledge units for biology and a zero-credit-point unit of independent learning related to dentistry and oral health. If you become a Dalyell Scholar, you will complete 12 credit points of distinctive Dalyell units designed to cultivate high-level graduate attributes. For the Doctor of Dental Medicine, you will study integrated clinical dentistry and life sciences, and conduct a research project related to dentistry and oral health.

**Career possibilities**  
Dentist in private practice, public service (hospitals, schools, health departments), defence forces, oral health researcher, academic careers and a variety of specialisation options on completion of professional and research experience.

**Professional recognition**  
Dental Board of Australia, Australian Dental Council

**B Science/D Medicine**

**ATAR:** 99.9% + other admission criteria  
**IB:** 45 + other admission criteria  
**Entry:** Feb  
**Duration (full time):** 7 years  
**Dalyell by invitation**  
**Mathematics prerequisite may apply†**  
**Advanced stream:** Available  
**Assumed knowledge:** For B Science: Mathematics Advanced and/or higher (depending on units of study chosen); other assumed knowledge depends on majors or units of study chosen. For Medical Science stream: Mathematics Advanced and/or higher (depending on units of study selected); Chemistry and Biology. For D Medicine: None.  

**Programs, majors and minors**  
Refer to B Science. You may choose to complete the Medical Science stream or choose from a wide range of majors from across the sciences and either a second major or a minor from science or the shared pool. During the B Science, you will also complete foundational knowledge units for medicine (in science) and Open Learning Environment units. If you become a Dalyell Scholar, you will complete 12 credit points of distinctive Dalyell units designed to cultivate high-level graduate attributes. You will also have access to a suite of additional enrichment opportunities. In the Doctor of Medicine component, practical experience – including contact with patients and observation of the physical aspects of disease – commences in the first year and continues to the final year.

**Career possibilities**  
Registered medical practitioner in a variety of specialties, subject to further training (e.g., medicine, surgery, general practice, mental health, women’s health, child and adolescent health), biomedical and clinical research, teaching, health advocacy, health service management.

**Professional recognition**  
Australian Medical Council (AMC)

B Science (Health)/M Nursing

Programs, majors and minors
You will choose one major from those available in B Science (refer to B Science) and Open Learning Environment units. The areas of study include: Acute care, aged care, child and adolescent health, chronic illness, clinical practice, Indigenous health, mental health, pharmacology, physiology, professional practice, social and health policy.

Career possibilities
Registered nurse in a range of healthcare areas including emergency, intensive care, mental health, cancer and palliative care, aged care, child and adolescent health, community health, education and research with the ability to use your knowledge of science in health issues such as infectious and non-communicable diseases, infection control, anatomy, physiology and biomedical science, pharmacology and research.

Professional recognition
Leads to registration to practice as a nurse in Australia with Australian Health Practitioner Regulation Agency

B Science (Health)/M Nursing

ATAR: 80
IB: 29
Entry: Feb
Duration (full time): 4 years
Dalyell by invitation
Mathematics prerequisite may apply‡
Assumed knowledge: For B Science: Mathematics Advanced and/or higher; other assumed knowledge depends on majors or units of study chosen.

Programs, majors and minors
You will complete a major in Health within the Health stream, a second major and Open Learning Environment units – refer to B Science (Health). The areas of study include: Acute care, aged care, child and adolescent health, chronic illness, clinical practice, Indigenous health, mental health care and management, pharmacology, physiology, professional practice, social and health policy.

Career possibilities
Registered nurse in a range of healthcare areas including emergency, intensive care, mental health, cancer and palliative care, aged care, child and adolescent health, community health, education and research. You can apply your knowledge of health systems in industries supporting health care, including e-health, mental health, industrial relations and management.

Professional recognition
Leads to registration to practice as a nurse in Australia with Australian Health Practitioner Regulation Agency

B Science/M Nutrition and Dietetics

ATAR: 92.5
IB: 35
Entry: Feb
Duration (full time): 5 years
Dalyell by invitation
Mathematics prerequisite may apply‡
Assumed knowledge: Mathematics Advanced or higher; Chemistry and Biology; other assumed knowledge depends on majors or units of study chosen for the B Science.

Programs, majors and minors
For the B Science, you will complete a program in Nutrition and Dietetics, including a major in Nutrition Science, a minor or a second major and units of study from the Open Learning Environment. You will require a credit average in the Bachelor of Science to proceed to the Master of Nutrition and Dietetics.

For M Nutrition and Dietetics, your studies will include nutritional science, nutritional assessment, professional studies, methods in research, medical nutrition therapy, public health nutrition, food service management, and 20 weeks of dietetics training placements and a semester of nutrition research.

Career possibilities
Hospital dietitian, dietitian-nutritionist in private practice, primary care, aged care, community, public health, government or industry

Professional recognition
Graduates of this program are eligible to become full members of Dietitians Australia and to join the Accredited Practising Dietitian Program

Additional admission criteria

DENTISTRY

Bachelor of Science/Doctor of Dental Medicine
Admission is based on ATAR or equivalent and satisfactory performance in an assessment process comprising a written assessment and a panel discussion.

Applicants are only eligible for admission to the first available course intake following receipt of final results. Find out more about eligibility and how to apply at sydney.edu.au/dentistry/dddp

MEDICINE

Bachelor of Arts/Doctor of Medicine

Bachelor of Science/Doctor of Medicine

Admission to the double degree medicine pathway is based on ATAR or equivalent and satisfactory performance in an assessment process that includes a written assessment and a panel discussion.

Applicants are only eligible for admission to the first available course intake following receipt of final results. Find out more about eligibility and how to apply at sydney.edu.au/medicine/ddmp

ABORIGINAL AND TORRES STRAIT ISLANDER PATHWAYS

### B Music

**ATAR:** 70 + portfolio and interview  
**IB:** 24 + portfolio and interview  
**Entry:** Feb  
**Duration (full time):** 4 years  
**Assumed knowledge:** Music 1  

**Programs, majors and minors**  
You will choose from the following programs: Contemporary Music Practice; Composition for Creative Industries; Digital Music and Media; or a major in Musicology. You may also take an optional major, minor or electives from the shared pool and the Open Learning Environment.

**Career possibilities**  
These depend on the areas of study and could include: arts administrator, music producer, singer/songwriter, contemporary musician, festival or venue manager, composer, music arranger, sound installation designer, interactive music designer, music journalist, music researcher, event producer.

---

### B Music (Composition)  
B Music/B Advanced Studies (Composition)

**ATAR:** 70 + portfolio and interview  
**IB:** 24 + portfolio and interview  
**Entry:** Feb  
**Duration (full time):** 4 years (single) / 5 years (combined)  
**Assumed knowledge:** Music 2  

**Programs, majors and minors**  
You will have the opportunity to study in both traditional and electroacoustic composition areas, including computer music, digital music and sound art. You will take core studies in compositional techniques and analysis, instrumentation and orchestration, music theory andural training, and historical and cultural studies. In the combined B Music/B Advanced Studies (Composition) you will complete a major from the shared pool and units from the Open Learning Environment. In the fifth year, you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship project, or an honours project.

**Career possibilities**  
Composer, music arranger, concert entrepreneur, artistic curator, music researcher

---

### B Music (Music Education)

**ATAR:** 70 + audition/portfolio and special requirements for teaching courses  
**IB:** 24 + audition/portfolio and special requirements for teaching courses  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years  
**Assumed knowledge:** Music 2  
**Prerequisites:** NSW Education Standards Authority (NESA) requirement of Band 5 in three HSC subjects, one of which must be English (Standard or Advanced or ESL/EALD) or equivalent. See page 41.

**Programs, majors and minors**  
You will undertake core Music Education studies, plus a principal study in either a classical instrument, voice, jazz studies, drum set, historical performance, non-Western instruments, composition, contemporary music practice, or musicology. You will also undertake studies in analysis, history and cultural studies, and music skills (aural perception, harmony and analysis).

**Career possibilities**  
Classroom music teacher, private music teacher  
**Professional recognition**  
NSW Education Standards Authority (NESA)

---

### B Music (Performance)  
B Music/B Advanced Studies (Performance)

**ATAR:** 70 + audition  
**IB:** 24 + audition  
**Entry:** Feb/Jul  
**Duration (full time):** 4 years (single) / 5 years (combined)  
**Assumed knowledge:** Music 2  

**Programs, majors and minors**  
You will take an instrumental or vocal principal study from either classical music, jazz, historical performance, music theatre, non-Western music or drum set. In addition, you will complete core studies in music skills and analysis, history, culture, performance, ensemble studies and pedagogy. In the combined B Music/B Advanced Studies (Performance), you will complete a major from the shared pool and units from the Open Learning Environment. In the fifth year, you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship project, or an honours project.

**Career possibilities**  
Concert soloist, musician, private music teacher, orchestral musician, chamber musician, jazz musician, conductor, concert entrepreneur, arts manager

---

### Additional admission criteria

For admission to the Sydney Conservatorium of Music, you will also be assessed based on an audition (or portfolio) and interview. An audition fee applies.

For more on requirements and deadlines, visit sydney.edu.au/music/audition

For the Bachelor of Music (Music Education), also see requirements under Education (see page 41).
### B Agricultural Science
#### B Agricultural Science Honours
- **ATAR:** 75
- **IB:** 26
- **Entry:** Feb
- **Duration (full time):** 3 years /4 years with honours
- **Assumed knowledge:** Mathematics Standard or above, English Standard or above

**Programs, majors and minors**
You will complete a comprehensive degree core in Agricultural Science, plus one related major chosen from: Animal Production; Ecology and Evolutionary Biology; Environmental, Agricultural and Resource Economics; Food Science; Genetics and Genomics; Microbiology; Plant Science; Soil Science and Hydrology. In the final year of the honours degree, in addition to a research project, you will undertake advanced coursework units and complete a professional development unit involving farm, industry and community placements.

**Career possibilities**
Agronomist, agricultural scientist, horticultural scientist, sustainable agriculture consultant, researcher, plant geneticist, animal reproduction specialist, environmental microbiologist, food scientist, food safety specialist, botanist, agricultural journalist, agribusiness consultant, commodities trader, agricultural marketing and banking, agricultural data analytics, precision soil scientist

### B Liberal Arts and Science
#### B Liberal Arts and Science
- **ATAR:** 70
- **IB:** 24
- **Entry:** Feb/Jul
- **Duration (full time):** 3 years
- **Dalyell by invitation**
- **Assumed knowledge:** Depends on the major or units of study chosen

**Programs, majors and minors**
You will complete one major in either science or arts and a sequence in the other. A ‘sequence’ is similar to the structure of a minor and includes six units of study.

**Arts and social sciences majors include:**
- American Studies; Ancient Greek; Ancient History; Anthropology; Arabic Language and Cultures; Archaeology; Art History; Asian Studies; Biblical Studies and Classical Hebrew; Chinese Studies; Criminology; Cultural Studies; Digital Culture; Economics; Economic Policy; Econometrics; English; Environmental Science; Immunology and Pathology; Infectious Diseases; Marine Science; Mathematics; Medicinal Chemistry; Microbiology; Nutrition Science; Pharmacology; Physics; Physiology; Plant Production; Psychological Science; Psychology (program); Software Development; Soil Science and Hydrology; Statistics.

**Science majors include:**
- Anatomy and Histology; Animal Health, Disease and Welfare; Animal Production; Applied Medical Science; Biochemistry and Molecular Biology; Biology; Chemistry; Computer Science; Data Science; Ecology and Evolutionary Biology; Environmental Studies; Financial Mathematics and Statistics; Food Science; Genetics and Genomics; Geography; Geology and Geophysics; Health; History and Philosophy of Science; Immunology and Pathology; Infectious Diseases; Marine Science; Mathematics; Medicinal Chemistry; Microbiology; Nutrition Science; Pharmacology; Physics; Physiology; Plant Production; Psychological Science; Psychology (program); Software Development; Soil Science and Hydrology; Statistics.

