UTS UNIVERSITY OF TECHNOLOGY SYDNEY

2023 International Course Guide

Postgraduate
UTS is a member of the Australian Technology Network (ATN), an influential alliance of six distinctive and prominent Australian universities. ATN is committed to forging partnerships with industry and government to deliver practical results through focused research. The Network educates graduates who are ready to enter their chosen profession, dedicated to the pursuit of knowledge and eager to claim a stake in building sustainable societies of the future.
At the University of Technology Sydney, we think differently. We take a global approach to education, driven by innovation and social justice.

*THE & QS World University Rankings 2022
Welcome to Sydney

Imagine waking up in Australia's most dynamic, cosmopolitan and dazzling city. Home to beautiful beaches, a bustling CBD and some of Australia's most famous landmarks - Sydney's got it all.
Opportunities on your doorstep

At UTS, you’ll study in the heart of Australia’s business capital. Sydney hosts more than 60 per cent of regional technology operations and more than 90 per cent of banks base their regional headquarters here. It’s also the place to be an entrepreneur, with 60 per cent of Australia’s start-ups. UTS is located in Sydney’s energetic digital and creative industries hub, home to more than 40 per cent of Sydney’s digital and creative industries.

Safe and friendly

Sydney is a diverse and vibrant city, with more than 35% of the population speaking a language other than English at home*. It’s one of the reasons more than 260,000 international students** choose to study in New South Wales each year. As an international student, you’ll be welcomed into a respectful and multicultural community.

Connected to everything

At UTS, you’re only a few minutes’ walk away from Sydney’s transport hubs: Central Station and Railway Square. There are plenty of clean, reliable and safe transport options connecting you to the rest of our great city, including buses, trains and trams. UTS is also walking distance to the CBD, Darling Harbour, shopping, food, sport, culture and nightlife.
In the heart of it all

Located in the centre of Sydney’s digital and creative precinct, UTS is part of a truly global city.

Do you dare to think differently? When you study at UTS, you join a dynamic community of students, staff and industry partners who are committed to creating innovative solutions to tomorrow’s problems.

Learning for the real world
Nothing prepares you for the real world like industry experience. That’s why hands-on, practice-based learning experiences are key to our courses. Major projects, group work, simulations and real-life case studies are key to our practice-based approach, giving you the skills you need to impress future employers.

Campus of the future
UTS is situated in the heart of Sydney’s technology and industry precinct: Tech Central. Our tech-driven, purpose-built spaces will inspire you to learn. When you’re not in class, enjoy our student spaces and relax on the Alumni Green.

Connections that count
We continue to build extensive industry connections with organisations across a range of sectors. Our industry partners help us shape our course content. They also provide guest lectures, internships, scholarships and prizes, so everything you study reflects the real world of work.
Research that matters

We believe universities should work for the greater good by driving social change beyond the campus. When you choose UTS, you’ll join a community of inspired – and inspiring – students, academics and creative industries who are shaping the future through research and practice on a local and global scale.

Building global leaders

We have many opportunities to help you develop a global mindset and build the professional skills needed for a truly international career. Put these skills into practice with an overseas or virtual global experience as part of your UTS degree.

Our campus

Located in the heart of Sydney, our purpose-built campus has transformed the Broadway precinct – and it’s designed to transform your study experience too.

UTS Broadway campus

Our Broadway campus is home to state-of-the-art teaching facilities, world-class labs, vibrant student spaces, a brand new library and the green heart of our campus – the Alumni Green. Our newest addition, UTS Central, is a hub of activity that reflects our commitment to learning innovation, industry collaboration and sustainability.
UTS Haymarket campus
Haymarket, an historic district next to Sydney’s Chinatown, is rapidly transforming into a hub of creativity and entrepreneurship. It’s best known for the Frank Gehry-designed UTS Business School where dynamic learning, research and collaboration comes to life.

UTS Moore Park campus
Moore Park is Sydney’s premier sporting precinct. Home to the Rugby Australia Building, this state-of-the-art sport and education hub represents the first time that university programs have been integrated within an Australian elite sporting precinct.
Our facilities

Study in award-winning labs and collaborative classrooms and work with the tools and technologies that are shaping your industry.

Data Arena
Data comes to life in the interactive UTS Data Arena, a unique 3D environment for the exploration and visualisation of complex information. Stereo, video and incredible picture clarity make for a one-of-a-kind immersive experience.

ProtoSpace
This unique 900m² additive and advanced manufacturing facility is part of UTS’s commitment to next-generation manufacturing. With the latest in 3D technologies, software and technical expertise, this lab is a learning experience that’s second to none.

Clinical labs
Prepare for real-world clinical practice in some of the most advanced health learning spaces in Australia. Treat high-fidelity robotic patients in our tech-driven simulation and laboratory spaces for nursing and midwifery students - just watch out for their (very life-like) bodily fluids!
Fashion studio
This dedicated studio houses spaces for patternmaking, cutting, construction and more. Throw in mannequins, industrial sewing machines and a range of fabrication equipment and you’ll have everything you need to bring your first fashion collection to life.

Moot courts
Practise your advocacy and mooting skills in our purpose-built moot and trial courts. These simulated facilities have been designed to reflect the real-life experience of arguing the law in the NSW Supreme, District and Local courts.

Hive Superlab
This world-class collaborative bioscience lab can accommodate up to 270 students in up to seven different classes, simultaneously. Specialist audiovisual facilities, including bone-conduction headphones, enable simultaneous teaching instruction and peer collaboration.

Learn more about our specialist facilities

Leap into life at UTS

At UTS, we prepare you for life, not just work. And there’s a world of opportunity waiting for you on campus.

Connect with industry while you study. Preview your collection at the UTS Fashion Show, build a business with UTS Startups or prototype new solutions to modern legal challenges with an industry-led hackathon.

Unleash your inner entrepreneur with UTS Startups. No matter which degree you study, you’ll be inspired with events, masterclasses, internships, and the opportunity to join our fast-growing startup community.

Think global. At UTS, we’re preparing students to become global leaders through programs like UTS BUILD and global exchange. Explore global issues, develop a global mindset and build the professional competencies – interpersonal, communication and teamwork skills - required for a truly international career.
Join Team UTS. Whether you’re looking for competitive sports, a recreational game or to get fit in a supportive gym environment, UTS Sport can help your inner athlete shine.

activateuts.com.au/sport

Start planning your future. Turn your abilities and experiences into a meaningful career with support from UTS Careers. With face-to-face and online events, workshops, industry mentoring and career coaching sessions throughout the year, you’ll be ready to land that dream job or internship in no time.

careers.uts.edu.au

Get social with ActivateUTS. Join one of more than 300 events every year, make new friends at O’Day or O’Fest, enjoy livestreamed uni sports, or get your friends together for themed trivia or free food events, to name a few.

activateuts.com.au/events

Find your people. Whoever you are, whatever you’re into there’s a UTS club or society for you. With online and face-to-face events now on offer, there are countless ways to get involved.

Careers

As a UTS student, you can access timely and tailored career advice, no matter where you are. We offer a variety of workshops, events, tools and resources to help you along your career journey.
Connect with our community

**Group sessions.** Access small, informal group conversations with your peers and a UTS Careers Consultant on various career topics.

**Workshops.** Learn how to design a fulfilling career, write a stand out resume, find job opportunities, refine your interviews skills and more.

**Industry events and experiences.** Attend industry panels, group mentoring sessions, careers fairs and discipline-specific initiatives.

**Mentoring.** Connect with people working in your industry who genuinely want to help you via our Professional Mentoring Platform.

Access online tools and resources

**Rate My Resume.** Have your resume reviewed instantly, anywhere, anytime with our free resume review platform.

**CareerHub.** Kickstart your job search with Careerhub; your go-to place for job and internship opportunities, resources and events.

**Virtual work experience.** Get experience with top companies before you graduate by completing any number of virtual work experiences – free for all UTS students.

**Careers blog.** Find career advice and life hacks from our community. Get published by sharing your internship or job experiences so far.

**Additional resources.** Access our range of resources anywhere, anytime, including our video interview practice tool, job application workbooks, career advice playlists and more.
Scholarships

UTS is dedicated to supporting your studies through one of Australia’s most generous scholarship programs for international students.
Postgraduate scholarships and grants
int-scholarships.uts.edu.au
We offer a range of scholarships for high-achieving international students, including full tuition fee and partial tuition fee scholarships and grants. Most scholarships are awarded on the basis of academic achievement.

Faculty scholarships
uts.edu.au/scholarships
Many UTS faculties offer international scholarships to reward achievement and recognise motivation to succeed. These scholarships are always evolving, visit our website for the latest information.

Australian Government scholarships
dfat.gov.au/people-to-people/australia-awards
The prestigious Australia Awards International Scholarships and Fellowships offer emerging global leaders an opportunity to undertake study, research and professional development in Australia. Funded by the Australian Government, the awards help international students gain qualifications to contribute to development success back home.

Alumni advantage
alumni.uts.edu.au/advantage
Already graduated from a UTS degree? If you’re thinking about returning to study at UTS, you could be eligible for a 10% saving on your tuition fees through the Alumni Advantage Program. This discount applies to full-fee-paying courses and will be applied automatically when you enrol!

Financial aid and loans
If you’re from Canada, Denmark, Germany, Norway, Sweden or the USA, you may be eligible for financial aid to support your studies at UTS. Check with your government for requirements.

Scholarships for UTS College Students
utscollege.edu.au/scholarships
UTS College supports international students completing a UTS College graduate certificate and progressing to UTS to complete a master’s degree.
UTS-owned accommodation

UTS’s student housing is called Yura Mudang. It is located close to campus and has a spacious communal and barbecue area, study rooms, games and computer rooms and a music room.

UTS Housing is self-catered, secure and competitively priced. Most bedrooms are for one person (except twin shares), with shared kitchens, bathrooms and living areas. Apartments are fully furnished and rent includes gas, electricity, water, cabled internet in bedrooms and limited wireless internet access in communal areas. You will need to provide your own bed linen and cooking equipment.

Renting private accommodation

If you are organising private accommodation, we recommend you arrange short-term accommodation in Sydney so you can view properties on your arrival and choose something that really suits your needs for the long-term. Visit UTS Housing’s off-campus accommodation website, to find share rooms in private houses and apartments around UTS: uts.studystays.com.au

Share accommodation means you usually have your own room and share a kitchen, living area and bathroom with other students or people who work. Alternatively, you may choose a studio or one-bedroom apartment to live in on your own, but this is more expensive.

All accommodation rentals should come with a residential or tenancy agreement. If you need any help or advice, please contact the UTS Housing Off-Campus Officer at housing.welfare@uts.edu.au or the UTS Student Legal Service at studentlegalservice@uts.edu.au who are here to help you.
Your way to UTS

UTS College is your alternative pathway to your dream UTS degree. Benefit from personalised academic support, small class sizes and practical learning designed to help you thrive at UTS and beyond.