**Science majors include:**
- Anatomy and Histology; Animal Health, Disease and Welfare; Animal Production; Applied Medical Science; Biochemistry and Molecular Biology; Biology; Chemistry; Computer Science; Data Science; Ecology and Evolutionary Biology; Environmental Studies; Financial Mathematics and Statistics; Food Science; Genetics and Genomics; Geography; Geology and Geophysics; Health; History and Philosophy of Science; Immunology and Pathology; Infectious Diseases; Marine Science; Mathematics; Medicinal Chemistry; Microbiology; Nutrition Science; Pharmacology; Physics; Physiology; Plant Production; Psychological Science; Psychology (program); Software Development; Soil Science and Hydrology; Statistics.

**Career possibilities**
Anthropologist, archaeologist, archivist, art or science historian, business administrator or manager, biosecurity researcher, documentary maker, editor or publisher, ecologist, environmental policymaker, food chemistry analyst, foreign affairs and trade officer, geologist, government policy officer, historian, heritage specialist, human resources manager, hydrologist, information specialist, journalist, language specialist, media and communications advisor, museum or gallery curator, plant geneticist, researcher, scientist, sociologist

### B Liberal Arts and Science (Advanced)
- **ATAR:** 90
- **IB:** 54
- **Entry:** Feb/Jul
- **Duration (full time):** 3 years
- **Dalyell by invitation**
- **Assumed knowledge:** Depends on the major or units of study chosen

**Programs, majors and minors**
You will complete one Science major chosen from the majors with enough Advanced units to complete the Advanced stream. Refer to the majors listed under the B Science (Advanced). You will also complete a sequence in sequence in Arts. Refer to B Liberal Arts and Science.

**Career possibilities**
Anthropologist, archaeologist, archivist, art or science historian, business administrator or manager, biosecurity researcher, documentary maker, editor or publisher, ecologist, environmental policymaker, food chemistry analyst, foreign affairs and trade officer, geologist, government policy officer, historian, heritage specialist, human resources manager, hydrologist, information specialist, journalist, language specialist, media and communications advisor, museum or gallery curator, plant geneticist, researcher, scientist, sociologist

### B Psychology
- **ATAR:** 80
- **IB:** 29
- **Entry:** Feb
- **Duration (full time):** 3 years
- **Dalyell by invitation**
- **Mathematics prerequisite may apply**

**Assumed knowledge:** Mathematics Advanced or higher; other assumed knowledge depends on minors or units of study chosen

Programs, majors and minors
You will complete a program in Psychology, a minor from the shared pool and electives from either B Science, the shared pool or the Open Learning Environment.

**Career possibilities**
Clinical psychologist (with additional study), neuroscientist, organisational psychologist, market researcher, advertising executive, social psychology researcher, learning and attention researcher

**Professional recognition**
Completion of this degree meets the Level 1 program (Foundational Competencies) requirement of the Australian Psychologists Accreditation Council (APAC), allowing graduates to apply for Level 2 in the registration pathway. Refer to the APAC website for further detail.
Science

</tr>
</tbody>
</table>

Programs, majors and minors
Refer to B Science/B Advanced Studies. A second major must also be taken from these options or from the shared pool. As a Dalyell Scholar, you will undertake 12 credit points of distinctive Dalyell units complemented by a suite of additional enrichment opportunities including mentoring, professional skill development, co-curricular activities, and the option of a global mobility experience. You will also complete units from the Open Learning Environment. In the final year of the combined degree, you will undertake advanced coursework units and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

Career possibilities
Agricultural scientist, astronomer, biosecurity researcher, data analyst, ecologist, environmental policymaker, food chemistry analyst, hydrologist, investment banker, journalist, mathematician, medical scientist, nanoscientist, nutritionist (after further study), psychologist (after further study), plant geneticist, soil scientist

</table>

**Assumed knowledge:** Mathematics Advanced and/or higher, Biology and Chemistry; other assumed knowledge depends on majors or units of study chosen

**Programs, majors and minors**
This stream requires completion of a program in Medical Science major. You will also complete a second major (mandatory for B Science/B Advanced Studies (Medical Science) or minor from those available in the B Science or from the shared pool. You'll also complete units from the Open Learning Environment. In the final year of the combined degree, you will undertake advanced coursework units and a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**
Medical researcher, pathologist, doctor (with further study), dentist (with further study), histologist, physiologist, microbiologist, biochemist, biomedical device designer, anatomy researcher, infectious diseases researcher, geneticist

Combine B Science (Medical Science) with B Advanced Computing, B Engineering Honours (Biomedical), D Medicine

B Science/B Advanced Studies (Animal and Veterinary Bioscience)

<table>
<thead>
<tr>
<th>ATAR: 80</th>

<tr>
<td>Dalyell by invitation</td>
<td>Mathematics prerequisite may apply†</td>
</tr>
</tbody>
</table>

**Assumed knowledge:** Mathematics Advanced and/or higher, Biology and Chemistry; other assumed knowledge depends on majors or units of study chosen

**Programs, majors and minors**
This stream requires completion of a program in Animal and Veterinary Bioscience, including an Animal and Veterinary Bioscience major. You will also complete a second major from those available in the B Science or from the shared pool. You'll also complete units from the Open Learning Environment. In the final year of the combined degree, in addition to a professional placement, you will undertake advanced coursework units and a real-world industry, community, entrepreneurship or research project, or an honours project.

**Career possibilities**
Agricultural scientist, animal health and welfare professional, animal ethicist, animal nutritionist, biosecurity researcher, ecologist, environmental policymaker, geneticist, wildlife population manager, veterinarian (with further study in the Doctor of Veterinary Medicine)

B Science/B Advanced Studies (Taronga Wildlife Conservation)

<table>
<thead>
<tr>
<th>ATAR: 80</th>
<th>IB: 29</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry: Feb/Jul</td>
<td>Duration (full time): 4 years</td>
</tr>
<tr>
<td>Dalyell by invitation</td>
<td>Mathematics prerequisite may apply†</td>
</tr>
</tbody>
</table>

**Assumed knowledge:** Mathematics Advanced or higher and Biology; other assumed knowledge depends on majors or units of study chosen

**Programs, majors and minors**
You will take a program in Taronga Wildlife Conservation which includes a Wildlife Conservation major that combines biology and conservation management. You will also complete a second major from the B Science or the shared pool. The Taronga Wildlife Conservation stream also includes additional prescribed units of study in mathematics and animal sciences. It provides extensive training in wildlife conservation by incorporating the study of biodiversity and evolution, animal science, and animal behaviour and management. You'll also complete units from the Open Learning Environment. In the final year of the combined degree, in addition to fieldwork, you will undertake advanced coursework projects, or an honours project.

**Career possibilities**
Ecologist, animal reproduction specialist, conservationist, environmental policymaker, teacher (with further training), veterinarian (with further study), in fields including wildlife conservation, sustainability, environmental consulting, animal health, government and policy, NGOs, business and analytics
Science

**B Science/M Mathematical Sciences**

| ATAR: 93 |
| IB: 36 |
| Entry: Feb/Jul |
| Duration (full time): 4.5 years |
| Dalyell by invitation |
| Mathematics prerequisite may apply‡ |
| Assumed knowledge: Mathematics Extension 2; other assumed knowledge depends on major or units of study chosen for the B Science. Students with top band Mathematics Extension 1 are also encouraged to apply. |

**Programs, majors and minors**

In the B Science, you will complete a major at advanced level in either Mathematics, Statistics, Financial Mathematics and Statistics, or Data Science. You will also complete a second major or minor chosen from those available in the B Science or from the shared pool. You will also complete units from the Open Learning Environment. In the M Mathematical Sciences, you will complete advanced units chosen from pure mathematics, applied mathematics, financial mathematics, statistics and data science.

**Career possibilities**

Business analyst, bioinformatician, data scientist, economic modeller, energy forecaster, game designer, health planner, quantitative analyst in banking, statistician, market analyst, meteorologist, financial analyst, teacher (with further training), researcher, web analyst.

---

**B Veterinary Biology/D Veterinary Medicine**

| ATAR: 94 + statement and test |
| IB: 37 + statement and test |
| Entry: Feb |
| Duration (full time): 6 years |
| Mathematics prerequisite may apply‡ |
| Assumed knowledge: Mathematics Advanced or higher, Chemistry, Biology |

**Programs, majors and minors**

Your studies will include animal behaviour and welfare science, animal diseases and pathobiology, animal husbandry, cell biology, clinical and professional practice, pharmacology, veterinary anatomy and physiology, veterinary conservation biology, veterinary medicine, veterinary public health and veterinary surgery.

**Career possibilities**

Veterinarian, veterinary geneticist, small animal veterinarian, livestock veterinarian, equine veterinarian, biosecurity researcher, veterinary cardiologist, public health policymaker

**Professional recognition**

Graduates are eligible for registration with the Veterinary Practitioner Board in each state and territory in Australia. The Bachelor of Veterinary Biology/Doctor of Veterinary Medicine is also recognised internationally.

**Additional admission criteria**

Applicants to the Bachelor of Veterinary Biology/Doctor of Veterinary Medicine are required to complete a Commitment to Veterinary Science form and a situational judgement test, in addition to the application for admission. For details, visit the relevant course page: sydney.edu.au/courses

There are separate requirements for progression to the Doctor of Veterinary Medicine component of the combined degree. For details, visit: sydney.edu.au/handbooks/science

* The B Veterinary Biology/D Veterinary Medicine (BVB/DVM) lists two tuition fee rates. The first tuition fee is for students commencing the BVB component in 2024 for Year 1. The second tuition fee is for students commencing the DVM in 2024 for Year 1. Tuition fees are subject to annual review and will increase each year of your study. Refer to important fee information on page 73.

** Tuition fees are subject to annual increases. For further information, see page 73.

◊ Not available for full-time study in Australia on a student visa.

^, **, † See table notes on pages 66-69.
International students
Courses listed in the ‘2024 guide to admission criteria for international students’ (pages 58–65) are CRICOS registered and available to student visa holders, unless otherwise indicated with a ◊. For more information on CRICOS-registered courses, visit
- cricos.education.gov.au

Admission scores
The admission criteria published in our tables are to be used as a guide and will not necessarily result in an offer of a place for all courses. Admission is subject to meeting all admission criteria, including English language requirements and prerequisites where applicable for some students. For some courses (marked with a triangle), there are additional admission criteria such as auditions and interviews.

ATAR-equivalent admission scores listed for non-Australian qualifications are also indicative and subject to changes in assessment schedules used to convert scores.

For full course details, check the relevant course at
- sydney.edu.au/courses

For a comprehensive list of secondary education (Year 12 or high school qualifications accepted by the University, visit
- sydney.edu.au/study/secondary-qualifications

Programs, majors, minors and specialisations
The programs, majors, minors and specialisations listed are indicative and subject to change. Unless specified as a major or a minor only, majors are also available as minors. For the latest information, visit
- sydney.edu.au/handbooks

Assumed knowledge and prerequisites
The assumed knowledge and prerequisites listed in our course tables refer to subjects in the NSW Higher School Certificate (HSC) curriculum. For example, Mathematics Advanced refers to the two-unit HSC subject or an equivalent subject for other qualifications. Refer to the HSC syllabus to understand the required subjects and standards.

Recommended studies
Some courses may also have recommended studies. For details, check the relevant course at
- sydney.edu.au/courses

Dalyell by invitation
Dalyell by invitation refers to the Dalyell Scholars stream for high-achieving students that eligible students may be invited to join.

Key to the tables
▲ Additional admission criteria
Combination of ATAR (or equivalent score) plus additional admission criteria (eg, portfolio, audition, interview). Check the details for your specific course at
- sydney.edu.au/courses

na Not available or not applicable
Not applicable as an admission score cannot be applied.

◆ Bachelor of Nursing Post Registration (Singapore)
This course is delivered in Singapore by a third-party provider and is not available for full-time study in Australia on a student visa. For more information, visit the Singapore Institute of Management’s website.
- www.simge.edu.sg

Prerequisites
‡ Mathematics prerequisite
For the courses marked with this symbol, the mathematics prerequisite will apply to international students undertaking an Australian state or territory Year 12 qualification in or outside Australia, any Year 12 qualification in Australia, or the University of Sydney Foundation Program. For more information about the mathematics prerequisite, including equivalent requirements for other qualifications and options available if you have not studied mathematics, visit
- sydney.edu.au/study/maths

^ NESA prerequisites for teaching degrees
- Bachelor of Education (Primary)
- Bachelor of Education (Health and Physical Education)
- Bachelor of Music (Music Education)

The New South Wales Education Standards Authority (NESA) requires students entering these teaching degrees to achieve the equivalent of a minimum of three Band 5s in their NSW HSC, one of which must be English (English Standard, English Advanced, or English as an Additional Language or Dialect (EALD) previously known as English as a Second Language (ESL)). For equivalent requirements for other Australian Year 12 qualifications, refer to the UAC website:
- uac.edu.au/future-applicants/admission-criteria/year-12-qualifications

For other non-Australian secondary education (high school) qualifications, the University will assess whether you have achieved an equivalent standard through your high school studies. If you need to meet English proficiency requirements through a test! such as IELTS, you will complete those requirements separately.
** Sciences Po and University of Sydney dual degrees
- B Arts (Dual Degree, Sciences Po, France)
- B Economics (Dual Degree, Sciences Po, France)

Applicants will need to meet the minimum admission requirements for their degree of choice at the University of Sydney, including English language requirements. The higher of the English language requirements of the two partner institutions will apply.

The Sciences Po degree requires a total of four years of full-time study to be eligible for two separate awards from Sciences Po and the University of Sydney. During years 1-2, students will enrol at Sciences Po, France, and pay the applicable fee direct to Sciences Po. During years 3-4, students enrol in the applicable Sydney degree (international students enrol in the applicable CRICOS-registered Sydney degree), with eligible transfer credits for studies undertaken at Sciences Po. Students will pay the applicable Sydney fee in years 3-4 to the University of Sydney.

Student visa holders who commence this course may face additional costs associated with their student visa. For visa information, visit www.homeaffairs.gov.au

Explanation of qualification admission scores
These relate to the ‘2024 guide to admission criteria for international students’ table on pages 58-65.

English language test scores
All English test scores need to be no more than two years old at the date of course commencement. For a full list of English language tests accepted by the University, visit www.sydney.edu.au/study/english-reqs

English – IELTS Academic: The first score is the overall score; the score listed within brackets is the minimum score required in each section (L for Listening, R for Reading, S for Speaking, W for Writing).

English – TOEFL iBT (internet-based TOEFL): The first score is the total score required. The first score within brackets is the minimum score for each section – Listening, Reading and Speaking. The second score is the minimum score for Writing. Where specific section scores are required, L is for Listening, R for Reading, S for Speaking, and W for Writing.

International ATAR
The Australian Tertiary Admissions Rank (ATAR) is a measure of a student’s overall academic achievement relative to other students undertaking an Australian state or territory Year 12 qualification. The figures shown in the ‘International ATAR’ column apply to international applicants.

IB Diploma
Entry is based on the total score for the completed International Baccalaureate (IB) Diploma.

GCE A Levels
(Appplies to UK General Certificate of Education Advanced Level examination and select comparable qualifications.) The first score listed is the requirement for three subjects, the second score is for four subjects. If there are more than four subjects, the best four will be used to calculate the aggregate. The aggregate is calculated from the A2 subjects based on A+=6, A=5, B=4, C=3, D=2, E=1. Advanced Subsidiary (AS) subjects are not used in calculating the aggregate. At most, one Applied A level subject may be included in the aggregate.

Canada

British Columbia: Certificate of Graduation (Dogwood diploma). Grade average from all grade 12 subjects except Graduation Transition based on: A=4, B=3, C+=2.5, C=2, C-=1, F=0. Also applies to Adult Secondary School graduation diplomas, comparable qualifications in the Yukon territory and the Diplome de fin d’études.

Nova Scotia: Nova Scotia High School Completion Certificate average of five Grade XII academic courses.

China
Gaokao: Gaokao requirement is listed as a percentage for each course. Calculate the score required as a percentage of the maximum score for your province. The maximum score is 750 in most provinces, with exceptions including Shanghai (660) and Hainan (940). For example, for Beijing, 70% = 525 out of a maximum score of 750. Gaokao scores have changed for 2024. The scores published in this guide apply if you provide your Gaokao results after 1 September 2023. For more information on how these scores will apply, visit www.sydney.edu.au/courses
France
French Baccalauréat: French Baccalauréat score for the following (including French territories and departments):

- Baccalauréat General
- Baccalauréat de l’Enseignement du Second Degre
- Diplôme de Bachelier de l’Enseignement du Second Degre
- Option Internationale du Baccalauréat (OIB) – International option of the French Baccalauréat

Germany
Abitur: Average grade or ‘Durchschnittsnote’ required for the following qualifications:

- Zeugnis der Allgemeinen Hochschulreife
- Abiturientenzeugnis
- Zeugnis der Reife
- Reifezeugnis

Hong Kong
HKDSE: Hong Kong Diploma of Secondary Education (HKDSE) aggregate based on the best five subjects, including any combination of compulsory and Category A and C electives, but excluding Category B (Applied Learning) subjects. The aggregate score is worked out based on 5**, 5*=6, 5=5, 4=4, 3=3, 2=2 and 1=1. For Category C electives, A=2.5, B=2.0, C=1.5, D=1.0, E=0.

India
CBSE: All India Senior School Certificate awarded by the Central Board of Secondary Education (CBSE). Total of the best four externally examined subjects, where A1=5, A2=4.5, B1=3.5, B2=3, C1=2, C2=1.5, D1=1, D2=0.5.

Indian School Certificate: Indian School Certificate awarded by the Council for Indian School Certificate Examinations (CISCE). The required score is the average of the best four subjects, including English. Indian School Certificate scores are changing for 2024. The scores published in this guide apply if you provide your Indian School Certificate results after 1 September 2023. For more information on how these scores will apply, visit sydney.edu.au/courses

Indian HSSC: Average of the best five academic subjects in the Higher Secondary School Certificate (HSSC) in the states of Andhra Pradesh, Gujarat, Karnataka, Maharashtra, Tamil Nadu and West Bengal. The requirement is higher for other states.

Israel
Teudat Bagrut: Average weighted mark of the Ministry-examined subjects appearing on the certificate: for each subject multiply the result by its unit value and sum the products. Divide this total sum by the total number of units for Ministry-examined subjects. School-based subjects on the certificate are not included.

Kenya
Kenyan Certificate of Secondary Education: Aggregate based on maximum seven subjects, where A=12, A-=11, B+=10, B= 9, B-=8, C+=7, C=6, C-=5, D+=4, D=3, D-=2, E=1.

Malaysia
UEC: Unified Examination Certificate (UEC) grade average (A1, A2 or B3) based on the best five subjects* (excluding vocational subjects), taking the numerical value of the grades, for example, A1=1, A2=2, B3=3, B4=4 and so on, where a sum of 5=A1 average, 6-10=A2 average, and 11-15=B3 average.

*Dentistry and medicine double degrees require nine A1 subjects.

Norway

Singapore
Singapore A Levels: Applicants must present at least three H2 subjects and the aggregate can be raised as follows:

- 4 x H2, or
- 3 x H2 + H3*, or
- 3 x H2 + Knowledge and Inquiry (KI at H2 level), or
- 3 x H2 + General Paper (GP at H1 level) + content-based subject (at H1 level)

The aggregate is calculated as follows:

- H2 subjects based on A=120, B=100, C=80, D=60, E=40
- H3 subjects are ranked the same as H2, based on Distinction = 120, Merit = 100, Pass = 80
- H1 subjects based on A=60, B=50, C=40, D=30, E=20
- Project Work and Mother Tongue are not included.
- Aggregate is calculated from H2 subjects taken in the same sitting.
- Applicants must present either GP or KI, even if the result may not count toward their aggregate.

*H3 subject can only be included if it is not the same unit taken at H2 level.
South Africa

**South African National Senior Certificate:** Average of the best four subjects (with the highest percentage results), excluding Life Orientation.

South Korea (Republic of Korea)

**South Korea CSAT:** Aggregate calculated from four standard scores in Korean Language, Mathematics and the best two subjects from Social Studies or Science area. The Korean Senior High School Diploma is not assessable.

Sri Lanka

**Sri Lanka A Levels:** GCE Advanced Level examination aggregate of the best three Advanced Level subjects based on A=4, B=3, C=2, S=1, F=0. A fourth subject grade may be added if three A grades are achieved.

Sweden

**Slutbetyg:** Swedish Upper Secondary School Leaving Certificate (from a Gymnasieskolan). From 2014, the entry requirement is the average of grades based on A=20, B=17.5, C=15, D=12.5, E=10, F=0. Different requirements apply prior to 2014.

United States (in or outside the US)

**ACT***: American College Test (ACT) composite score. Evidence of graduation from a secondary education qualification is also required. ACT scores required can be lower for applicants presenting Advanced Placement tests (APs) with a score of 4 or better. ACT scores are changing for 2024. The scores published in this guide apply if you provide your ACT results after 1 September 2023. For more information on how these scores will apply, visit [− sydney.edu.au/courses](− sydney.edu.au/courses)

**SAT***: Scholastic Aptitude Test (SAT) composite score out of 1600 for tests taken from 2016. Evidence of graduation from a secondary education qualification is also required. SAT scores required can be lower for applicants presenting AdvancedPlacement tests (APs) with a score of 3 or better.

*Note: The SAT and ACT do not meet the University of Sydney’s mathematics course prerequisite for applicants who are required to meet this requirement. For information on the mathematics prerequisite, visit [− sydney.edu.au/study/maths](− sydney.edu.au/study/maths)

**USFP GPA/USFP English**

In the admission criteria table, the University of Sydney Foundation program (USFP) score or GPA is the first listed score, and the second letter grade listed after the forward slash is the English grade required. This score can serve as a guide to admission to other Australian university foundation programs. However, depending on the foundation program, the requirements may vary from course to course. Some foundation programs are expressed as a percentage. In this table, an 8 is equal to 80 percent, 9.5 is 95 percent and so on. Separate English requirements will apply for other foundation programs.

† For Nursing pre-registration degrees, the USFP English test result will not meet the English requirements set by the Nursing and Midwifery Accreditation Council (ANMAC). USFP students will be required to meet the IELTS requirement of an overall 7.0 with no band below 7.0. For more information, visit [− sydney.edu.au/courses](− sydney.edu.au/courses)

USFP package offers are not available with Sciences Po Dual Degrees due to the structure of these degrees, which require the first two years to be undertaken in France, and the resulting implications on a student visa.

Vietnam

**Vietnamese High School Graduation Certificate:** (Bằng tốt nghiệp THPT) Year 12 GPA from an approved Gifted High School.
How to **apply**

TO OUR UNDERGRADUATE COURSES

### CHOOSE YOUR COURSE

At the University of Sydney, you have the flexibility to combine study areas from more than 450+ options across nine disciplines, to create the degree that’s right for you. Explore your options at

- sydney.edu.au/courses

### CHECK THE ADMISSION CRITERIA FOR THE COURSE

Admission to the University of Sydney is competitive, and is based on meeting admission criteria specific to the course you wish to enter. The following is some general information about our admission requirements. To check the specific admission criteria for your chosen course, search for the individual course page at

- sydney.edu.au/courses

#### Inherent requirements

Some courses in areas such as education, health, medicine and veterinary medicine have inherent requirements that you need to be able to meet to successfully complete that course, such as the ability to carry out essential activities involving children, patients or animals, as relevant. (Reasonable adjustments will be made for disability, cultural and religious factors.) While these are not admission requirements, you need to consider them when making your course selection. Learn more at

- sydney.edu.au/students/inherent-requirements

#### Academic requirements

Admission to most of our undergraduate courses is based on one of the following:

- your results in a recognised secondary education (high school) qualification (for a full list of accepted qualifications, see sydney.edu.au/study/secondary-qualifications)
- your academic average in previous higher education studies that include at least one year of full-time study in a bachelor’s degree or, for some courses, a recognised diploma
- your academic performance in an approved university preparation program (or enabling course), such as one of the University of Sydney Preparation Programs (see page 15).