View our programs
utscollege.edu.au/programs
UTS College is your pathway that guarantees* entry to your master’s degree at UTS. Whether you’re looking to develop your expertise and professional skills, fast-track your career prospects, or build industry connections and networking opportunities, we can help you on your journey. You’ll benefit from personalised academic support, small class sizes and practical learning that will help you thrive at UTS.

Why choose UTS College

– Guaranteed entry* to UTS when you successfully complete your UTS College program pathway
– Gain credit points towards your master’s degree as recognition of prior learning
– Small class sizes with a practical approach to learning and focus on building employability skills
– Personalised academic and wellbeing support in-person or available 24 hours online
– Reach your potential at UTS and beyond with our highly supportive, personalised, technology-led learning experience, Learning.Connected.

Find out more: utscollege.edu.au/learning-connected

* Based on successful completion of your UTS College program pathway.
**You will only be required to enter a UTS College Academic English program if you do not meet the English language entry requirements.
Academic English

UTS College Academic English language programs help you to develop the English language skills** required to succeed at university and your future career.

**Build confidence in small classes**
Learning in a small class means you can get more individual attention. Our English classes have an average of 16 students, so there are many opportunities to ask questions and connect with teachers for extra help and support. You’ll also have exclusive access to our HELPS Centre, which offers a wide range of specialist resources for learning English. These include a suite of online resources and assistance available 24 hours a day, 7 days a week, to ensure you have support when you need it.

**Learn from the best**
You’ll become a confident communicator who feels comfortable with the English language. Mastering Academic English will develop your reading, writing, listening and speaking skills. Our teachers are qualified and experienced in TESOL, which means you’ll be taught by some of the best English teachers in Australia.

**Direct entry to university***
When you complete our Academic English program, no further IELTS or TOEFL tests are needed. Once you achieve the required English proficiency, you are guaranteed entry* into UTS degrees, without the need to complete a test.

*English and academic entry requirements apply. Please refer to the courses page of our website for course information, entry requirements and articulation details. Successful completion of AE5 satisfies the English language admission requirements for most UTS undergraduate and postgraduate degrees. For specific details of UTS English entry requirements please refer to the individual faculty pages on the UTS website.

**You will only be required to enter a UTS College Academic English program if you do not meet the English language entry requirements.

utscollege.edu.au/english-language-programs
Pre-Master’s Program

UTS College Pre-Master’s Program has been designed in collaboration with UTS to ensure you develop the skills you need to transition smoothly to your dream UTS master’s degree.

Graduate certificates
Our Pre-Master’s Program features a range of graduate certificates in high-demand disciplines, to help you advance into a UTS master’s degree in accounting, finance, strategic communication, media, journalism, engineering, IT and data science. Our graduate certificates guarantee entry to a UTS master’s degree*. Choose from:

- Accounting & Finance – see page 50
- Communication – see page 60
- Technology Practice – see page 92 and 118

Dedicated learning support
Benefit from our industry-driven UTS style of learning (Learning.Connected), along with a range of entrepreneurial experiences and career support. Our Pre-Master’s Program combines interactive and engaging face-to-face or Live Online classes held in real-time, with a wide variety of independent learning activities to facilitate deep subject knowledge and prepare you for success at UTS.

Pathway options that suit you
Complete the graduate certificate over a time that suits you, including:

**Accelerated 4-month program.** The fastest way to your UTS master’s degree if you meet the academic and English language requirements. After successful completion, you’ll enter Session 2 of your first-year UTS master’s degree.

**Standard 8-month program.** Covers the same content as the Accelerated program. Allows more time to adjust to Australian education expectations and includes additional subjects to meet the English language requirements for your UTS master’s degree. After successful completion, you’ll enter Session 2 of your first-year UTS master’s degree.

Find out more
utscollege.edu.au/premasters

* Based on successful completion of your Graduate Certificate.
Agile. Innovative. Real-world. UTS Business School is an urban treehouse in the heart of the city. The iconic building is more than just a physical space; its unconventional design reflects our unique approach to business education.

**AT THE HEART OF BUSINESS**
Study business where it happens. Thanks to our Sydney city location, we’re connected right into Australia’s financial, creative, start-up and technology industries – including leading international companies.

**REAL-WORLD LEARNING**
There’s no point learning theory if you don’t know how to apply it. Real-world assessments, case studies, professional placements and industry interaction will ensure you translate theory to practice.

**GLOBAL RECOGNITION**
UTS Business School is among the top 5 percent of business schools in the world to be accredited by the Association to Advance Collegiate Schools of Business (AASCB).

**ACCREDITATIONS**

Master of Business Administration

Course Description

The UTS Master of Business Administration (MBA) is designed to extend strategic thinking, knowledge and capabilities for early career professionals seeking a career change or advancing into managerial roles. The course provides flexibility for students to build a broad foundation of general business skills before expanding their skill sets with their preferred specialisation(s). All MBA subjects are approved by an industry board that insists on ‘relevance to workplace’ as a pre-eminent subject design principle.

Majors

Professional accounting, professional accounting extension, finance, financial analysis, business law, human resource management, information technology, international business, management, marketing, operations and supply chain, project management, technology management.

Sub-Majors

Professional accounting, professional accounting extension, information systems, business law, engineering management, event management, finance, human resources management, information technology, international business, international exchange, management, marketing, marketing research, not-for-profit and social enterprise management, operations and supply chain management, project management, strategic communication, sport management, sustainable enterprise and responsible management, strategic management, strategic marketing.

Professional Recognition

**Accounting:** CPA Australia (CPAA); Chartered Accountants of Australia and New Zealand (CAANZ); Institute of Public Accountants (IPA)

The MBA with Professional Accounting (MAJ08988) major and Professional Accounting Extension (SMJ10161) sub-major meets the formal academic requirements for associate membership of CPA Australia and the ICAA. In order to meet the educational requirements for membership of CPA Australia and the ICAA, students must also substitute subject 22747 Accounting for Managerial Decisions in place of 22800 Understanding Accounting and Financial Reports in the MBA Core (STM91458) to qualify for accounting accreditation.

**Finance:** Financial Services Institute of Australasia (FINSIA)

Completion of the course meets the education requirements for Affiliate membership and, in conjunction with work experience, the requirements for Associate membership with the Financial Services Institute of Australasia (FINSIA).
Human Resources: Australian Human Resources Institute (AHRI)

Students completing this degree with a major in human resource management are eligible to apply to the Australian Human Resources Institute (AHRI) for the professional member (MAHRI) status.

Project Management: The MBA with a major in Project Management is accredited by the PMI Global Accreditation Centre for Project Management Education Programs (GAC).

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04018

Career Opportunities

The MBA is a widely recognised and transportable postgraduate degree. Students in the MBA know that to realise their full career potential, additional managerial skills and credentials are essential. Personal investment in an intellectually demanding and practically applied MBA program may provide students with the knowledge and skills required for career progression or career change.

Executive Master of Business Administration

Course Description

The UTS Executive MBA is designed for experienced professionals and aspiring change makers, innovators, start-up founders and indigenous leaders. It is for those who are looking to further develop their strategic leadership skills, confidence and innovation management capabilities to respond to complex challenges and lead sustainable economic development.

The program provides an integrative experience that facilitates students’ transition from tactical to strategic roles and builds their professional capabilities, networks and the confidence to create their next career chapter.

The EMBA emphasises applied and work-integrated learning that allows students to apply what they learn directly to their specific work context.

The program is designed and delivered in close collaboration with industry partners ensuring that the curriculum is relevant and aligned with leading business practices and the requirements of contemporary executive leadership.

Note: This course is not offered by direct entry. Admission is via Internal Course Transfer with Faculty approval on completion of the Graduate Certificate in Executive Management (C11338).

The course duration is 1 year and includes non-standard teaching sessions. It has a higher number of credit points per session.

Majors

Business administration, leadership, sustainability, management, innovation, technology management, business strategy, sustainable enterprises, people management, opportunity discovery, opportunity design, opportunity delivery.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04424

Career Opportunities

Career options include senior general management roles in private, public and non-profit organisations, start-ups and SMEs. Graduates can be the founders and co-founder of new businesses or be employed as senior unit managers or executive managers, business strategists, corporate transformation and innovation specialists, and management consultants.

The published fee is per session, based on a full-time, 24 credit-point study load.

Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208)

▲ Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

● Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.
Graduate Diploma in Business Administration

Course Description
The Graduate Diploma in Business Administration provides a basis for the development of a career in management for graduates who have not previously undertaken an administrative studies degree.

Areas of Study
Business administration, accounting, economics, finance, management, human resource management, marketing, strategic management.

Master of Behavioural Economics

Course Description
The Master of Behavioural Economics provides thorough training in behavioural economics and its application in the industry and government. This course introduces students to the rapidly expanding field of behavioural economics by providing a foundation in standard economic theory and by building the behavioural models on this foundation. This gives students a solid understanding of behavioural economics by combining economic theory and psychological insights.

At a fundamental level, students learn about the key aspects of human behaviour relevant to economic decisions; heuristics and biases in individual decision making and their implications in strategic interactions. Students are taught how to use these insights in experiments in order for them to be able to create new knowledge about human behaviour in the specific context they will face (e.g. customers in a given industry). They are trained to understand modern approaches in data science and how they can be used to study and understand human behaviour.

This understanding allows them to analyse a wide range of situations and behaviours in different decision-making environments. Students are given the opportunity to apply behavioural economics concepts in different decision-making environments, including financial decision making, health, education, and the environment. The Master includes substantial hands-on training where students have to develop their own research project either oriented to a general question or to an applied question, working for an actual industry or government organisation.

Note: This course includes non-standard teaching sessions.

Areas of Study
Behavioural economics, social cognition, decision analysis, game theory, consumer psychology, experimental economics, health economics, data visualisation.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04440

Career Opportunities
Career options include management-level positions in industry or government.

Master of Business Analytics (Extension)

Course Description
The Master of Business Analytics (Extension) is a unique transdisciplinary program of study in business analytics. With subjects drawn from UTS Business School, the Faculty of Engineering and Information Technology and the Faculty of Transdisciplinary Innovation, students are provided with a course structure which fits their background and experience, as well as flexible specialisations to meet new needs and career interests. The course is delivered in blended mode, combining contemporary online and face-to-face learning experiences in UTS's leading-edge facilities.

Areas of Study
Business analytics, data analytics, programming, accounting, finance, marketing research, supply chain, healthcare, visualisation, innovation, network analysis, data science, decision making.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04379

Career Opportunities
Career options are incredibly varied as virtually every company in every industry now collects huge amounts of data that needs to be interpreted and analysed to inform decision-making. Graduates from this program are able to provide valuable insights on matters such as fraud detection, logistics optimisation, customer acquisition and retention, and demand forecasting.
Master of Business Analytics

Course Description
The Master of Business Analytics is a unique transdisciplinary program of study in business analytics. With subjects drawn from UTS Business School, the Faculty of Engineering and Information Technology and the Faculty of Transdisciplinary Innovation, students are provided with a course structure that fits their background and experience, as well as flexible specialisations to meet new needs and career interests. Career Opportunities
Career options following additional study include financial analyst and entry level to managerial positions in the financial services sector, industry and government.

Master of Finance Master of Financial Planning

Course Description
The Master of Finance Master of Financial Planning is a double degree that covers the distinct but connected domains of finance and financial planning. The discipline of finance covers the management, creation and study of money and investments. It addresses broad financing and investment issues relevant to individuals, companies and governments. It also incorporates the overall finance system and addresses issues such as the structure and regulation of markets. Financial planning is a related discipline that addresses personal finance decisions and determines how individuals will achieve strategic goals and objectives. It draws on many of the fundamental skills in mainstream finance and incorporates regulatory, legal and taxation concepts.

Areas of Study
Investment management, corporate finance, personal finance, banking, finance, economics, risk management, sustainable finance.

Professional Recognition
Completion of the Master of Finance meets the education requirements for Affiliate membership and, in conjunction with work experience, the requirements for Associate membership with the Financial Services Institute of Australasia (FINSIA). UTS is recognised as an affiliated university under the CFA® (Charted Financial Analyst®) University Affiliation Program based on the Master of Finance degree.

The Master of Financial Planning has been designed around the standards of financial planning education as set by the Financial Adviser Standards and Ethics Authority (FASEA) and is a FASEA approved program.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04438

Career Opportunities
The course is intended for people who aspire to work in the finance industry and/or become financial planners. The career options include management-level positions in industry or government. The program has been designed to satisfy the academic qualification requirements according to the current regulatory framework.

The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208)

▲ Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

● Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.
Master of Financial Planning

Course Description

43
**Master of Human Resource Management**

**Course Description**

The Master of Human Resource Management focuses on developing expertise in contemporary human resource management issues. The course is for current managers who are seeking to extend their HR knowledge and improve skills necessary to engage in decision-making at senior levels within an organisation.

**Areas of Study**

Human resource management, managing change, management skills, industrial relations, employment and industrial law, diversity and inclusion, future of work.

**Professional Recognition**

Students completing this degree are eligible to apply to the Australian Human Resources Institute (AHRI) for the Professional Member (MAHRI) status and/or advancement to a higher level of membership for those who have appropriate work experience.

**Course Structure**

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04286](handbook.uts.edu.au/courses/c04286)

**Career Opportunities**

Career options include positions in change management and general management, human resources, and organisational training and development and employment relations.

---

**Graduate Diploma in Human Resource Management**

**Course Description**

The Graduate Diploma in Human Resource Management provides participants with sound knowledge and skills in the field of human resource management (HRM), enabling participants to develop expertise across the field of HRM and its issues, including employment relations and other management practices.

**Areas of Study**

Human resource management, managing change, people analytics, research and project management skills, industrial relations, employment and industrial law, diversity and inclusion, future of work.

**Professional Recognition**

Students completing this degree are eligible to apply to the Australian Human Resources Institute (AHRI) for the Professional Member (MAHRI) status and/or advancement to a higher level of membership for those who have appropriate work experience.

**Course Structure**

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c07113](handbook.uts.edu.au/courses/c07113)

**Career Opportunities**

Career options include management-level positions in industry or government related to HRM.
Graduate Certificate in Business Immersion and Career Transition

Course Description
The Graduate Certificate in Business Immersion and Career Transition introduces participants to workplace experiences through learning and applying a range of practical skills required by all employees.

Areas of Study
Problem solving and creativity, career and portfolio planning, managing staff and volunteers.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/cf1300

Career Opportunities
There are no direct career options; however, the experience in a range of different industry contexts and practical skills and knowledge gained by completing this course will improve employability.

Master of Management (Extension)

Course Description
The Master of Management enables students to develop an enterprise-wide view of organisations embedded in a global society, integrating views from back-office/shop-floor to boardroom to town-hall meetings. Such a view is deemed essential to prizing the work, people, places and processes needed in a publicly scrutinized global business environment. Students gain the knowledge, skills and conceptual frameworks to enable them to identify, question, and through deliberative processes, respond effectively to these complex and demanding issues. Public expectations of post-graduate managers are high when it comes to being prepared to make, defend and be morally accountable for their judgements impacting on people, communities and ecosystems.

Areas of Study
Managing, leading and stewardship, managing change, managing in a multicultural world, managing for sustainability, managing change, business literacies and the future, creative problem solving, business and social impact, managing staff and volunteers, global strategic management, human resource management, career and portfolio management, strategic supply chain management, operations and quality management, industrial relations, advocacy and social change, diversity and inclusion, measuring social impact.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04259

Career Opportunities
Career options include general and senior management level positions in industry, not-for-profit, social enterprises or government.

The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208)

# Master of Sport Management (Extension)

## Course Description

The Master of Sport Management (Extension) provides advanced insights into the operation of the sport industry, both in Australia and internationally. The course is designed to develop professional skills and knowledge to equip students for collaborative and leadership positions in the fast-growing, increasingly complex sport sector. With this in mind, the program includes subjects that develop a critical understanding of sport management across the areas of business, globalisation, governance, marketing, media, development, technology, innovation, and social impact. Importantly, the course is designed for students from diverse backgrounds and delivered using flexible learning methods, making it suitable for working professionals as well as domestic and international students.

## Areas of Study

Sport management, sport governance, sport development, sport business, applied research studies, venue management, marketing, sport media, integrity management, legal issues, volunteer management, sport globalisation, sport sponsorship, sport policy, sport for social impact, event management, sport event impacts and legacies.

## Course Structure

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04369](http://handbook.uts.edu.au/courses/c04369)

## Career Opportunities

Graduates may pursue careers in such fields as sport marketing, sport event management, venue and facility management, sports development, international relations, sports administration, sport media management and operations management.
Master of Sport Management

Course Description

The Master of Sport Management provides advanced insights into the operation of the sport industry, both in Australia and internationally. The course is designed to develop professional skills and knowledge to equip students for collaborative and leadership positions in the fast growing, increasingly complex sport sector. With this in mind, the program includes subjects that develop a critical understanding of sport management across the areas of business, globalisation, governance, marketing, media, development, technology, innovation, and social impact. Importantly, the course is designed for students from diverse backgrounds and delivered using flexible learning methods, thus making it suitable for working professionals as well as domestic and international students.

handbook.uts.edu.au/courses/c04290

Career Opportunities

Graduates may pursue careers in fields such as sport management, sport marketing, sport event management, venue and operations management, sports development, sport policy, international relations, and sports administration.

Graduate Diploma in Sport Management

Course Description

The Graduate Diploma in Sport Management provides a broad overview of the sport industry, and is designed to develop critical, interpretive and problem-solving skills relevant to that sector. With this in mind, the program includes subjects that develop a critical understanding of sport management across the areas of business, globalisation, governance, sport for social impact, and sport event management in both the Australian and international contexts.

Areas of Study

Sport governance, sport development, sport business, creativity and innovation management, integrity management, social impact studies, sport globalisation.

Course Structure

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c07029

Career Opportunities

The Graduate Diploma in Sport Management provides authentic engagement with the world of sport, producing graduates with specific skills and attributes of interest to employers in this sector. Graduates may pursue careers in fields such as sport management, sport marketing, sport policy, sports development, sport event management, and sports administration.
Master of Strategic Supply Chain Management (Extension)

Course Description
The course offers a comprehensive and holistic set of skills in the strategic and tactical aspects of operations, logistics, procurement and supply chain management. Students emerge from the course with contemporary and relevant knowledge that allows them to manage complex business operations that may extend globally.

This enables students to address the ever-growing interest among business managers and academics in supply chains, the emergence of advanced service economies, connected information systems including disruptive technologies, cloud computing and data analytics, new management practices and approaches, and the pressure of global competition.

Areas of Study
Management skills and business literacies, problem solving, creativity and solution setting, operations and quality management, strategic supply chain management, supply chain technology management, supply chain risk management, strategic procurement, services and network productivity with data analytics, supply chain management analytics, quantitative management, business project management, legal aspects of contracts administration, advanced quality management, judgement and decision making, and an experiential management capstone subject in the field of supply chain management.

Professional Recognition
This course has been accredited to MCIPS standard with the Chartered Institute of Procurement and Supply (CIPS). Following the completion of the course and three years’ relevant work experience, graduates are eligible to apply for MCIPS. Students who wish to apply for MCIPS must meet the following conditions:

- For the Business Literacies and the Future (21900) core subject students must complete their project/assessments tasks on a procurement and supply chain-related topic,
- For the Industry Research Project (21890) or the Internship Experience (26799) subjects, students must complete their project/assessments tasks on a procurement and supply chain-related topic, and
- Students must pass all subjects, with no credit given for any form of advanced standing, credit transfer, exemption or condonement.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04325

Career Opportunities
Career options include positions in operations and quality management, inventory management, service and network management, supply chain management, risk management, logistics management, and strategic procurement in any business sector.
Master of Strategic Supply Chain Management

Course Description

The ever-growing interest among business managers and academics in supply chains, the emergence of advanced service economies, connected information systems including disruptive technologies, cloud computing and data analytics, new management practices and approaches, and the pressure of global competition has placed a premium on those who have a broad understanding of how to plan and manage complex business operations and related processes. Further, in today's volatile environment, risk and complexity in supply chains have been major issues faced by industry which encourages businesses to engender a more organic capability to deal with unexpected disruptions. The Master of Strategic Supply Chain Management is designed for those who wish to gain significant insight and skills in these areas.

Areas of Study

Management skills and business literacies, operations and quality management, strategic supply chain management, supply chain technology management, supply chain risk management, strategic procurement, services and network productivity with data analytics, quantitative management, business project management, legal aspects of contracts administration and an experiential management capstone subject in the field of supply chain management.

Professional Recognition

This course has been accredited to MCIPS standard with the Chartered Institute of Procurement and Supply (CIPS). Following the completion of the course and three years' relevant work experience, graduates are eligible to apply for MCIPS. Students who wish to apply for MCIPS must meet the following conditions:

- For the Business Literacies and the Future (21900) core subject students must complete their project/assessments tasks on a procurement and supply chain related topic,
- Students must complete the following two electives as part of the options list:
  - 21946 Supply Chain Management Analytics
  - 77942 Legal Aspects of Contract Administration
- For the Industry Research Project (21890) or the Internship Experience (26799) subjects, students must complete their project/assessments tasks on a procurement and supply chain-related topic, and
- Students must pass all subjects, with no credit given for any form of advanced standing, credit transfer, exemption or condonement.