#### Prerequisites

Some courses have specific prerequisites that you need to meet before you can receive an offer of admission.

#### Mathematics prerequisites

Mathematics prerequisites apply to some of our courses. This requirement is equivalent to a band 4 in the NSW HSC subject Mathematics Advanced. For more information about our mathematics prerequisites, including equivalent subjects for other Year 12 qualifications, visit

- sydney.edu.au/study/maths

#### NESA prerequisites for education degrees

Applicants for certain education degrees, including music education, must meet the requirements set by the New South Wales Education Standards Authority (NESA). For more information, see page 41.

#### Additional admission criteria

Some courses, including some medicine, dentistry, education, music, visual arts and veterinary medicine courses and Sciences Po dual degrees, have additional admission criteria, such as an audition, interview, portfolio or personal statement.

#### Assumed knowledge

Some courses expect you to have a certain level of existing knowledge through your high school or other studies in relevant areas such as mathematics, physics, biology or chemistry.

The subjects we list under ‘Assumed knowledge’ are NSW HSC subjects, but equivalent subjects in other recognised high school qualifications will also meet the expected standard.

---

### Helpful link

All course prerequisites, assumed knowledge and recommended studies are listed under the relevant course at:

- sydney.edu.au/courses
As an international student, you should apply as early as possible to allow time for visa and travel arrangements.

Apply directly to the University of Sydney
Most international students apply directly to the University through sydney.edu.au/courses
Application deadlines vary by course. Check the relevant course page for specific closing dates for your chosen course.

A $150 (AUD) application processing fee applies.

For personalised application advice:
− contact one of our regional experts listed at sydney.edu.au/study/regional-contacts, or
− apply through one of the University of Sydney’s authorised agents (representatives) listed at sydney.edu.au/study/overseas-agents

Apply through UAC
You should apply through the Universities Admissions Centre (UAC) if you are currently studying:
− an Australian Year 12 qualification either in or outside Australia; or
− an International Baccalaureate (IB) diploma in Australia.

A UAC application fee applies. For details, visit www.uac.edu.au
If you are applying with the New Zealand National Certificate of Educational Achievement (NCEA Level 3), you have the option of applying either directly to the University or through UAC.

Sciences Po dual degrees
For these degrees, you need to apply directly to the University of Sydney, even if you are applying through UAC for your other preferences.

For more information, visit

If you have not studied the ‘Assumed knowledge’ subjects for your course in high school, we recommend that you undertake appropriate bridging courses before you begin your course. For details, visit
− sydney.edu.au/ug-bridging

English language requirements
Depending on your country of origin and educational background, you may need to provide evidence of your English proficiency to be able to study with us. Learn more at
− sydney.edu.au/study/english-reqs

Courses with external registration or accreditation may have additional English language requirements set by the registration or accreditation body.

WHAT HAPPENS NEXT?

4 You will receive a response
− either an unconditional offer if your application is successful, or a conditional offer if you are required to satisfy additional admission criteria.

5 Accept your unconditional offer (instructions will be included with the offer).

6 Pay the required fees (instructions will be included with the offer) − your first semester of course tuition fee plus your Overseas Student Health Cover (OSHC) fee − and receive an electronic Confirmation of Enrolment (eCoE), which you will need for your visa application.

7 Apply for your student visa and make the necessary travel arrangements.

8 Enrol online in your course (includes selecting your subjects – instructions will be included with the offer).

9 Arrive in time for orientation, welcome activities and course commencement.

For more information about the application process, visit sydney.edu.au/study/how-to-apply/international-students.html
An international student is anyone who does not hold Australian or New Zealand citizenship (or dual citizenship), Australian permanent residency, or an Australian permanent humanitarian visa.

If you are a dual citizen who holds Australian or New Zealand citizenship as well as citizenship of another country, you are not an international student and you will be assessed for admission as an Australian domestic student.

**Student visas**

As an international student studying in Australia, you must hold a valid Australian visa for the duration of your study. It is important that you are familiar with all the conditions of your visa, especially if you are considering making any changes to your university enrolment.

As a student visa holder, you must also be aware of the Education Services for Overseas Students (ESOS) framework, established by the Australian Government to ensure that universities deliver quality education and a high level of care to international students. Learn more at

- sydney.edu.au/student-visas

**Students younger than 18 years of age**

If you will be younger than 18 years of age when you start your course, you need to provide evidence to the Australian Department of Home Affairs that you have appropriate accommodation and welfare arrangements in place in Australia.

If you will not be accompanied by a parent, legal custodian or approved nominated relative and would like the University to make the appropriate arrangements for you, visit

- sydney.edu.au/under-18-student-visas

**Recognition of prior learning**

Recognition of prior learning (RPL) is when your previous studies are recognised and counted towards your current course completion requirements. If your previous studies are recognised as being equivalent or comparable to some of the content of your chosen course at the University of Sydney, you may be offered credit towards the completion of your course. This can reduce the overall number of credit points required to complete your course, and may also reduce your course duration.

RPL is often assessed on a case-by-case basis, but some faculties and some courses have existing international articulation pathways (see below) for some qualifications.

If you apply for admission directly to the University, you will be asked as part of the application process whether you wish to apply for RPL. If you tick ‘Yes’, you will receive an email with information about how to log in to the Sydney Student portal and submit an application for RPL. If your application is successful, you will receive an updated offer showing RPL credit offered. You may either accept or decline this RPL credit once you accept your offer to study with us.

For faculties and courses with existing international articulation pathways (see below), you will be awarded RPL credit without having to submit a separate application.

For more information about RPL, visit

- sydney.edu.au/study/rpl

**International articulation pathways**

The University of Sydney has a range of formal international articulation pathway arrangements with selected overseas universities, polytechnics and colleges. These arrangements can help to fast-track your studies by providing you with RPL credit towards your Sydney degree. For details, visit

- sydney.edu.au/study/international-articulation

**Mandatory work requirements**

Some courses have a mandatory work component that must be completed as part of the course. For courses with this requirement, this work will not count towards your student visa work limits.
 Fees and costs  
FOR UNDERGRADUATE COURSES

Tuition fees  
Tuition fees vary depending on the course and the year in which you study. See the course tables on pages 58–65 for indicative tuition fees for study beginning in 2024.

All tuition fees listed in this guide are:
− listed in Australian dollars (AUD)
− based on a full-time enrolment load of 48 credit points per year, or a 1.0 Equivalent Full-Time Student Load (1.0 EFTSL), unless otherwise indicated; if your study load is greater or less than this, your tuition fees will vary accordingly
− exclusive of the costs of textbooks and other required course materials, additional course costs, health insurance, and living expenses such as food and accommodation
− exclusive of the Student Services and Amenities Fee (SSAF), which was introduced by the Australian Government to fund university services and support programs.

Estimating your total tuition fees  
For courses that are longer than one year, we are unable to provide you with a precise indication of tuition fees beyond your 2024 tuition fees. Tuition fees increase annually (effective at the start of each calendar year), and our website is updated accordingly. For the most up-to-date tuition fees, search for your course at sydney.edu.au/courses

Combined degrees  
For most combined degrees (e.g. Bachelor of Arts and Bachelor of Laws), a single course tuition fee (subject to annual review) applies to the entire period of your studies, regardless of the units of study that you select in each of the two qualifications. The exception to this is the combined Bachelor of Veterinary Biology and Doctor of Veterinary Medicine degree (see below).

Bachelor of Veterinary Biology and Doctor of Veterinary Medicine  
The course tuition fees for this combined degree are calculated differently from those of other combined degrees. This combined degree has two separate course tuition fee rates: one rate for Years 1 and 2 when you are studying the Bachelor of Veterinary Biology, and a higher rate for Years 3 to 6 when you have progressed to the Doctor of Veterinary Medicine. Both course tuition fees are subject to annual increases.

Double degrees comprising an undergraduate plus a postgraduate degree  
For double degrees comprising an undergraduate degree plus a postgraduate degree, students usually complete the undergraduate-level degree first, before they progress to the postgraduate-level degree. These double degrees have two separate course tuition fee rates, with a higher rate applying to the postgraduate degree. The two separate course tuition fee rates are listed in the tables on pages 58–65. It is important to note both rates when calculating the likely total course cost.

Other costs  
As well as course tuition fees, you should budget for:
− additional course costs, which may be substantial and may include (but may not be limited to) the costs of course-specific materials and textbooks, tools and protective clothing (see sydney.edu.au/additional-course-costs)
− the annual Student Services and Amenities Fee (SSAF), which is up to $326 in 2023 and is indexed annually for the duration of your course (see sydney.edu.au/ssaf)
− Overseas Student Health Cover (OSHC), an Australian Government requirement for student visa holders for the full duration of their student visa (see sydney.edu.au/study/oshc)
− living expenses, including accommodation, transport, food and other expenses (see sydney.edu.au/study/living-costs).

Annual fee reviews  
All course tuition fees and the Student Services and Amenities Fee (SSAF) are subject to annual review (and indexation, when required) and will increase for each year of your study, effective at the start of each calendar year.

Payment methods  
When you receive an offer to study with us, you will be required to make an initial payment equal to your first semester of course tuition fees plus your Overseas Student Health Cover (OSHC) fee, in order to formally secure your place and apply for a student visa. Instructions on how to pay these will be included with the offer.

There are several ways you can pay your fees, including by credit card, bank transfer, BPAY (Australian accounts only), Paypal or one of our online payment gateway providers (Convera, HSBC, Flywire and CIBC). A surcharge of between 0.3% and 2.8% will apply (subject to review and change), depending on the card type used.

For more information about payment methods and surcharges, as well as refund procedures and policies, visit sydney.edu.au/study/paying-your-fees
“The University of Sydney offered a great opportunity for me to conduct impactful research with renowned professors in world-class facilities.”

Chien-Jung (Will) Chen
Doctor of Philosophy (Science)
Home country: Australia
Why study postgraduate at Sydney?

**450+** courses across 9 areas of study

**1st** in Australia and 4th in the world for graduate employability*

**150+** research centres and networks

Study and network with your peers, who are the future leaders of this world

Learn from leading lecturers, researchers and industry partners from Australia and around the globe

World-class facilities with cutting-edge technology

PhD students can apply for travel grants to facilitate research activities with our international partners in Asia, Europe, the UK and North America

* QS Graduate Employability Rankings 2022
Postgraduate coursework degrees

Advance your career, pursue your passion and gain a higher qualification with a postgraduate coursework degree.

Master’s degrees by coursework allow you to develop specialised knowledge so you can take the next step in your career, embark on a new one, gain professional qualifications or develop academic expertise in your chosen field.

Graduate diplomas (usually 12 months full time, but in some cases available as six months full time) and graduate certificates (usually six months full time) are shorter coursework programs that are usually based on the associated master’s degree and offer a subset of the master’s degree units. They offer a shorter qualification or a pathway into the relevant master’s degree, or allow you to get a taste of your chosen subject area before committing to a master’s degree.

− sydney.edu.au/pg

Postgraduate research degrees

Whether you’re an aspiring academic or want to explore a topic you are passionate about, a research degree at the University of Sydney will enable you to make a difference.

The Doctor of Philosophy (PhD) is our premier research degree, and the highest qualification you can attain in Australia. It comprises independent research and writing on an approved topic towards a thesis for examination.

The Master of Philosophy (MPhil) is awarded based on submission of a thesis that makes a substantial contribution to the knowledge of the subject concerned. This degree can also provide a pathway to further study at PhD level.

All of our research is driven by the big picture. We provide a hub for industry, government and community groups to connect and collaborate with our researchers and students.

− sydney.edu.au/research

For details of available research degrees in your field, visit
− sydney.edu.au/study/pg-research

We are home to more than 100 world-renowned multidisciplinary research and teaching centres and institutes, which tackle some of the world’s most pressing issues. These include the Marie Bashir Institute for Infectious Diseases and Biosecurity, the University of Sydney Nano Institute, the Charles Perkins Centre, and the Brain and Mind Centre.

Our interdisciplinary approach unites experts in diverse and complementary fields. You’ll work alongside some of the world’s brightest and most accomplished academics, and have access to our unique international partnerships with institutions including Stanford, UCLA, the University of Edinburgh and Utrecht University.