Course Structure

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04324

Career Opportunities

Career options include positions in operations and quality management, inventory management, service and network management, supply chain management, risk management, logistics management, and strategic procurement in any business sector.

Course code: C04324
CRICOS code: 084678C
Course duration: 1.5 Years
Number of credit points: 72
Intake: Feb/Jul
Location: City campus
Fees: A$22,895 per session

Academic and additional requirements: See page 158

English language requirements: See page 158
Graduate Diploma in Strategic Supply Chain Management

Course Description
The Graduate Diploma in Strategic Supply Chain Management extends the graduate certificate and provides the opportunity for further specialisation in supply chain management.

The course is designed to cater for the needs of those employed in the manufacturing or services sector, be it private, public or not-for-profit organisations, or whether it is a small- or medium-sized enterprise or a multinational corporation.

Areas of Study
Management skills, operations and quality management, strategic supply chain management, supply chain technology management, supply chain risk management, strategic procurement, services and network productivity with data analytics, business project management and legal aspects of contracts administration.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c07129

Career Opportunities
Career options include management-level positions in manufacturing and service industries and areas traditionally associated with business operations management.

Graduate Certificate in Strategic Supply Chain Management

Course Description
The Graduate Certificate in Strategic Supply Chain Management provides a solid introduction to business operations management for those wishing to gain some experience in this area.

Areas of Study
Management skills, operations and quality management, strategic supply chain management, supply chain technology management, supply chain risk management, strategic procurement and services and network productivity with data analytics.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11199

Career Opportunities
Career options include management-level positions in industry or government.

The published fee is per session, based on a full-time, 24 credit-point study load.

Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208).

▲ Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

Communication
With more than 30 years of teaching expertise, we’ve got the wisdom of experience led by the best in the field. We’re also young, vibrant and dynamic, shaped by the agility and entrepreneurial spirit that have come to define UTS.

CREATIVE THINKING
Develop creativity and critical-thinking skills through practical, technology-driven learning. You’ll learn to develop creative solutions to tackle real-world issues, and learn invaluable skills for your future career(s).

DIGITAL DISRUPTION
Digital disruption, the rise of new media – these are the forces reshaping the communication landscape today. So, we’ve embraced them and made them part of what we do, teach and research, and part of what you study.

PRACTICAL LEARNING
There’s no point learning theory if you don’t know how to apply it. Real-world assessments, professional placements and industry interaction will ensure you translate theory to practice and gain industry-relevant skills.

Daryl Jaramilla
Philippines
Public Relations Officer at the Department of the Interior and Local Government (DILG)
Master of Strategic Communication

“Everything I learned has been advantageous on my part because it has strengthened my capacity to communicate and assist in developing new communication efforts for the DILG. For instance, exploring postmodern and sociocultural views in strategic communication has greatly contributed to my understanding and appreciation of how crucial it is in an organisation.”
Pathway to UTS Communication

UTS College Graduate Certificate in Communication

The UTS College Graduate Certificate in Communication guarantees your way to a range of master’s degrees offered by the UTS Faculty of Arts and Social Science*. This program will give you the confidence, knowledge and skills you need to take your professional media and communication qualifications to the next level. With our personalised support, small class size and close ties to the Faculty of Arts and Social Science at UTS, we create a seamless transition from Pre-master’s program to a postgraduate degree.

Program benefits

- Direct entry into the second session of your UTS Communication master’s degree*
- Focuses on employability skills and improving career prospects
- Internationally recognised qualification
- Learn practical strategic communication practices

Pathways to UTS

This course leads to Master of Master of Strategic Communication (Extension) (C04410) or Master of Media Practice and Industry (Extension) (C04411) or Master of Advanced Journalism (Extension) (C04397) at UTS. The pathway you take into UTS will depend on your English language proficiency and academic qualifications.

More information

CRICOS code: 103557F (Accelerated), 103556G (Standard).
Course duration: Choose from 4 months (Accelerated) or 8 months (Standard)
Number of credit points to UTS degrees*: 24
Intake: Feb/Jun/Sept
Location: Sydney city campus
Fees: A$18,000 (Accelerated), A$23,500 (Standard)

* Articulation requirements to UTS master’s degrees vary for individual graduate certificates at UTS College. See website for details: utscollege.edu.au/pre-masters-programs
** You will only be required to enter a UTS College Academic English program if you do not meet the English language entry requirements.
Executive Master of Strategic Communication

Course Description
The Executive Master of Strategic Communication provides advanced study for communication professionals working in corporate, government, organisational or marketing communication, advertising, or public relations. The course is open to applicants with a minimum of three years experience in professional public communication and an undergraduate degree. Students can select corporate and marketing communication or government communication streams, and the course culminates with a practice-related project relevant to the student's field of interest. Course content addresses up-to-date issues, such as audience insights, through data analysis, digital communication, and strategic communication informed by research and evaluation.

Note: This course includes non-standard teaching sessions.

Areas of Study
Organisational strategy, communication strategy, contemporary digital communication, research methods to gain audience understanding and insights, research for evaluation of communication, advanced human communication theory, contemporary media including social media, ethics and intercultural and international communication.

Professional Recognition
Programs in the public communication discipline at UTS are accredited by the Public Relations Institute of Australia (PRIA). Students have access to free student membership of the PRIA and graduates have an accelerated path to professional membership of the PRIA.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04384

Career Opportunities
Graduates of this course are equipped to work in senior strategic planning and management roles in corporate, government, political, organisational, or marketing communication, advertising, public relations, or integrated communication, including positions related to marketing and promotion, stakeholder engagement, employee communication, community relations, media relations and public affairs.
**Master of Strategic Communication (Extension)**

**Course Description**

The Master of Strategic Communication (Extension) provides advanced study in public communication practices. It is relevant for graduates seeking a career in corporate, government, political, health, organisational or marketing communication, advertising, or public relations, and for communication professionals seeking to advance their career to senior level. The course includes theoretical and practical perspectives on up-to-date issues such as audience insights through ethical data collection and analysis, digital media communication, and strategic communication informed by research and evaluation.

**Areas of Study**

Organisational strategy, communication strategy, digital communication, research methods to gain audience understanding and insights, research for evaluation of communication, human communication theory, contemporary media including social media, ethics, and intercultural and international communication.

Master of Advanced Journalism (Extension)

Course Description
The Master of Advanced Journalism (Extension) is designed to meet the needs of mid-career journalists and graduates seeking a career change. It is a highly industry-focused course that equips students with deep knowledge of journalism, technical skills and the adaptive capacities needed in the current digital dominated media environment. Students who successfully complete the course have current, and forward-looking skills that allow them to operate in digital newsrooms and on other digital facing programs.

Class seminars are conducted by journalism professionals and academics. Students gain hands-on reporting, editing and other production experience with the opportunity to learn in a state-of-the-art ‘live’ newsroom under the tutelage of a highly experienced multimedia producer.

Areas of Study
Advanced journalism, broadcast and mobile journalism, journalism studies and defamation, drones, media accountability, numeracy, data and computational journalism.

Professional Recognition
- Graduates are eligible to apply for membership of the Media, Entertainment and Arts Alliance (MEAA)
- Students are eligible for student membership of the MEAA and access to the MEAA, Women in Media and Walkley Foundation network, which provides skill development programs.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04397

Career Opportunities
Career options include reporter, producer, presenter and editor across all types of private and public media, broadcast and publishing organisations including digital start-ups, the not-for-profit sector, content producer, content coordinator and non-media publishers.

Graduate Diploma in Creative Writing

Course Description
The Graduate Diploma in Creative Writing is part of an articulated program designed to meet a range of needs for those who want to start a career in writing or apply their communication skills to fiction, young-adult and/or speculative fiction, creative non-fiction and screenwriting. It is also for experienced writers who want to develop and enhance their practical writing skills as well as their ability to critically reflect on their practice.

Areas of Study
Non-fiction writing, advanced narrative writing, theory and creative writing.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c06041

Career Opportunities
Graduates apply their writing skills to fields such as advertising, editing and publishing, film and television, digital and experiential media, journalism and communications. Graduates start to have their work published or produced. Many graduates articulate into the Master of Arts in Creative Writing.

Master of Arts in Creative Writing

Course Description
The Master of Arts in Creative Writing is designed for experienced and emerging writers who want to develop and expand their practical skills in writing, as well as their critical knowledge about writing practices and the writing industry.

Areas of Study
Non-fiction writing, narrative writing, theory and creative writing, professional writing project.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04109

Career Opportunities
Graduates apply their writing skills to fields such as advertising, editing and publishing, screenwriting, film and television, digital and experiential media, storytelling for business, digital content creation, journalism and communications. Many graduates publish or have their work produced, from short stories and short films, to novels and feature films. Graduates also undertake creative doctorates.
Graduate Certificate in Media Practice and Industry

Course Description
The Graduate Certificate of Media Practice and Industry is part of an articulated program in media and creative practices that includes media industry transformations with respect to ethics, social justice, technology and sustainability and entrepreneurial, collaborative and iterative approaches to the ideas, practices and audiences for screen, digital media and emerging platforms. It offers an entry-level introduction to media and creative processes and practices.

Areas of Study
Media, production, ethical and sustainable practices, screen business and creative entrepreneurship, curation, design thinking, digital influence and media as experience, screenwriting, post-production and immersive media.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11289

Career Opportunities
The Graduate Certificate of Media Practice and Industry prepares students for advanced study and orients them to the media and creative industries, particularly roles such as creative and cultural producers who can incubate, produce and post-produce for screen, digital and emerging media.

Master of Media Practice and Industry

Course Description
The Master of Media Practice and Industry is for creative media graduates or experienced industry practitioners seeking to advance their skills and employability in a hybrid and dynamic media environment. The course is focused towards media industry transformations with respect to ethics, social justice, technology and sustainability. Students select from innovation, industry and production subject choices which share entrepreneurial, collaborative and iterative approaches to the ideas, practices and audiences for screen, digital media and emerging platforms. Curation, design thinking and project-based work are key aspects of the course which aims to produce graduates who can provide leadership to harness and shape opportunities in the field.

Areas of Study
Media, production, ethical and sustainable practices, screen business and creative entrepreneurship, curation, design thinking, digital influence and media as experience, screenwriting, post-production and immersive media.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04394

Career Opportunities
Graduates are creative and cultural producers who can incubate, produce and post-produce for screen, digital and emerging media. Career options include directors, producers, multiplatform storytellers, advertising creatives, festival and digital channel curators and post-production specialists in screen and immersive media. Graduates have the capacity to generate and deliver sophisticated creative media industry prototypes, portfolios and projects.

Design, Architecture and Building
Become a creative and critical thinker, build connections with acclaimed practitioners and develop solutions to the big challenges that shape the world we live in. At UTS Design, Architecture and Building, we’re leading change – and you can too.