To learn more about our research and its impact, visit
− sydney.edu.au/research

As a creative writing practitioner balancing passion and practicality, I have truly benefitted from how the University of Sydney postgraduate program opened doors to a diverse spectrum of both academic and professional opportunities. Moreover, the level of mentoring I have experienced is world-class and truly rewarding.”

</table>

This degree focuses on the study and cultural context of internet platforms, social media, digital audiences, mobile media, online governance, games and more. Graduates work as creatives, journalists, educators, strategists, policymakers and more across a wide range of industries.

This degree focuses on critical reading, literary history and literary comparison to provide advanced studies in English literature. It is relevant to those working as or aspiring to become secondary school teachers, journalists, writers or literary critics.

This degree, suited to both current professionals and recent graduates, provides skills in contemporary filmmaking and interactive media. The degree’s flexibility means it can be tailored to suit a wide range of career paths across research and professional practice.

This degree equips you with an understanding of the world’s most pressing challenges, such as war, social and economic justice, poverty, development and sustainability, and how relations among states and non-state actors influence these challenges. Graduates work in roles across consulting, diplomacy, development, government, international business and journalism.

This degree develops your understanding of traditional and emerging security challenges, applied to real-world situations and evolving policy debates, leading to careers in government, diplomacy, consulting, journalism and more.

This degree focuses on media content production, including print, broadcast and online media in a global context, underpinned by theory, to prepare you for a career in the media.

This degree provides a contextual and practical understanding of core historical and theoretical developments in museum and heritage studies, preparing you for professional work in the sector.

This degree develops an understanding of public relations theory and practice consistent with an evolving industry and media landscape, in preparation for a career as a public relations adviser, media and communications officer, public affairs consultant, digital communication strategist and more.

The Master of Social Justice equips students to address some of the globe’s most challenging social, political, and environmental issues. It does this through vibrant coursework, deeply committed teachers, and a grounding in three critical approaches to social justice: development, peace and conflict, and human rights.

The Master of Social Justice equips students to address some of the globe’s most challenging social, political, and environmental issues. It does this through vibrant coursework, deeply committed teachers, and a grounding in three critical approaches to social justice: development, peace and conflict, and human rights.
Business

Master of Business Administration (Leadership and Enterprise) 095861B 7.0 (6.0) Jul 1.5 55000
Our full-time MBA (Leadership and Enterprise) encompasses workshops with industry leaders, intensive group work and tackling real-world issues with a diverse cohort. Graduates have the skills and knowledge to build and lead future enterprises in a digital, hyperconnected world, from tech start-ups to major corporations.

Master of Commerce 019181A 7.0 (6.0) Feb/Jul 1.5 56500
The Master of Commerce offers eight future-focused specialisations with practical experiential projects. It creates adaptable, responsible business mindsets in our graduates, preparing them for resilient leadership in volatile times. This 1.5 year program is most suitable for those with a business or cognate first degree/qualification. Specialisations for this degree include accounting, business information systems, data analytics for business, economics, finance, global logistics, marketing, and strategy, innovation and management.

Master of Commerce (Extension) 077328F 7.0 (6.0) Feb/Jul 2 56500
The Master of Commerce (Extension) offers eight future-focused specialisations with practical experiential projects. It creates adaptable, responsible business mindsets in our graduates, preparing them for resilient leadership in volatile times. This two-year program allows the selection of up to two specialisations and for optional Research and Exchange semesters. Specialisations for this degree include accounting, business information systems, data analytics for business, economics, finance, global logistics, marketing, and strategy, innovation and management.

Master of Human Resource Management and Industrial Relations 061140E 7.0 (6.0) Feb/Jul 1.5 56500
Accredited by the Australian Human Resource Institute (AHRI), this degree will equip you with a sound understanding of key employment issues and the rapid changes reshaping local and international work practices and policies.

Master of International Business 074087J 7.0 (6.0) Feb/Jul 1.15 56500
This degree will give you the skills to devise and implement strategic decisions that facilitate sustainable, global corporate growth. Career pathways for graduates include roles in trade, consultancy, government and strategy.

Master of Logistics and Supply Chain Management 088747G 7.0 (6.0) Feb/Jul 1.5 56500
This course is taught at the University’s Institute of Transport and Logistics Studies, recognised by the Australian Government as a key centre of excellence in transport and logistics. This degree covers the key analytical and communication skills needed to succeed in Logistics and Supply Chain Management. Our graduates play a key role in building resilient, sustainable and effective logistics and supply chains.

Master of Management 063099G 7.0 (6.0) Feb/Jul 1.15 49500
Ranked number one in Australia by The Financial Times and QS, our Master of Management will dramatically increase your employment prospects. Specifically designed for recent graduates and early career changers from any area of study, this program develops strong business foundations along with essential soft skills.

Master of Management (CEMS) 063100G 7.0 (6.0) Feb/Jul 1.5 53000
The University of Sydney is the only university in Australia to offer the CEMS Master in International Management program as part of this degree. Students must be fluent in a second language, and will graduate as highly skilled, in-demand international business and management professionals.

Master of Professional Accounting and Business Performance 107966A 7.0 (6.0) Feb/Jul 2 56500
This degree will develop your technical expertise alongside the key analytics, technology and communication skills needed to lead in accounting practice management and beyond. This program meets the requirements for professional accounting accreditation with CPA Australia, Chartered Accountants Australia and New Zealand (CAANZ) and Association of Chartered Certified Accountants (ACCA).

Economics

Master of Economic Analysis 079202D 7.0 (6.5) Feb/Jul 1.5 56500
For students with an existing strong background in economics, this degree provides advanced training in economic theory and econometrics. The degree is focused on the skills required to be a professional economist or economic analyst in the public and private sectors.

Master of Economics 083950M 7.0 (6.0) Feb/Jul 2 56500
This degree provides the training and knowledge required for a wide range of careers in economics. Focusing on advanced economics and data analysis, the degree is relevant to both new graduates and professionals seeking further development.

**Tuition fees are subject to annual increases. For further information, see page 103.**
Education and social work

Graduate Certificate in Human and Community Services 068550G 6.5 (6.0) Jul 0.5 24750
Understand and appreciate the latest developments in policy and its application, practice and research in this vital and growing sector. Strengthen your professional knowledge and specialise in your preferred sector, including community work policy and practice, mental health practice standards, and policy responses to domestic violence in Australia.

Master of Education 000674B 6.5 (6.0) Feb/Jul 1 49500
This degree is designed to develop and support the careers of trained teachers who are teaching professionals, educational administrators, researchers and policymakers. It offers advanced learning and development opportunities across a range of specialisations.

Master of Education (Educational Management and Leadership) 000674B 6.5 (6.0) Feb/Jul 1 49500
This degree examines concepts in educational administration and management, from theories and models of organisational behaviour to understanding change processes and their effects on organisations. You’ll research a range of human resources development and management issues and their relationship to other developments in education, the economy and society.

Master of Education (Educational Psychology) 000674B 6.5 (6.0) Feb/Jul 1 49500
If you aspire to develop a deep understanding of learning, motivation, child and adolescent development (including brain development), thinking skills and individual differences, to apply to your career in the many diverse fields of education practice and policy, then this degree is for you.

Master of Education (Special and Inclusive Education) 000674B 6.5 (6.0) Feb/Jul 1 49500
This degree will develop the specialised skills and knowledge to teach children with special education needs, and for leadership, consultancy and resources roles in special and inclusive education.

Master of Education (Sports Coaching) 000674B 6.5 (6.0) Feb/Jul 1 49500
This degree will equip you with knowledge to develop and implement effective learning experiences in the field of sports coaching, examine the technological resources available to support the implementation of specific strategies in coaching athletes and teams, and develop an integrated model with the right mix of training activities, coaching pedagogy and sports science to optimise athletic performance.

Master of Education (TESOL) 000674B 6.5 (6.0) Feb/Jul 1 49500
This degree will develop your professional expertise and knowledge in the areas of applied linguistics and English language education whether you are, or are aspiring to become, an English language teacher of children, adolescents or adults. (Note: this degree does not in itself lead to a professional teaching qualification.)

Master of Social Work (Qualifying) 072217J 7.5 (7.0) Feb 2 49500
Become an accredited social worker by completing this degree. You’ll advance your career and be ready for social work roles in health and community services. This degree equips you to take on leadership roles in social work, the health and community services sector and related fields of practice.

Master of Teaching (Early Childhood) 020155D 7.5 (7.0 R/W; 8.0 L/S) Feb 2 49500
This degree enables you to qualify to teach children from birth to five years. You will develop the knowledge and skills to become an outstanding early childhood teacher, professional decision-maker, ethical leader, and theoretical and practical thinker. This degree is listed under the Australian Children’s Education and Care Quality Authority (ACECQA) approved qualification list.

Master of Teaching (Primary) 020155D 7.5 (7.0 R/W; 8.0 L/S) Feb 2 49500
This degree prepares you to teach all primary school subjects from kindergarten to Year 6 (K–6). As well as learning about the policy frameworks that shape teaching in NSW, Australia and internationally, you will learn about issues in teaching, learning and curriculum in all school years, from kindergarten to the Higher School Certificate. This degree is a graduate-entry professional teaching qualification to become an accredited teacher in NSW and other Australian jurisdictions.

Master of Teaching (Secondary) 020155D 7.5 (7.0 R/W; 8.0 L/S) Feb 2 49500
You’ll specialise in either one or two teaching areas at secondary education level, depending on your areas of interest. If your ambition is to teach science, mathematics, music or languages, you can study one of these as a ‘double method’ teaching area, and you won’t need to study a second area. Alternatively, you can choose to study two ‘single method’ teaching areas, potentially broadening your future employment options. This degree is a graduate-entry professional teaching qualification to become an accredited teacher in NSW and other Australian jurisdictions.

* The tuition fee listed for this course is for 24 credit points (0.5 EFTSL) required to complete the course.
Jan = January (Semester 1 – early start), Feb = February (Semester 1), Jul = July (Semester 2)

**Engineering and computer science**

**Master of Complex Systems**
102408E 7.0 (6.0) Feb/Jul 1.5 53000
This degree equips you with the expertise to design and manage complex systems made up of numerous diverse, interacting and interdependent parts. You’ll graduate with the skills to model, analyse and design resilient technological, socioeconomic and socio-ecological systems, and develop strategies for crisis forecasting and management.

**Master of Computer Science**
111671D 6.5 (6.0) Feb/Jul 2 53000
The Master of Computer Science combines foundational knowledge with specialist skills and real world experience for those looking to operate as a computer scientist or enter the IT industry.

The Master of Computer Science (advanced entry) suits those looking to build on their experience and qualifications to specialise in computer science and advance their career in a future-focused field.

**Master of Cybersecurity**
108761F 6.5 (6.0) Feb/Jul 1.5 53000
This degree is designed to equip you with knowledge and skillsets in the cybersecurity field, covering both technical topics as well as management and political/social aspects of cybersecurity.

**Master of Data Science**
108764C 6.5 (6.0) Feb/Jul 1.5 53000
This professional degree develops the necessary analytical and technical skills for graduates to use data science to guide strategic decisions and understand customer behaviour, market intelligence and operational performance.

**Master of Digital Health and Data Science**
106003E 6.5 (6.0) Feb/Jul 1 53000
The Master of Digital Health and Data Science will equip you to deliver data-driven solutions to meet complex health challenges in leadership roles in various medical and health professions.

**Master of Engineering**
077463K 6.5 (6.0) Feb/Jul 1.5 53000
The Master of Engineering is tailored for qualified engineers seeking to move into management roles, or to develop specialised technical knowledge in a particular area. See the specialisations below for more information.

**Master of Engineering (Automation and Manufacturing Systems)**
Learn the engineering principles to understand, modify and control the manufacture, delivery and maintenance of technology components in automation and manufacturing systems.

**Master of Engineering (Biomedical Engineering)**
Become familiar with the technology used to monitor physiological functions and assist in the diagnosis and treatment of patients.

**Master of Engineering (Chemical and Biomolecular Engineering)**
Become equipped with specialised technical knowledge in chemical and biomolecular engineering and learn to understand the design and management of industrial processes guided by economic, environmental and societal considerations.