INDUSTRY DRIVEN
Our curriculum is the result of ongoing engagement with industry, government and the creative sectors to address needs, understand growth areas and tackle emerging issues.

REAL CLIENTS
You’ll be applying up-to-date practices to real business scenarios and briefs. Depending on your degree, you could be addressing a challenge for Westfield or analysing a development for Lendlease.

PROGRESS WITH THE BEST
Learn from expert academic staff who are proven practitioners and world-class researchers.

FIND YOUR NICHE
Our many electives allow you to specialise in areas such as construction methodologies or sustainable design.

LATEST TECHNOLOGY
Use the latest software and professional equipment to bring your grand ideas to life.

Caroline Porto Valente
Brazil
PhD, School of Built Environment

“At UTS, not only could I develop general research skills such as data analysis and evaluation, but also had the opportunity to consolidate other professional and personal skills, such as communication, resilience, adaptability, problem-solving and design thinking, creativity and interpersonal skills. The UTS community is something out of this world.”
## Master of Design (Extension)

### Course Description
Unique in Australia, the Master of Design responds to the global need for graduates with skills in social and service design and design leadership, who can create and manage high level service experiences and lead social, community and organisational change. This comprehensive and integrated program has been developed in collaboration with industry leaders including the Design Innovation Research Centre situated in the School of Design at UTS.

### Majors
Service design, transition design, no specified major.

### Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04428

### Career Opportunities
Graduates' careers are enhanced by higher-level design knowledge and expertise, with specialised knowledge in social and service design or design leadership.

### Career Opportunities
Graduates' careers are enhanced by higher-level design knowledge and expertise, with specialised knowledge in social and service design or design leadership.
Graduate Certificate in Design

Course Description
The Graduate Certificate in Design is an entry-level postgraduate course that allows students with a Bachelor’s degree in a discipline other than Design to transition into the Master of Design (Service Design) or Master of Design (Design Leadership). The course draws on aspects of the School’s highly-regarded undergraduate design program to provide the design research and practice fundamentals required for the emerging and increasingly important disciplines of Social and Service Design, and Design Leadership.

Areas of Study
Design.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11225

Career Opportunities
The course offers graduates in a non-design background an opportunity to acquire design research, visualization and prototyping skills that allow them craft persuasive design propositions. Graduates’ careers are enhanced by higher-level design knowledge and expertise. Students wishing to acquire more developed skills in social and service design or design leadership should choose to complete the Master of Design (C04429).

Master of Architecture

Course Description
The Master of Architecture is a focused, professional degree and is required to become a practising architect. It is the second of two degrees, undertaken after the successful completion of the Bachelor of Design in Architecture (C10004) or equivalent.

Areas of Study
Design, architecture history and theory, communication, construction, sustainability, environmental control, architectural practice, urban development, urbanism, materials, fabrication, computational media, planning, visualisation.

Professional Recognition
The Master of Architecture is a qualification accepted for candidates seeking to take the professional examination of the NSW Architects Registration Board and Royal Australian Institute of Architects (RAIA), as a prerequisite for registration under the provision of the Architects Act administered by the NSW Architects Registration Board, and to professional membership of the institute.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04235

Career Opportunities
Career options include architect, designer, urban designer, architectural critic, journalist, exhibition designer, and more.
Master of Landscape Architecture

Course Description
The Master of Landscape Architecture provides students with the opportunity to collaborate alongside celebrated practitioners from award-winning international design studios and leading experts in the area of urban design.

Students engage in a variety of projects that are based upon the big questions that face global contemporary cities and landscapes: urban densification, climate change, declining resource supply (land, food and water) and the loss of biological diversity through ecological fragmentation and habitat destruction.

Using the most relevant and up-to-date methodologies and technologies, students participate in practice-based studios to develop their complex problem-solving skills in order to address the critical role of landscape in the cities of the future.

Areas of Study
History and theory, landscape analysis and planning, construction technology, management of technical skills, natural and cultural systems, communication and research, professional ethics, professional practice.

Professional Recognition
This course is accredited by the Australian Institute of Landscape Architects (AILA).

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04270

Career Opportunities
Career options include landscape architect, urban designer, researcher, land management professional, regional planner, educator and policymaker.

Graduate Diploma in Landscape Architecture

Course Description
This course has been established to address skill deficits in domestic and international students wishing to enrol in the UTS Master of Landscape Architecture. This course is offered as a pathway to the accredited Masters of Landscape Architecture. The completion of the graduate diploma provides eligibility for entry into the first year of the master’s.

Areas of Study
Research cultures (architecture and landscape architecture), finance and project management, practice management and law, professional practice, cartographic techniques and methods, botany, topographic archetypes, ecological systems for landscape architects, landscape construction.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c06125

Career Opportunities
After students complete the Master of Landscape Architecture, career options are: landscape architect, urban designer, researcher, land management professional, regional planner, educator and policymaker.
Graduate Certificate in Landscape Architecture

Course Description
This course is suitable for those who wish to change careers, for qualified Landscape Architects who want to update their skills, or for anyone wanting to undertake an accredited Masters of Landscape Architecture at UTS via the Graduate Certificate in Landscape Architecture.

Based on prior experience and faculty advice, applicants choose from the wide range of studio, technical and theory subjects taught in the undergraduate program to create a tailored curriculum such as the example provided under the course program.

Areas of Study
Finance and project management, cartographic techniques and methods, botany, landscape infrastructure.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11275

Career Opportunities
After students complete the Master of Landscape Architecture, career options are: landscape architect, urban designer, researcher, land management professional, regional planner, educator and policymaker.

Master of Planning

Course Description
The Master of Planning provides a new career path for design, planning and property professionals, equipping graduates with a broad understanding of planning issues alongside the negotiation skills and creative thinking required to resolve them.

Areas of Study
Major social and environmental issues of cities and regions; economics and practicalities of how development takes place; processes of strategic planning and development control as subjects of academic inquiry; planning decisions and their influence on cost, function, feasibility, building form and aesthetics.

Professional Recognition
This program is accredited by the Planning Institute of Australia.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04007

Career Opportunities
The degree enables professionals to change careers due to the multidisciplinary nature of the learning. Graduates are in public sector positions, including working for state and local government, and in private consulting and property development firms. There are also careers in strategic planning on major developments and projects, master planning with financial analysis, and the increasingly important area of sub-regional planning.
### Graduate Certificate in Planning

**Course Description**
The Graduate Certificate in Planning offers an entry pathway to the Master of Planning (C04007) for students who have professional experience in planning but do not have an appropriate undergraduate qualification, or have a bachelor’s degree in an unrelated field.

**Areas of Study**
Property development process, planning and environmental law, urban development, urban design.

**Course Structure**
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11270

**Career Opportunities**
Graduates are employed in strategic planning on major developments and projects, master planning with financial analysis, and the increasingly important area of sub-regional planning.

### Graduate Certificate in Project Management

**Course Description**
UTS’s postgraduate project management program is designed to enhance the knowledge, experience and careers of both aspiring and experienced project managers. The UTS Graduate Certificate in Project Management equips students with foundational knowledge and experience to launch or enhance project management careers across all industries - such as banking and finance, construction and engineering, event management, government, health and information technology.

Graduates of the Graduate Certificate in Project Management who wish to extend their studies will gain full credit for the Graduate Certificate subjects when they enrol in the Master of Project Management.

**Areas of Study**
Project management context, processes and competencies (strategic, tactical and operational).

**Course Structure**
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11005

**Career Opportunities**
UTS Graduate Certificate in Project Management produces graduates with skills and experiences that enable them to establish or enhance their careers as project managers. Graduates are in high demand by local and international organisations across industries such as banking and finance, construction and engineering, event management, government, health and IT.
Master of Project Management

Course Description

The UTS Master of Project Management is designed to enhance the knowledge, experience and careers of both aspiring and experienced project managers. This course equips students with the underlying knowledge and practical experience to drive project delivery across all industry sectors, such as information technology, construction and health.

Areas of Study

Project portfolio, strategic project management, managing organisations by project, project performance assessment, graduate project, construction, information technology, engineering, business.

Professional Recognition

The UTS Master of Project Management is accredited by the Project Management Institute’s (PMI) Global Accreditation Centre for Project Management Education Programs (GAC) and the Royal Institute of Chartered Surveyors (RICS). The Master of Project Management is also endorsed by the Australian Institute of Project Management (AIPM).

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04006

Career Opportunities

Graduates of the UTS Master of Project Management gain high rates of employment and top salaries. They are in strong demand by industry due to their professional preparation and ability to merge theory with practice to improve project performance. The Master of Project Management’s focus on leadership, program management and governance enhances the employability of graduates at senior levels in local and international industries, including banking and finance, construction and engineering, event management, government, health and IT.

Graduate Certificate in Property Development

Course Description

The Graduate Certificate in Property Development offers an entry pathway to the Master of Property Development (C04008) for students who have professional experience in property but do not have an appropriate undergraduate qualification, or who have a bachelor’s degree in an unrelated field.

Areas of Study

Property development processes, planning and environmental law, property transactions, residential property valuation methodology.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11271

Career Opportunities

The degree enables professionals to change careers due to the multidisciplinary nature of the learning. Graduates are in public sector positions, including working for state and local government, and in private consulting and property development firms.

The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208)

▲ Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

### Graduate Diploma in Property Development

**Course Description**

The Graduate Diploma in Property Development provides a comprehensive understanding of the property development process combined with the practical skills required to work effectively in the industry. This incorporates the political, financial, legal and physical systems that contribute to the successful development of property assets.

**Areas of Study**

Building technology and regulation, property transactions, environment and control, property analysis.

**Course Structure**

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c06006](http://handbook.uts.edu.au/courses/c06006)

**Career Opportunities**

The degree provides property-related professionals such as architects, engineers, construction managers, valuers, planners and business or finance professionals the opportunity to broaden their knowledge and qualifications and obtain a more holistic understanding of property development and related processes. This enables graduates to expand their careers or move outside of their original professional area to higher or broader roles within the property development industry and/or offer new services to clients.

### Master of Property Development

**Course Description**

UTS’s Master of Property Development provides a comprehensive understanding of the property development process combined with the practical skills required to work effectively in the industry. This incorporates the political, financial, legal and physical systems that contribute to the successful development of property assets.

**Areas of Study**

Planning, law, urban development, sustainability, valuation, property development, project management, transactions, urban renewal, finance.

**Professional Recognition**

The course is accredited by both the Australian Property Institute and the Royal Institute of Chartered Surveyors.

**Course Structure**

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04008](http://handbook.uts.edu.au/courses/c04008)

**Career Opportunities**

The degree provides property-related professionals such as architects, engineers, construction managers, valuers, planners and business or finance professionals the opportunity to broaden their knowledge and qualifications and obtain a more holistic understanding of property development and related processes. This enables graduates to expand their careers or move outside of their original professional area to higher or broader roles within the property development industry and/or offer new services to clients.