**Master of Engineering (Civil Engineering)**
Develop specialised skills for planning, designing and testing structures within the built environment including dams, bridges, pipelines, roads, towers and buildings.

**Master of Engineering (Electrical Engineering)**
Acquire technical knowledge in electrical engineering to design and build systems that generate, transmit, measure, control and use electrical energy.

**Master of Engineering (Fluids Engineering)**
Develop specialised technical knowledge in fluids engineering and understand fluid mechanics and engineering systems associated with the fluid environment.

**Master of Engineering (Geomechanical Engineering)**
Obtain the necessary skills to examine soil and rock layers and determine their physical and chemical properties to design foundations and earthworks structures.

**Master of Engineering (Intelligent Information Engineering)**
Learn about the generation, communication and processing of intelligent information engineering, technologies and its applications as it relates to the fields of telecommunications, electrical, computer and software engineering.

*Tuition fees are subject to annual increases. For further information, see page 103.*
Master of Engineering (Mechanical Engineering)
Gain an advanced understanding of the design of mechanical components, whole machines, mechanical systems and mechanical processes.

Master of Engineering (Power Engineering)
Develop advanced skills to plan, design, construct, operate and maintain power systems and equipment.

Master of Engineering (Software)
Gain specialised technical knowledge covering all aspects of software production from strategy and design to coding, quality and management.

Master of Engineering (Structural Engineering)
Understand how structures and buildings resist and transfer natural and other forces to the ground.

Master of Engineering (Sustainability and Environmental Engineering)
Become familiar with concepts to develop sustainable products and processes that maximise efficiency and minimise environmental impact.

Master of Engineering (Telecommunications Engineering)
Learn the design, construction and management of systems that carry out wireless transmission and broadcasting of information.

The Master of Professional Engineering offers an accredited qualification for professionals wanting to become an engineer and practise in Australia or overseas.

The two-year accelerated degree provides a shorter path for applicants with an undergraduate engineering degree who want to obtain an Australian degree in a related field of engineering.

See the specialisations below for more information. All specialisations are available in the accelerated degree, with the exception of Sustainability and Environmental Engineering.

Master of Professional Engineering (Aerospace)
Learn about spacecraft and satellite design, aerodynamics, aircraft design analysis and smart materials.

Master of Professional Engineering (Biomedical)
Learn about biomaterials engineering, applied tissue engineering, advanced engineering materials and computational fluid dynamics.

Master of Professional Engineering (Chemical and Biomolecular)
Explore industrial processes in which material in bulk undergoes physical or chemical changes.

Master of Professional Engineering (Civil)
Learn about planning, designing and testing structures within the built environment, including dams, bridges, pipelines, roads, towers and buildings.

Master of Professional Engineering (Electrical)
Learn about designing and building systems that generate, transmit, measure, control and use electrical energy.

Master of Professional Engineering (Fluids)
Gain advanced knowledge about fluid mechanics and engineering systems associated with the fluid environment.

Master of Professional Engineering (Geomechanical)
Acquire the skills to examine soil and rock layers and determine their physical and chemical properties to design foundations and earthworks structures.

| Master of Professional Engineering (Intelligent Information Engineering)  
Master of Professional Engineering (Accelerated) (Intelligent Information Engineering) | | | | | |
| Explore the three key aspects of intelligent information – generation, communication and processing – combining the study of telecommunications, electrical, computer and software engineering with intelligent information-processing technologies and their applications. |
| Master of Professional Engineering (Mechanical)  
Master of Professional Engineering (Accelerated) (Mechanical) | | | | | |
| Gain an advanced understanding of the design of mechanical components, whole machines, mechanical systems and mechanical processes. |
| Master of Professional Engineering (Power)  
Master of Professional Engineering (Accelerated) (Power) | | | | | |
| Become equipped with the advanced skills to plan, design, construct, operate and maintain power systems and equipment. |
| Master of Professional Engineering (Software)  
Master of Professional Engineering (Accelerated) (Software) | | | | | |
| Examine all aspects of software production from strategy and design to coding, quality and management. |
| Master of Professional Engineering (Structural)  
Master of Professional Engineering (Accelerated) (Structural) | | | | | |
| Explore the design of high-rise buildings, industrial complexes, bridges, stadiums, and sporting and exhibition centres. |
| Master of Professional Engineering (Sustainability and Environmental Engineering) | | | | | |
| Acquire the skills to analyse and design solutions to pressing global issues such as global warming, decarbonising the energy economy, and ensuring sustainable food and water supplies. (Note: this specialisation is not available in the accelerated degree.) |
| Master of Professional Engineering (Telecommunications)  
Master of Professional Engineering (Accelerated) (Telecommunications) | | | | | |
| Examine the design, build and management of systems that carry out the transmission and broadcasting of information using wireless signals. |
| Master of Project Management | 082914A | 6.5 (6.0) | Feb/Jul | 1.5 | 53000 |
| This professional degree provides the advanced skills required for hands-on project management, including the fundamental methodologies, modelling and analytical techniques required for the design and implementation of projects across a wide range of industries. |
| Master of Transport | 099890J | 7.0 (6.0) | Feb/Jul | 1.5 | 56500 |
| This is Australia's first interdisciplinary degree focusing on the engineering, urban planning, and management of transport. It is tailored for professionals already in or wanting to transition into the field and provides critical understanding of the prevalence and identification of transport systems, core capabilities for analysing and designing such systems, and proficiencies in broad interdisciplinary analysis. |

*Tuition fees are subject to annual increases. For further information, see page 103.

**Doctor of Clinical Dentistry (Oral Medicine)**

This degree trains qualified dentists who wish to specialise in oral medicine. You will develop your skills in the non-surgical management of the full range of oral diseases as well as in the care of medically compromised patients, including transplant patients, in hospital and non-hospital settings. You will learn about the diagnosis and non-surgical treatment of diseases of the oral mucosa and salivary glands, facial pain, and oral manifestations of systemic diseases such as HIV. Diagnostic oral and general pathology form integral parts of the course. You will also complete a research project in the field of oral medicine and oral pathology under the supervision of an academic staff member.

**Doctor of Dental Medicine**

This degree is a graduate-entry program that qualifies you to practise as a dentist. You will build skills through practice-based learning, in a four-year degree developed to meet the changing oral health needs of the community. Experts in dental practice and research lead our program, which will equip you with the knowledge and skills to assess, manage and evaluate the oral health needs of patients and populations. Through simulated clinical learning environments and clinical placements across both the public and private sectors, you will learn to apply your knowledge and care for patients within a range of clinical settings. You will also complete a research project related to dentistry under the supervision of an academic staff member.

Doctor of Physiotherapy

The Doctor of Physiotherapy course provides an innovative and world-class program to comprehensively prepare you to work in, respond to and lead the modern healthcare system. By the end of this degree, you will be a confident, ethical, and professional practitioner who can prevent, diagnose, manage, and treat a wide range of health conditions and practice in variety of healthcare settings. You will build skills through evidence-based and practice-based learning in a three-year degree developed to meet the changing health needs of the community. This course incorporates significant clinical, research, and professional fieldwork opportunities, providing hands-on experience with real clients throughout the course.

Master of Speech Language Pathology

This degree prepares you for professional practice as a speech pathologist, developing the skills to assess and treat people of all ages, backgrounds and cultures, and change lives by making it easier for people to communicate or swallow safely. You will learn from leading experts on how to work with children and adults with such communication and speech difficulties, as well as those clients who have swallowing difficulties or need alternative ways to communicate. Case-based learning underpins this program and is complemented by comprehensive clinical placements which provide hands-on experience with real clients in supervised environments in our new purpose-built health building.

Master of Bioethics

Bioethics is concerned with ethical questions that arise within the contexts of biological and health sciences. Social concern about such issues has grown with the advancement of biomedical and reproductive health technologies, genetic engineering, cloning and stem cell research. This degree will train and equip you with new skills in bioethics and prepare you for a highly rewarding new career in or related to health.

Master of Biomedical Science (Infection and Immunity)

This degree is designed and taught by world-leading medical microbiologists and immunology researchers from across the University, including the Marie Bashir Institute for Infectious Disease and Biosecurity. You will graduate with a thorough understanding of the latest techniques, developments and breakthroughs in immunology and their application to the diagnosis and treatment of clinically relevant pathogens.

Master of Brain and Mind Sciences

This degree provides focused education and training for the next generation of science, medical, nursing, psychiatry and psychology workforce, preparing you to meet the needs of those suffering from disorders of the brain and mind. It promotes interdisciplinary research, encouraging investigation into disease in areas of the brain and mind, and draws on the strengths of the Brain and Mind Centre to assist you in your professional and clinical skills development.
This degree prepares you to work in public health in settings around the world, with a specific focus on achieving equity in health in some of the world’s most challenging and demanding conditions. You will learn to think critically and reflectively about the broad issues of public health problems, communicate with stakeholders and develop and foster partnerships to effect improved health. The program offers flexibility to develop advanced skills in methodological approaches, and opportunities to undertake a diverse range of international and national placements. Our graduates work in a range of settings in Australia and internationally including the World Health Organization, non-government agencies, bilateral aid agencies and ministries of health.

Master of Health Policy and Planning
053869G 6.5 (6.0) Feb/Jul 1 56500
This degree provides you with a comprehensive and practical understanding of health systems and policymaking processes. It offers a critical perspective on how health systems operate, how policies across a range of sectors, both public and private, influence health, and how to create health policy change. You will develop a comprehensive and practical understanding of policymaking, including systems thinking; economic evaluation; health financing and budgets; power, politics and agenda setting; and the critical use of evidence. This is an accelerated degree for people who have existing work experience, and can be completed in one year of full-time study.

Master of Medicine (Clinical Epidemiology)*
053865A 6.5 (6.0) Feb/Jul 1 56500
Master of Science in Medicine (Clinical Epidemiology)**
053863C 6.5 (6.0) Feb/Jul 1 56500
Clinical epidemiology is the science behind good clinical research and evidence-based clinical decision-making. These degrees are designed to develop both clinical researchers and practitioners by teaching the skills needed to generate high-quality clinical research and the skills to locate, appraise, interpret and apply the best research evidence to patient care. You will also develop the research skills required by many clinical training positions.

Master of Medicine (Sexual and Reproductive Health)*
107850B 7.0 (6.5) Feb/Jul 1 56500
Master of Science in Medicine (Sexual and Reproductive Health)**
107853K 7.0 (6.5) Feb/Jul 1 56500
This newly enhanced degree enables you to address the challenges of sexual and reproductive health through a wide range of subjects, with an option to choose one of four pathways: HIV and STIs; Psychosexual Therapy; Reproductive Health and Fertility; or Public Health. The interprofessional and multidisciplinary structure of the degree encourages you to develop effective collaborative approaches to employment in a variety of healthcare settings.

Master of Public Health
097037G 6.5 (6.0) Feb/Jul 1.5 56500
This newly enhanced degree focuses on the prevention of illness and the promotion of health. Its underlying philosophy is that the application of critical thinking combined with skills in research, advocacy, public policy and community engagement provide the best foundation for improving the health of the population. You’ll develop the essential knowledge and methodological and practical skills required of practitioners in the practice of modern population health. After completing the comprehensive core units, you’ll select from a wide variety of elective options from within the School of Public Health and across the University. Alternatively, you may decide to focus on a specialisation in Chronic Disease Prevention, Communicable Disease Control, Health Promotion and Advocacy, or Research Methods.

**Tuition fees are subject to annual increases. For further information, see page 103.
Course name | CRICOS | English – IELTS Academic | Commencing semester(s) | Duration (years) | 2024 indicative Year 1 tuition fee ($A)/1.0 EFTSL
---|---|---|---|---|---
Master of Intensive Care Nursing | 068709A | 7.0 (7.0) | Feb | 1.5 | 47000

This degree is for nurses currently working in the intensive care environment to develop the expertise and skills to provide high-quality patient care and become clinical leaders. As an intensive care nursing student, you will learn to work across complex environments that often demand rapid, sophisticated and challenging decisions as you help patients and their families understand their illness and deliver high-quality care. You will build upon your individual clinical experience and learn to provide sophisticated care and advice to critically ill patients and their families. This requires application of advanced physiological knowledge during the assessment and management of patients who may be experiencing single or multiple organ dysfunctions. Upon graduation, you will have the specialist knowledge and skills to provide comprehensive care to patients and their families in intensive care, with opportunities to further work across nursing education, administration, research and consulting.

Master of Nursing | 068773D | 7.0 (7.0) | Feb | 2 | 47000

This degree builds on your previous undergraduate education, preparing you for work in local, national and international healthcare settings. You will gain a comprehensive understanding of how to work with other health professionals to provide the highest-quality person-centred care. You will learn from leading experts through hands-on learning in our new purpose-built health building as you develop a strong theoretical understanding of health and illness, and how care is provided and experienced. You will complete extensive clinical placements in varied settings. Beyond clinical care, you will also study human biology, pharmacology, research and evidence-based practice, social contexts of health and illness, illness experiences, healthcare systems, leadership in healthcare and other professional topics, including legal and ethical issues in health care.

Nutrition and Dietetics

Master of Nutrition and Dietetics | 008414B | 7.0 (7.0) | Feb | 2 | 56500

This degree is a pathway into professional practice as a dietitian and nutritionist. With practical training and access to eminent dietitians, it will place you at the forefront of dietetic and nutrition research and practice. A graduate of this program is eligible to apply to Dietitians Australia and to join the provisional Accredited Practising Dietitian Program.

Pharmacy

Master of Pharmacy | 050004D | 7.0 (6.5) | Feb | 2 | 56500

This degree offers an entry pathway to fast-track your career into the pharmacy profession. It is an accredited degree designed to prepare you for all aspects of the pharmacy profession, including leadership in innovative and evidence-based practice. With a strong practical focus, underpinned by evidence-based practice and research, you will develop valuable knowledge, skills and experience in all aspects of the pharmacy profession. Your studies will consist of a variety of blended learning opportunities including lectures, tutorials, labs, small-group work and problem-based learning, as well as clinical placements across the community, hospital and industry sectors.

Music

Master of Music Studies (Opera Performance) | 077459F | 7.0 (6.0) | Feb | 2 | 43500

Your development as a singer and performer will be mentored and supported to reach your potential by teaching staff who are internationally experienced active performers, teachers and researchers. Extend your knowledge and onstage experience of opera repertoire, style, lyric diction and stage skills in preparation for the professional opera stage.

Master of Music Studies (Performance) | 058373C | 6.0 (6.0) | Feb/Jul | 1.5 | 43500

This degree will extend your technical mastery of your chosen instrument or voice, while deepening your knowledge of repertoire and performance practice. This degree may be taken in any of the Conservatorium’s instrumental areas, including orchestral and solo instruments, early music and jazz.

Important information
ABOUT OUR POSTGRADUATE COURSEWORK DEGREES

The information below relates to the courses listed in the tables on pages 78–91. The information published in these tables is correct at the time of publication for admission in 2024 but may be subject to change. For the latest information, including admission criteria, course structure and availability, search for the relevant course at
− sydney.edu.au/courses

Postgraduate courses available for full-time study onshore
The postgraduate courses listed on pages 78–91 are CRICOS-registered and available to international students who intend to study full time in Australia on a student visa. For more information about CRICOS-registered courses, visit the CRICOS register at
− cricos.education.gov.au

Several of the courses offered as master’s degrees are also available as graduate diplomas and/or graduate certificates. For more information about these options, visit
− sydney.edu.au/courses

Postgraduate courses not available for full-time and/or onshore study
The University of Sydney also offers a range of postgraduate courses that may be available to international students who are not on a student visa. Examples include courses offered in online mode, which are available to international students from their home country. Some courses offered online also include intensive study periods onshore. International students in Australia who are not on a student visa, depending on their visa type, may also be eligible to undertake courses that are not offered full time onshore and/or are not CRICOS-registered. Some CRICOS-registered courses offered onshore also have an online mode available to non–student visa applicants.

For more information, visit
− sydney.edu.au/courses

Double degree progression requirements
Double degrees have progression requirements that must be satisfied before you can be admitted to your second degree. For important information on progression rules, visit
− sydney.edu.au/handbooks

Key to the table
English – IELTS Academic
The first score listed is the overall score required. The score listed within the brackets is the minimum score required in each section (L for Listening, R for Reading, S for Speaking, W for Writing).

For information about other English language tests and requirements, visit
− sydney.edu.au/study/english-reqs
At the University of Sydney, you have the flexibility to combine study areas from more than 450 options across nine disciplines, to create the degree that’s right for you. Explore your options at sydney.edu.au/courses

Admission to the University of Sydney is competitive, and is based on meeting admission criteria specific to the course you wish to enter. The following is some general information about our admission requirements. To check the specific admission criteria for your chosen course, search for the individual course page at sydney.edu.au/courses

Inherent requirements
Some courses in areas such as education, health, medicine and veterinary medicine have inherent requirements that you need to be able to meet to successfully complete that course, such as the ability to carry out essential activities involving children, patients or animals, as relevant. (Reasonable adjustments will be made for disability, cultural and religious factors.) While these are not admission requirements, you need to consider them when making your course selection. Learn more at sydney.edu.au/students/inherent-requirements

Academic requirements
Admission to most of our postgraduate coursework degrees requires a recognised tertiary qualification such as a bachelor’s degree and, in some cases, relevant work experience and/or other prerequisites. This information is included on the relevant course page.

Additional admission criteria
Some courses, including some business, education, dentistry, medicine, music, nursing, clinical psychology, veterinary medicine and visual arts courses, have additional admission criteria, such as a standardised admission test (e.g. GAMSAT, MCAT), audition, interview, portfolio or personal statement of motivation. This information is included on the relevant course page.

Assumed knowledge
Some postgraduate courses expect you to have a certain level of existing knowledge in specific areas of study. This information is included on the relevant course page.

English language requirements
Depending on your country of origin and educational background, you may need to provide evidence of your English proficiency to be able to study with us. Learn more at sydney.edu.au/study/english-reqs

Courses with external registration or accreditation may have additional English language requirements set by the registration or accreditation body. This information is included on the relevant course page.
As an international student, you should apply as early as possible to allow time for visa and travel arrangements. You should apply direct to the University through sydney.edu.au/courses

Application deadlines vary by course. Check the relevant course page for specific closing dates.

A $150 (AUD) application processing fee applies.

For personalised application advice:
- contact one of our regional experts listed at sydney.edu.au/study/regional-contacts, or
- apply through one of the University of Sydney’s authorised agents (representatives) listed at sydney.edu.au/study/overseas-agents.

WHAT HAPPENS NEXT?

4 You will receive a response — either an unconditional offer if your application is successful, or a conditional offer if you are required to satisfy additional admission criteria.

5 Accept your unconditional offer (instructions will be included with the offer).

6 Pay the required fees (instructions will be included with the offer) — your first semester of course tuition fee plus your Overseas Student Health Cover (OSHC) fee — and receive an electronic Confirmation of Enrolment (eCoE), which you will need for your visa application.

7 Apply for your student visa and make the necessary travel arrangements.

8 Enrol online in your course (includes selecting your subjects — instructions will be included with the offer).

9 Arrive in time for orientation, welcome activities and course commencement.

For more information about the application process, visit sydney.edu.au/study/how-to-apply/international-students.html
Our research

We’re one of the world’s top research universities. All our research is driven by the big picture. We take a problem and look at it from all angles, combining the expertise and talents of scholars from many disciplines. Our key research areas include technology, health and wellbeing, society and culture, and environmental issues.

100% of our research is ranked at world standard or above by the Australian Research Council*

150+ research centres and networks

28 research partnerships with universities around the world

300+ jointly funded research projects with partner universities

$129K for the duration of your PhD with a Research Training Program scholarship for international students

* ERA National Report 2018-19, Australian Research Council

</table>

This degree may be undertaken in any Business discipline, within one of our research centres, and/or in association with one of our dynamic research groups. The degree requires the satisfactory completion of selected coursework units of study and a research thesis of 80,000 words on an approved topic, under the supervision of an academic panel.

This degree takes at least one year of full-time study to complete, during which candidates undertake approved research and write a thesis of up to 50,000 words.

The Doctor of Philosophy program involves preparing a thesis that will make a substantial and original contribution to the specific subject area. You will undertake specialist units of study and multidisciplinary research across the broad areas of engineering and computer science, centred on key themes including data science and computer engineering; robotics and intelligent systems; the Internet of Things; healthcare engineering; energy, resources and the environment; complex systems; food ergonomics; and infrastructure and transport. The degree is awarded if your thesis is considered to be a substantial and original contribution to the subject concerned.

The Doctor of Philosophy at Sydney Law School equips you for careers in advanced research, policy development, public service, tertiary teaching and professional leadership. You will benefit from a vibrant and dynamic research culture and engage with internationally renowned academic and research staff who are experts across a range of fields.

The Master of Criminology by research enables you to further explore aspects involving criminal law, forensic psychiatry, drug policy and the law, gender and race relations, youth and crime, policing in society, and other social and cultural aspects of criminal justice. Your 50,000-word supervised thesis must make a substantial contribution to the knowledge of the subject concerned.

The Master of Laws by research equips you for careers in advanced research, policy development, public service, tertiary teaching and professional leadership. It will enable you to acquire and develop sophisticated research and analysis skills, honed through work on a topic of your choice that expands legal thinking and understanding. Your 50,000-word supervised thesis must make a substantial contribution to the knowledge of the subject concerned.

--- | --- | --- | --- | --- | ---
**Music (Research)**

**Doctor of Musical Arts**
CRICOS: 061144A  
Academic: 7.0 (6.5)  
Commencing: Mar/Jul  
Duration: 3-4  
Tuition fee: 43000

The Doctor of Musical Arts is a professional doctorate in music performance, conducting or composition, and is open to highly talented and skilled musicians with strong scholarly abilities. The course will suit candidates with a research background who wish to enhance their skills while taking advantage of the exceptional teaching available at the Sydney Conservatorium of Music.

**Doctor of Philosophy (Music)**
CRICOS: 039863J  
Academic: 7.0 (6.5)  
Commencing: Mar/July  
Duration: 3-4  
Tuition fee: 47500

This degree is undertaken as a supervised research project in composition, musicology, music education, performance and interdisciplinary applied research topic areas. PhD requirements vary between disciplines and may comprise a thesis of up to 80,000 words; or a thesis comprising a dissertation that includes a critical and theoretical discussion together with a substantial body of creative work.

**Master of Music (Composition)**
CRICOS: 019178G  
Academic: 7.0 (6.5)  
Commencing: Mar/Jul  
Duration: 1-2  
Tuition fee: 43000

With several of Australia’s finest composers on staff at the Sydney Conservatorium of Music and amid outstanding facilities, you can compose ambitious music in a range of media, from instrumental and vocal to electronic and electroacoustic music. This degree facilitates the development of advanced compositional skills, moving beyond the technical and aesthetic scope and complexity of your undergraduate degree. During this degree you will complete a substantial portfolio of compositions and a research thesis.

**Master of Music (Music Education)**
CRICOS: 008454E  
Academic: 7.0 (6.5)  
Commencing: Mar/Jul  
Duration: 1-2  
Tuition fee: 43000

Music educators train the musicians of tomorrow and our research students in this degree investigate early childhood through to school and university pedagogy, studio teaching, community music activity, popular music, special education and non-notated music traditions. This degree aims to foster research skill development in diverse areas of music education through research seminars, data collection and the writing of a thesis.

**Master of Music (Musicology)**
CRICOS: 019180B  
Academic: 7.0 (6.5)  
Commencing: Mar/Jul  
Duration: 1-2  
Tuition fee: 43000

This degree will inspire you to develop your skills as an independent music researcher and support you to communicate your research in a thesis. Join our researchers in areas such as historical musicology, ethnomusicology, empirical musicology, popular music studies and more.