Graduates completing the UTS Master of Property Development Valuation sub-major meet the educational requirements for accreditation as a Certified Practising Valuer (CPV) by the Australian Property Institute.

Master of Property Development and Investment

Course Description
This course is designed for both property and real estate investment practitioners, and graduates in related fields who wish to extend their qualifications and expertise in property development and investment. Graduates have a commitment to professionalism in the property and real estate investment sectors.

Areas of Study
Property development, property investment.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04315

Career Opportunities
Career options include positions in banking and government instrumentalities, real estate finance, property management and development, and real estate investment.

Master of Property Development and Planning

Course Description
This course is designed for both property and planning practitioners, and graduates in related fields who wish to extend their qualifications and expertise in property development and planning. Graduates have a commitment to professionalism in the property and planning sector.

Areas of Study
Property development, property planning.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04316

Career Opportunities
Career options include positions in planning at local, metropolitan, and regional level, and property development in the private and public sectors.

Master of Property Development and Project Management

Course Description
The UTS Master of Property Development and Project Management is designed to enhance knowledge and opportunities for professionals in property and project management, and to enable graduates in related fields to extend their qualifications and expertise to embark on careers in property development and project management.

Areas of Study
Property development, project management.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04317

Career Opportunities
Graduates of the UTS Master of Property Development and Project Management are equipped to move into careers in the property or project management disciplines. For those already working as property and project management professionals, the course opens up opportunities to move into more senior roles and enhance their leadership in those industries. Career options include a wide range of property and project management positions in both the public and private sectors.
Master of Real Estate Investment

Course Description
The UTS Master of Real Estate Investment gives investment, property and finance professionals a competitive advantage in the global property investment boom. It deals with the finance, investment, management, valuation and analysis knowledge required to succeed in the global real estate investment sector. Students are able to integrate highly sought-after property and finance skillsets and advance their career.

Areas of Study
Finance, property feasibility and valuation, property market analysis, capital markets, fund management, commercial property, retail property.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04294

Career Opportunities
This degree provides the analytical skills for professionals to be promoted more rapidly into decision-making and leadership positions, or gain access to boutique real estate investment firms.

Career opportunities may include advising or managing property investment portfolios, acquisitions and sales, within the property or finance industry, or working for a specialist research firm that does market analysis, forecasting and projections. The course provides new career options for people who work within the property and finance sectors, including analysts, valuers, managers, advisors, economists and accountants.

Graduate Diploma in Construction Management

Course Description
Construction management is one of the most rapidly expanding sectors of specialisation in Australia. Construction management specialists have very good job prospects in both construction and infrastructure work areas. The particular mix of skills offered in this degree combine traditional project management frameworks along with specialised preparation in technological advancements and human factors that are a requirement for successful managers in the construction industry.

Areas of Study
Construction management, construction technology and methodology; time, cost and quality management; risk; professional ethics; industrial relations and contract administration, estimating, programming and building information modelling.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c06126

Career Opportunities
The course is aimed primarily at career changers, in particular those from other built environment industries interested in expanding their portfolio of skills. Career options include a range of management roles related to the construction sector, such as project, construction, design, environmental, site, contract or facility management; construction economics; quantity surveying; construction programming, cost engineering, estimating or property development.
Master of Local Government

Course Description
The Master of Local Government provides professionals, managers and leaders in local government with an advanced body of knowledge and skills to reflect critically on theory and practice. This enables them to apply this knowledge in their roles in strategic thinking, planning and shaping local communities.

Areas of Study
Local government studies, public value, public administration, leadership, social planning, service delivery, research methodologies, governance, governance structures, strategic planning, environmental management.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04257

Career Opportunities
The course is highly suited to professionals wishing to progress their careers as senior managers and leaders of local councils. It is also highly recommended for public administrators and policymakers from other tiers of government, and managers from the non-government sector who partner on a regular basis with local government and wish to better understand the principles and practices of local governance.

Graduate Diploma in Local Government

Course Description
In the context of rapid technological and socioeconomic change, public administrators working in local government need a high level of professional expertise, a broad range of managerial and organisational skills, and a sound understanding of the changing needs and priorities of the sector and their communities. The teaching and learning provided through this course provides an opportunity for such practitioners to broaden their professional knowledge and skills, underpinned by a strong foundation in public service and democratic values and principles.

Areas of Study
Corporate management and organisation change, social planning and development, integrated strategic planning, local environmental management, local government service delivery, perspectives in leadership, personal and professional leadership skills.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c06033

Career Opportunities
The course is particularly suited to local government middle-tier managers and unit leaders who wish to advance their careers. It is also highly recommended for public administrators from other tiers of government and professionals from the non-government sector who work in partnership with local councils for the benefit of local and regional communities.

Graduate Certificate in Social and Service Design

Course Description
The UTS Graduate Certificate in Social and Service Design enables professionals to develop their capability to design service responses to complex social problems they face every day.

This practical learning program is aimed at equipping students with a design-based methodology in social service design. That methodology provides a structure for reframing problems and can be employed to transform public engagement, practices, services, regulations, policies, organisations and communities.

The course utilises an experiential, peer-learning model within the teaching program and the learning environment offers a great opportunity for collaboration and idea-sharing with fellow students across disciplines and sectors.

To discover more, read on or download a course guide.

Areas of Study
International public sector innovation frameworks, frame creation methodology, design-based innovation, managing complex public innovation projects, innovation culture and collaboration, understanding problem complexity and behaviour, creative and iterative problem solving.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11257

Career Opportunities
The course is designed for professionals looking to progress their career through the acquisition of design-led innovation and organisational transformation techniques, or professionals looking to redirect their practice towards service design or design for social innovation.

Course code: C11257
CRICOS code: 093568A
Course duration: 0.5 Years
Number of credit points: 24
Intake: Feb/Jul
Location: City campus
Fees: A$21,400 per session

Education
Think differently about how you contribute to the world and to education. We are practice-oriented, research-inspired, technology-linked, and creative – all with a global outlook.

PRACTICAL LEARNING
We’ve established more than 200 secondary school partnerships, where you’ll gain hands-on experience. You’ll also study alongside students from various industries, giving you access to diverse perspectives.

PURPOSE-BUILT FACILITIES
Our purpose-built facilities are second to none. From customised science and maths teaching environments to dedicated research hubs, our spaces are designed to shape your education practice.

BEYOND BOUNDARIES
A global perspective is critical to education. You’ll study with students across a range of careers/industries and multicultural backgrounds which will offer you a different perspective when solving problems.

Teacher AMEP/LLN Learner Support
Graduate Diploma in Applied Linguistics and TESOL

“I participated in two teaching practicums at two TAFE campuses which allowed me to work with qualified ESOL/AMEP teachers and to acquire an initial understanding of teaching and assessing requirements in the TESOL industry. With valuable feedback from my TAFE cooperating teachers and supervisors from UTS, the teaching experience gave me the chance to align what I have learnt and how to apply it in practice. It also allowed me to build important industry connections, with that, I was able to obtain references which helped to land my first job offer as a part-time teacher at TAFE.”
Master of Teaching in Secondary Education

Course Description
This teacher education preparation course provides students with a master's qualification to teach in NSW secondary schools. Students who have both the required undergraduate degree and specialisation subjects can complete the course in two years. The course offers major studies in English, Mathematics, Science (Biology and/or Chemistry and/or Earth and Environmental Science and/or Physics), HSIE (Business Studies and/or Economics and/or Society and Culture and/or Legal Studies), Technological and Applied Studies (Engineering Studies and/or Software Design and Development and/or Industrial Technology Graphics and Multimedia and/or Information Processes and Technology), English/HSIE, English/EAL/D, Science/Mathematics, HSIE/Mathematics, Science/EAL/D, Mathematics/EAL/D, and Mathematics/Physics.

The core component provides research-based studies of educational theory and practice as a basis for professional decision-making in the secondary school context; the major component provides teaching methods; and the professional experience component includes both campus-based and field-based experiences, and is available in each of the specialisation areas.

Majors
English, Mathematics, Science (Biology and/or Chemistry and/or Earth and Environmental Science and/or Physics), HSIE (Business Studies and/or Economics and/or Society and Culture and/or Legal Studies), Technological and Applied Studies (Engineering Studies and/or Software Design and Development and/or Industrial Technology Graphics and Multimedia and/or Information Processes and Technology), English/HSIE, English/EAL/D, Science/Mathematics, HSIE/Mathematics, Science/EAL/D, Mathematics/EAL/D, and Mathematics/Physics.

Professional Recognition
This course is accredited by the NSW Education Standards Authority (NESA) as a recognised secondary school teaching qualification. To gain employment as a teacher in NSW schools, graduands must meet the requirements of the NESA, including language proficiency.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04255

Career Opportunities
Career options include secondary school teaching in the chosen specialisations in a public or private school, locally or internationally (subject to meeting relevant employer requirements).  

Please note: Applicants are advised to check with potential employing bodies regarding employment requirements. As of the date of publication, can be found online (https://educationstandards.nsw.edu.au/wps/portal/nesa/teacher-accreditation/teaching-qualifications/accredited-degrees). Both public and private sector schools can set eligibility requirements relating to academic performance among other criteria. Requirements to teach internationally can vary from country to country.
Master of TESOL and Applied Linguistics (Extension) ▲

Course Description

UTS is a leading provider of postgraduate TESOL and applied linguistics courses, with academics who are published authors and internationally recognised experts in the field. This course meets the advanced professional development needs of a wide range of English language teachers in Australia and provides an internationally recognised qualification for teaching children, teenagers and adults, including higher education students. The course features flexible study options, with classes held at times suitable for students working standard full-time hours. Credit recognition may be available.

Areas of Study

TESOL Methodology; TESOL Practicum; Introducing Knowledge about Language; The Multilingual Learner; Teaching Grammar and Vocabulary; two specialised subjects with practicum for teaching in English for Academic Purposes sector, Adult Literacy and Numeracy, or EAL/D and Literacy in schools; Research Literacies; electives in TESOL and Applied Linguistics, including Independent Study Project

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04420

Career Opportunities

Career options include teacher of English as an additional language, adult literacy and numeracy/foundation skills in Australia or overseas, curriculum developer and program manager in the TESOL/ literacy and numeracy sector (applicants are advised to check with potential employing bodies regarding employment requirements).

Master of TESOL and Applied Linguistics ▲

Graduate Diploma in TESOL and Applied Linguistics ▲

**Course Description**

UTS is a world-leading provider of postgraduate language and literacy courses, with academics who are published authors and internationally recognised. UTS is a leading provider of postgraduate TESOL and applied linguistics courses, with academics who are well connected in the English language and literacy teaching fields in Australia and overseas. The staff are published authors and internationally recognised experts in the field. This course meets the professional development needs of a wide range of English language and literacy teachers in Australia and provides a recognised qualification for teaching English as an additional; language and literacy to children, teenagers and adults. The course features flexible study options, with classes held at times suitable for students working standard full-time hours. Credit recognition may be available. This course is designed to meet the specialist requirements for English language teachers of adults in the Australian vocational education and training sector and the ELICOS sector. This program is also suitable for qualified school teachers seeking a specialist qualification in EAL/D teaching.

**Areas of Study**

TESOL Methodology, TESOL Practicum; Introducing Knowledge about Language; The Multilingual Learner; Teaching Grammar and Vocabulary; two specialised subjects with practicum for teaching in English for Academic Purposes sector, Adult Literacy and Numeracy, or EAL/D and Literacy in schools; elective in TESOL and Applied Linguistics.

**Course Structure**

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c06116

**Career Opportunities**

Career options include teacher of English as an additional language, adult literacy and numeracy/foundation skills in Australia or overseas (applicants are advised to check with potential employing bodies regarding employment requirements).

Graduate Certificate in TESOL and Applied Linguistics ▲

**Course Description**

UTS is a leading provider of postgraduate TESOL and applied linguistics courses, with academics who are well connected in the English language and literacy teaching fields in Australia and overseas. The staff are published authors and internationally recognised experts in the field. This course meets the professional development needs of a wide range of English language teachers in Australia and provides a recognised qualification for teaching English as an additional; language and literacy to children, teenagers and adults. The course features flexible study options, with classes held at times suitable for students working standard full-time hours. Credit recognition may be available.

**Areas of Study**

TESOL Methodology, TESOL Practicum, Introducing Knowledge about Language, The Multilingual Learner

**Course Structure**

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11254

**Career Opportunities**

Career options include a teacher of TESOL in Australia or a teacher of English as foreign language (EFL) in overseas contexts (applicants are advised to check with potential employing bodies regarding employment requirements).
The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208).

Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.

Course code: C06116

The engineering industry is evolving. Stay up-to-date with the latest technical knowledge and key leadership skills so you can gain a competitive edge with employers. Work with global experts in state-of-the-art facilities and revolutionise the future.

**FLEXIBLE WORK-LIFE BALANCE**
We understand there’s more to life than study. Schedule classes for day or night around your other life commitments.

**BE AMONG THE BEST**
We’re ranked in the top 100 universities globally for Engineering and Technology (QS Field Rankings 2022).

**PIONEERS IN RESEARCH**
Our research centres are recognised as world leading by our partners and industry.

**INNOVATION HUB**
UTS is located in an innovation precinct surrounded by 40 per cent of Australia’s top startup firms.

**INTERNATIONAL PERSPECTIVES**
Address global challenges through interdisciplinary connections with international universities, researchers and industry partners.

Product Activation Marketer, 3M

Master of Engineering Management, Master of Business Administration

“I thrived on the collaborative nature of my course, and the wealth of opportunities to balance theoretical knowledge with practical application.”
Pathway to UTS Engineering

**UTS College Graduate Certificate in Technology Practice**

The UTS College Graduate Certificate in Technology Practice guarantees your way to a range of exciting master's degrees offered by the UTS Faculty of Engineering and Information Technology (FEIT)*. This program will give you the confidence, knowledge and skills you need to take your professional engineering or IT qualifications to the next level. With our personalised support, small class size and close ties to the UTS Faculty of Engineering and Information Technology, we create a seamless transition from Pre-master’s program to postgraduate degree.

**Program benefits**

- 24 credit points with guaranteed entry to UTS*
- Direct entry into the second session of your UTS Engineering or Information Technology master’s degree*
- Focuses on employability skills and improving career prospects
- Internationally recognised qualification
- Learn practical technology solutions and systems management

**Pathways to UTS**

This course leads to Master of Engineering (Extension) (C04277), Master of Professional Engineering (C04309), Master of Information Technology (Extension) (C04296), Master of Information Technology (C04295) or Master of Data Science and Innovation (C04372) at UTS. The pathway you take into UTS will depend on your English language proficiency and academic qualifications.

**More information**

For further details, including academic and English language requirements, please refer to the UTS College website:

---

**UTS Engineering beyond Australia**

You can also study postgraduate Engineering at UTS in China. Our fully accredited offshore courses are taught at SHU-UTS SILC Business School (SILC) at Shanghai University.

[uts.edu.au/study/international/offshore-courses](https://uts.edu.au/study/international/offshore-courses)
**Master of Engineering (Extension)**

**Course Description**

This course provides an opportunity at master’s level for professional engineers to extend in depth and breadth the knowledge and skills gained in their undergraduate studies. The course is an extension of the traditional Master of Engineering (C04271) in that it also includes a sub-major in one of the fields offered as majors.

The course follows an integrated approach to professional practice through professional engineering subjects, subjects relating to the major and sub-major, an independent project in at least one field of engineering, and a set of electives. Students who wish to undertake a more substantial research project have the opportunity to transfer to the Master of Engineering (Advanced) (C04278).

**Majors**

Biomedical engineering, civil engineering, computer control engineering, cyber security engineering, electrical energy systems, environmental engineering, geotechnical engineering, manufacturing engineering and management, operations, robotics, software systems engineering, structural engineering, telecommunications and electronics, water engineering, no specified major.

**Sub-Majors**

Biomedical engineering, civil engineering, computer control engineering, cyber security engineering, electrical energy systems, environmental engineering, geotechnical engineering, manufacturing engineering and management, operations engineering, robotics, software systems engineering, structural engineering, telecommunications and electronics, water engineering, no specified sub-major.

**Course Structure**

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04277

**Career Opportunities**

Students who hold an undergraduate engineering degree are able to enhance their knowledge and ability through postgraduate-level study in their respective majors, enabling them to gain and hold employment in relevant engineering fields. The course allows students to be desirable to employers that seek multidisciplinary teams.
Master of Engineering

Course Description

This course provides an opportunity at master's level for professional engineers to deepen the knowledge and skills gained in their undergraduate studies while expanding their managerial and professional engineering knowledge.

The course follows an integrated approach to professional practice through disciplinary and professional engineering subjects, subjects relating to the chosen major, an independent project, and a set of electives. Students who wish to undertake a more substantial research project have the opportunity to transfer to the Master of Engineering (Advanced) (C04278).

Majors

Biomedical engineering, civil engineering, computer control engineering, cyber security engineering, electrical energy systems, environmental engineering, geotechnical engineering, manufacturing engineering and management, operations, robotics, software systems engineering, structural engineering, telecommunications and electronics, water engineering, no specified major.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04271

Career Opportunities

Students who hold an undergraduate engineering degree are able to enhance their knowledge and ability through postgraduate-level studies in their respective majors, enabling them to gain and hold employment in relevant engineering fields.

Graduate Certificate in Engineering

Course Description

This course is designed to provide an opportunity for professional engineers to extend their knowledge and update their skills in line with recent advances.

Majors

Biomedical engineering, civil engineering, computer control engineering, cyber security engineering, electrical energy systems, environmental engineering, geotechnical engineering, manufacturing engineering and management, operations engineering, robotics, software systems engineering, structural engineering, telecommunications and electronics, water engineering, no specified stream.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11236

Career Opportunities

Students who hold an undergraduate engineering degree are able to enhance their knowledge and skills in their respective streams (majors), enabling them to gain and hold employment in relevant engineering fields.
Master of Professional Engineering

Course Description
This course provides an opportunity at master’s level for technical specialists and professional engineers who have completed either a three-year Bachelor of Technology, three-year Bachelor of Engineering Science or a four-year Bachelor of Engineering to graduate with an Engineers Australia-accredited, professional engineering qualification. The course enables students to deepen knowledge and expertise in their field of specialisation to be ready to practise in engineering.

The Master of Professional Engineering is designed to incorporate an integrated approach to professional engineering practice through professional engineering subjects, major-specific subjects, an independent project, and engineering practice stream.

Students who have completed a Bachelor of Engineering that is accredited by Engineers Australia should apply for the Master of Engineering (C04271) or Master of Engineering (Extension) (C04277).

Majors
Biomedical engineering, civil engineering, cyber security engineering, electrical energy systems, mechanical engineering, robotics, telecommunications and electronics.

Professional Recognition
The Master of Professional Engineering (Biomedical, Civil and Mechanical majors) is accredited by Engineers Australia at the Graduate Professional Engineer level, and is recognised internationally by signatories to the Washington Accord. The Cyber Security Engineering, Electrical Energy Systems, Robotics and Telecommunications and Electronics majors are provisionally accredited, pending full accreditation.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04309

Career Opportunities
Students who hold an undergraduate engineering degree are able to enhance their knowledge and ability through postgraduate-level studies in their chosen major, enabling them to gain and hold employment in relevant engineering fields.

Master of Engineering Management

Course Description
The Master of Engineering Management (MEM) is an opportunity for engineers, technical specialists and non-technical professionals to build and stretch their managerial skills and integrate their business and technical knowledge.

The duration of this course is one and a half years; however, applicants with a recognised bachelor’s degree are eligible for recognition of prior learning of up to four subjects and are thus able to complete the course in one year on a full-time basis.

Areas of Study
Engineering management.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04275

Career Opportunities
The MEM program provides an opportunity for those who aspire to excellence to challenge themselves at the master’s level, deepen their skills and knowledge and gain a competitive edge in the industry.
Graduate Certificate in Engineering Management

Course Description

This course is designed to provide management knowledge which can be tailored to fit students' needs. It is designed to provide practising engineers with extended knowledge beyond their first degree and to update knowledge and skills in recent advances in engineering, technology and business practice. The subjects offered follow an integrated approach to professional practice through a choice of professional engineering subjects and an elective.

Areas of Study

Engineering management.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11239

Career Opportunities

Knowledge and skills in technical management gained from completing this course can assist practising professionals to understand management jargon and practices and gain advantage in applying for engineering management positions.

Master of Engineering Management Master of Business Administration

Course Description

This course has been developed by the Faculty of Engineering and Information Technology and the UTS Business School to provide professional engineers with the advantages of a generalist Master of Business Administration alongside a focused program in engineering management. The course follows an integrated approach to professional practice through engineering management/professional engineering subjects, business administration subjects, and an independent project in engineering management.

Areas of Study

Engineering management, business administration.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04274

Career Opportunities

This course is suitable for professional engineers who want to upskill in engineering management and business administration with the aim of taking up leadership roles.
Master of Engineering Master of Engineering Management

Course Description
This program allows students to complete the Master of Engineering (ME) and the Master of Engineering Management (MEM) in two years of full-time study. The course follows an integrated approach to professional practice through professional engineering subjects, subjects relating to the major, an independent graduate project (in the area of the major), and a set of electives.