**Master of Music (Performance)**
CRICOS: 007448M  
Academic: 7.0 (6.5)  
Commencing: Mar/Jul  
Duration: 1-2  
Tuition fee: 43000

The Master of Music (Performance) provides a unique opportunity to develop high-level skills in the production of research-based creative work in music performance. The final thesis embodying the results of your research will include a final creative work presentation and a written dissertation of 10,000 to 20,000 words.

---

**Science (Research)**

**Doctor of Philosophy (Science)**
CRICOS: 000722K  
Academic: 6.5 (6.0)  
Commencing: Jan/Mar/Jul/Oct  
Duration: 3-4  
Tuition fee: 53500

The Doctor of Philosophy allows you to undertake research in a field of the faculty’s expertise, culminating in a thesis of up to 80,000 words. You will develop advanced skills including critical thinking, data interpretation and analysis, and project management, as well as communication and problem-solving. This degree enables research across agriculture, chemistry, geosciences, history and philosophy of science, life and environmental sciences, mathematics and statistics, psychology or veterinary science.

**Master of Philosophy (Science)**
CRICOS: 086400F  
Academic: 6.5 (6.0)  
Commencing: Jan/Mar/Jul/Oct  
Duration: 1-2  
Tuition fee: 53500

The Master of Philosophy allows you to undertake research in a field of the faculty’s expertise, culminating in a thesis of up to 50,000 words. You will develop advanced skills including critical thinking, data interpretation and analysis, and project management, as well as communication and problem-solving. This degree enables research across the same disciplines as the Doctor of Philosophy (Science).

* Tuition fees are subject to annual increases. For further information, see page 103.
How to apply
TO OUR POSTGRADUATE RESEARCH COURSES

1. CHOOSE A SUITABLE RESEARCH DEGREE AND DETERMINE YOUR ELIGIBILITY
   Determine which research degree you are eligible for. The most important criteria are your previous research experience (e.g., a research capstone project in a master’s by coursework degree) and your undergraduate performance. For more information, visit
   - sydney.edu.au/study/pg-research
   - sydney.edu.au/honours

2. DEVELOP YOUR RESEARCH PROPOSAL AND FIND A SUPERVISOR
   You will need to develop an initial research proposal as part of the application process. This is your opportunity to explain your research ideas, describe your academic background, and showcase your previous research experience. Learn how to write a research proposal at
   - sydney.edu.au/phd-research-proposal
   You will also need to identify a potential academic supervisor to supervise your research. Carefully consider the subject of your proposed research, and check whether your interests align with any potential academic supervisors at the University of Sydney. Search for potential academic supervisors at
   - sydney.edu.au/find-a-researcher
   You might already have a research project of your own in mind, or you might wish to contribute to an existing research project in your chosen field. Browse current research opportunities at
   - sydney.edu.au/research/search

3. FUNDING YOUR RESEARCH DEGREE
   For international students, tuition fees apply to research degrees. Scholarships and awards are available to fund your research with tuition fee and stipend (living allowance) support. Some scholarships and awards are specific to a particular research project or discipline, and many are awarded based on academic merit and/or potential research impact. Search for scholarships at
   - sydney.edu.au/scholarships/international/postgraduate-research.html

For more information on the application process and additional admission requirements, visit
- sydney.edu.au/pg-research-req
Once you have secured a research supervisor and finalised your research proposal, you can:
- apply directly to the University of Sydney at sydney.edu.au/courses, or
- apply through one of our regional experts listed at sydney.edu.au/study/regional-contacts, or
- apply through one of our authorised overseas agents (representatives) listed at sydney.edu.au/study/overseas-agents.

Your application will need to include the following documents:
- final research proposal
- official academic transcripts from previous studies
- evidence of English language proficiency if required
- curriculum vitae (CV) or resume
- evidence of a University of Sydney academic staff member’s agreement to supervise your research project
- two referee reports
- a portfolio of work or audition arrangement if required.

**Academic requirements**
To be eligible for admission to a postgraduate research degree, you need to show sufficient prior research experience and capability, such as:
- a bachelor’s degree with first or upper-second-class honours, or
- a master’s degree by coursework, performed at a high academic standard, which included a substantial component of original research, or
- an equivalent qualification that demonstrates research experience, excellence and capability.

**English language requirements**
Depending on your country of origin and educational background, you may need to provide evidence of your English language proficiency to be able to study with us. Learn more at sydney.edu.au/study/english-reqs

**Application deadlines**
We encourage you to apply well ahead of time, even before you have completed your current qualifying degree.

Applications are open all year round, and we offer four research periods each year when you can start your research degree (depending on your faculty). The main research periods are research period 2 (which begins 1 March) and research period 3 (which begins 1 July).

For key dates relating to research degrees, visit sydney.edu.au/study/admissions-timeline

For more information on admission requirements and the application process, visit sydney.edu.au/pg-research-req
An international student is anyone who does not hold Australian or New Zealand citizenship (or dual citizenship), Australian permanent residency, or an Australian permanent humanitarian visa.

If you are a dual citizen who holds Australian or New Zealand citizenship as well as citizenship of another country, you are not an international student and you will be assessed for admission as an Australian domestic student.

Student visas
As an international student studying in Australia, you must hold a valid Australian visa for the duration of your study. It is important that you are familiar with all the conditions of your visa, especially if you are considering making any changes to your university enrolment.

As a student visa holder, you must also be aware of the Education Services for Overseas Students (ESOS) framework, established by the Australian Government to ensure that universities deliver quality education and a high level of care to international students. Learn more at sydney.edu.au/student-visas

Recognition of prior learning
Recognition of prior learning (RPL) is when your previous studies and/or professional experiences are recognised and counted towards your current degree completion requirements.

The University of Sydney recognises that students begin their postgraduate studies with different levels, areas and forms of prior learning. If your previous studies or professional experience are recognised as being equivalent or comparable to some of the content of your chosen course at the University of Sydney, you may be offered credit towards the completion of your course. This can reduce the overall number of credit points required to complete your course, and may also reduce your course duration.

RPL can be granted as specific credit, non-specific credit in a given discipline, reduced volume of learning (RVL), or a waiver. The type of RPL credit you may be granted will be determined by the course you are enrolled in and the level, content and completion status of your previous studies.

RPL is often assessed on a case-by-case basis, but some faculties and some courses have existing international articulation pathways (see below) for some qualifications.

If you apply for admission directly to the University, you will be asked as part of the application whether you wish to apply for RPL. If you tick ‘Yes’, you will receive an email with information about how to log in to the Sydney Student portal and submit an application for RPL. If your application is successful, you will receive an updated offer showing RPL credit offered. You may either accept or decline this credit once you accept your offer to study with us.

For faculties and courses with existing international articulation pathways (see below), you will be awarded RPL credit without having to submit a separate application.

For more information about RPL, visit sydney.edu.au/study/rpl

International articulation pathways
The University of Sydney has a range of formal international articulation pathway arrangements with selected overseas universities, polytechnics and colleges. These arrangements can help to fast-track your studies by providing you with RPL credit towards your Sydney degree. For details, visit sydney.edu.au/study/international-articulation

Mandatory work requirements
Some courses have a mandatory work component that must be completed as part of the course. For courses with this requirement, this work will not count towards your student visa work limits.

Verification of qualifications
The University is committed to preserving the integrity of our academic programs and will admit students with valid qualifications. We may need to check on the validity of your admission documents at any time. It is recommended that you keep a copy of all original documents submitted and bring these to Australia with you.
Fees and costs
FOR POSTGRADUATE COURSES

Tuition fees
Tuition fees vary depending on the course and the year in which you study. See the course tables on pages 78-91 for indicative tuition fees for study beginning in 2024.

All tuition fees listed in this guide are:
- listed in Australian dollars (AUD)
- based on a full-time enrolment load of 48 credit points per year, or a 1.0 Equivalent Full-Time Student Load (1.0 EFTSL), unless otherwise indicated; if your study load is greater or less than this, your tuition fees will vary accordingly
- exclusive of the costs of textbooks and other required course materials, additional course costs, health insurance, and living expenses such as food and accommodation
- exclusive of the Student Services and Amenities Fee (SSAF), which was introduced by the Australian Government to fund university services and support programs.

Estimating your total tuition fees
For courses that are longer than one year, we are unable to provide you with a precise indication of tuition fees beyond your 2024 tuition fee. Tuition fees increase annually (effective at the start of each calendar year), and our website is updated accordingly. For the most up-to-date tuition fees, search for your course at
- sydney.edu.au/courses

Other costs
As well as course tuition fees, you should budget for:
- additional course costs, which may be substantial and may include (but may not be limited to) course-specific materials and textbooks, tools and protective clothing (see sydney.edu.au/additional-course-costs)
- the annual Student Services and Amenities Fee (SSAF), which is up to $326 in 2023 and is indexed annually for the duration of your course (see sydney.edu.au/ssaf)
- Overseas Student Health Cover (OSHC), an Australian Government requirement for student visa holders for the full duration of their student visa (see sydney.edu.au/study/oshc)
- living expenses, including accommodation, transport, food and other expenses (see sydney.edu.au/study/living-costs).

Annual fee reviews
All course tuition fees and the Student Services and Amenities Fee (SSAF) are subject to annual review (and indexation, when required) and will increase for each year of your study, effective at the start of each calendar year.

Payment methods
When you receive an offer to study with us, you will be required to make an initial payment equal to your first semester of course tuition fees plus your Overseas Student Health Cover (OSHC) fee, in order to formally secure your place and apply for a student visa. Instructions on how to pay these will be included with the offer.

There are several ways you can pay your fees, including by credit card, bank transfer, BPAY (Australian accounts only), Paypal or one of our online payment gateway providers (Convera, HSBC, Flywire and CIBC). A surcharge of between 0.3% and 2.8% will apply (subject to review and change), depending on the card type used.

For more information about payment methods and surcharges, as well as refund procedures and policies, visit
- sydney.edu.au/study/paying-your-fees

Glossary
A full glossary of terms is available at:

# Important dates

## FOR 2024

<table>
<thead>
<tr>
<th>Event</th>
<th>Dates</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer holiday</td>
<td>February – January</td>
<td>Application deadlines vary and for some courses can be up to a year in advance. For course-specific deadlines, visit: sydney.edu.au/courses</td>
</tr>
<tr>
<td>Semester One</td>
<td>February – June</td>
<td>Orientation and welcome events take place in the weeks leading up to the start of Semester One. These are a great way to get to know your faculty, teaching staff and fellow students before classes begin. Visit sydney.edu.au/welcome</td>
</tr>
<tr>
<td></td>
<td>January – February</td>
<td>Semester One begins in February 2024, but some courses have an earlier start date. Check specific start dates at sydney.edu.au/courses</td>
</tr>
<tr>
<td></td>
<td>March 2024</td>
<td>Once classes start, you have two weeks to try out different units of study (depending on the flexibility within your degree), as long as you finalise your enrolment no later than the Friday of Week 2.</td>
</tr>
<tr>
<td></td>
<td>May – June 2024</td>
<td>If you change your mind about a unit of study, you can still withdraw without academic penalty, as long as you do so before the census date. This usually falls on the last day of March.</td>
</tr>
<tr>
<td>Winter holiday</td>
<td>July 2024</td>
<td>Research period 2 begins.</td>
</tr>
<tr>
<td>Semester Two</td>
<td>July – December</td>
<td>A one-week study vacation takes place during May/June. The examination period is then held in June. Semester One ends at the end of June. Applications close for mid-year entry (Semester Two intake) in June. To see which degrees are open for mid-year entry, visit sydney.edu.au/courses</td>
</tr>
<tr>
<td></td>
<td>November 2024</td>
<td>Research period 4 begins</td>
</tr>
<tr>
<td>Summer holiday</td>
<td>December 2024</td>
<td>Some faculties and schools host welcome events in the weeks leading up to the start of Semester Two. Semester Two begins in July 2024, but some courses have an earlier start date. Check specific start dates at sydney.edu.au/courses</td>
</tr>
<tr>
<td></td>
<td>October 2024</td>
<td>You can try out different units of study before finalising your enrolment at the end of the second week of semester. You can withdraw from a unit of study without academic penalty as long as you do so before the census date, which usually falls on the last day of August.</td>
</tr>