Majors
Biomedical engineering, civil engineering, computer control engineering, cyber security engineering, electrical energy systems, environmental engineering, geotechnical engineering, manufacturing engineering and management, robotics, software systems engineering, structural engineering, telecommunications and electronics, water engineering, no specified major.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04273

Career Opportunities
Students who hold an undergraduate engineering degree are able to enhance their ability and knowledge through postgraduate-level studies in their respective majors, and gain knowledge and skills that enhance their ability to progress to engineering management roles.

Master of Environmental Engineering Management

Course Description
This course is designed to enable engineers and other technical specialists to take a leadership role in the field of environmental engineering and management. The course deals with the broad aspects of environmental management relevant to practising professionals in engineering science, planning, architecture, law, surveying, health and building. Engineers, scientists, town planners and other professionals working in this field have a compelling duty to ensure that the adverse effects of development on the total environment are minimised.

The duration of the course is one-and-a-half years; however, applicants with a recognised bachelor's degree in engineering or the natural and physical sciences are eligible for recognition of prior learning of up to four subjects and are thus able to complete the course in one year on a full-time basis.

Areas of Study
Environmental management, engineering management.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04272

Career Opportunities
This course is of relevance to practising professionals in architecture, building, engineering science, health, law, planning and surveying. Career options include positions in government agencies or private corporations, or as consultants.
Graduate Certificate in Environmental Engineering Management

Course Description
This course deals with the broad aspects of environmental management relevant to practising professionals in engineering science, planning, architecture, law, surveying, health and building. Engineers, scientists, town planners and other professionals working in this field have a compelling duty to ensure that the adverse effects of development on the total environment are minimised. The subjects offered in this course follow an integrated approach to professional practice through a choice of compulsory subjects in professional engineering, environmental engineering management and an elective.

Areas of Study
Environmental management, engineering management.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11237

Career Opportunities
This course is of relevance to practising professionals in architecture, building, engineering science, health, law, planning and surveying.

Graduate Certificate in Engineering Studies

Course Description
This course qualifies individuals who apply a body of knowledge in a range of contexts to undertake professional work and provides a pathway for further learning in engineering. Students with a bachelor's degree in a non-cognate engineering field can apply to this course. All applications are assessed individually and the course structure is tailor-made based on the basic qualifications that students possess.

Applicants without a degree but who have a TAFE diploma or equivalent qualification in engineering and significant related work experience are also considered.

Areas of Study
Engineering, engineering management.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11238

Career Opportunities
This course allows professionals who are currently employed, or would like to pursue employment in engineering organisations, to understand and gain advantage in securing and retaining employment.
The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208).

Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

Unlock the future of elite sport. Our flexible high performance sport programs prepare you to work across the breadth of elite-level sports, both in Australia and overseas.

REAL-WORLD KNOWLEDGE, DELIVERED BY EXPERTS
Our course content is practical and evidence-based; it’s developed in consultation with industry partners with the latest findings from our internationally-recognised researchers. We’re rated 5 (well above world standard) for human movement and sports science research by the Australian Research Council’s Excellence in Research for Australia (ERA) initiative 2018.

BENEFIT FROM OUR INDUSTRY CONNECTIONS
Our state-of-the-art facility is in the middle of Sydney’s sporting precinct at Moore Park, facilitating our connections with elite sporting organisations. You’ll learn from industry and academic leaders who work with high performance experts internationally, advancing the performance of athletes in the AFL, NRL, NBA, NFL, EPL and more.

STUDY ONLINE WITH EMBEDDED PRACTICAL LEARNING
Learn online, supported by academics and engaging with your classmates – and put your learning into practice with industry-connected, work-integrated learning streams in every session.

Dr Blake McLean
PhD, ASpS2, AHPM, CSCS, ASCA
Course Coordinator

“High Performance Sport is a constantly evolving field. Our courses are built from our world-class research and extensive input from industry partners, to ensure you graduate ready to work at an expert level in high performance sport, in a variety of settings.”
Master of High Performance Sport

Course Description

The Master of High Performance Sport is designed for students from diverse backgrounds and delivered using flexible learning methods suitable for working professionals, domestic and international students. The course structure enables full-time or part-time study where students can enter or exit at a Graduate Certificate (4 subjects), Graduate Diploma (8 subjects) or Master's (12 subjects) level. This nested course structure provides a solid grounding of the knowledge and skills required in a variety of high performance sport careers whilst offering the opportunity to advance and tailor knowledge and skills development at an advanced level.

The course is developed and delivered in collaboration with industry experts from the field, with each subject comprising of a mix of theory and evidence-based practice. Research-inspired course content is delivered by world-leading academics and industry partners, which allows students to apply an expert level of knowledge and understanding to a range of areas that meets the diverse needs of the high performance sport industry. Graduates enter the workforce as expert and collaborative problem solvers, who are capable of leading, managing and inspiring in the field of high performance sport.

In the Master of High Performance Sport students undertake up to three professional placements with organisations in the sport industry. This allows students to apply their knowledge, develop professionally, and network with industry partners. Students are encouraged to develop their ideas and test these in real world environments with practical relevance. Current workplace employment may also be considered for supplemental credit towards these placements. With the completion of three professional placements, students may be eligible for individual professional accreditation with Exercise and Sport Science Australia (ESSA), the peak national professional association for sport and exercise scientists.

Areas of Study

Principles and practices: sport science, strength and conditioning, data interpretation, research methodologies, optimising health and performance.

Course Structure

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04362

Career Opportunities

The Master of High Performance Sport degree is designed for those seeking to work at an expert level in high performance sport, in a variety of settings. Graduates plan, deliver and analyse strategic approaches for elite athletes and coaches, aiming to enhance performance and reduce injury. Throughout the course, students develop skills in critical thinking to optimise holistic decision making and enable positive change through creative, effective and evidence-based solutions.

Career options include practitioner roles (eg sport scientist, strength and conditioning coach, performance analyst, high-performance manager) in a variety of sport settings (eg professional sporting organisations, national and international performance institutes, schools, university research institutions, government and non-government funded sporting programs).
Graduate Diploma in High Performance Sport

Course Description

The Graduate Diploma in High Performance Sport is designed for students from diverse backgrounds and delivered using flexible learning methods suitable for working professionals, domestic students and international students. The course structure enables full-time or part-time study where students can commence in either Autumn or Spring session to complete eight subjects. This nested course structure provides a solid grounding of the knowledge and skills required in a variety of high performance sport careers whilst offering the opportunity to advance and tailor knowledge and skills development at an advanced level.

The course is developed and delivered in collaboration with industry experts from the field, with each subject comprising of a mix of theory and evidence-based practice. Research-inspired course content is delivered by world-leading academics and industry partners, which allows students to apply an advanced level of knowledge and understanding to a range of areas that meets the diverse needs of the high performance sport industry. Graduates enter the workforce as autonomous, collaborative and responsive professionals capable of leading, managing and inspiring in the field.

In the Graduate Diploma in High Performance Sport, students undertake up to two professional placements with organisations in the sport industry. This allows students to apply their knowledge, develop professionally and network with industry partners. Students are encouraged to develop their ideas and test these in real world environments with practical relevance. Current workplace employment may also be considered for supplemental credit towards these placements.

Areas of Study

Principles and practices: sport science, strength and conditioning, data interpretation, research methodologies, optimising health and performance.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c07130

Career Opportunities

The Graduate Diploma in High Performance Sport degree is designed for those seeking to work at an advanced level in high performance sport, in a variety of settings. Graduates plan, deliver and analyse strategic approaches for elite athletes and coaches, aiming to enhance performance and reduce injury. Throughout the course students develop skills in critical thinking to optimise holistic decision making and enable positive change through creative, effective and evidence-based solutions.

Career options include practitioner roles (eg sport scientist, strength and conditioning coach, performance analyst, high-performance manager) in a variety of sport settings (eg professional sporting organisations, national and international performance institutes, schools, university research institutions, government and non-government funded sporting programs).

**Career Opportunities**

The Graduate Certificate in High Performance Sport degree is designed for those seeking to work at an advanced level in high performance sport, in a variety of settings. Graduates plan, deliver and analyse strategic approaches for elite athletes and coaches, aiming to enhance performance and reduce injury. Throughout the course, students develop skills in critical thinking to optimise holistic decision making and enable positive change through creative, effective and evidence-based solutions.

Career options include practitioner roles (eg sport scientist, strength and conditioning coach, performance analyst, high-performance manager) in a variety of sport settings (eg professional sporting organisations, national and international performance institutes, schools, university research institutions, government and non-government funded sporting programs).
Graduate School of Health
Join one of the fastest growing industries with a career-focused degree in health. We’re shaping future leaders in allied health, with courses that respond to the ever-evolving health sector.

**LEARN FROM THE EXPERTS**
With a wealth of industry experience, many of our academics are internationally renowned researchers contributing to the future of health care service and delivery. This means you’ll gain an industry-relevant and research-inspired qualification with courses regularly updated to reflect current practices.

**INDUSTRY-CONNECTED AND RESPECTED**
We’ve collaborated with industry partners to ensure you graduate with employable attributes ready to excel. You’ll benefit from our reputation as a preferred industry partner through professional placements and guest lectures.

**LEARNING INTO PRACTICE**
With applied learning, you’ll gain the practical experience you’ll need as a professional working in the health industry with hands-on clinical simulation and problem-based interprofessional training.

**ACCREDITATIONS**

Jess (Jichun) Hao  
China  
Master of Clinical Psychology

“I like the practical part of my course. I get to see real clients and get hands-on experience working with them. That’s pretty challenging, but also rewarding. Another good thing about the teaching staff is that they’re all practising clinical psychologists. They have a lot of hands-on experience.”
Master of Good Manufacturing Practice

Course Description
The Master of Good Manufacturing Practice provides up-to-date and in-depth good manufacturing practice (GMP) knowledge within the pharmaceutical, biotechnology and medical device industries. The course provides critical knowledge of legislation relating to the registration, manufacture, storage and supply of licenced therapeutic goods; GxP and quality systems compliance; and the concepts of quality management, risk management, aseptic practices, supply chain, clinical trials, quality assurance and quality control within this heavily regulated industry - all essential ingredients for career development.

Areas of Study
Good manufacturing practice, manufacturing operations, validation principles, quality assurance, good laboratory practice, contamination control, good auditing practices, risk management, validation principles and practices, research methodologies.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04301

Career Opportunities
Career options include:
- Production Manager/Supervisor, Quality Assurance Manager/Associate, Industrial Pharmacist, Quality Control Manager, Documentation Manager, Validation Manager, Supply Chain Manager and Regulatory Affairs Manager/Associate in the pharmaceutical, biotechnology, medical device and allied industry.
- Auditor in government regulatory agencies, consultant in consulting firms and managers and practitioners in various other associated companies where good manufacturing practices are required.

Graduate Diploma in Good Manufacturing Practice

Course Description
The Graduate Diploma in Good Manufacturing Practice provides up-to-date and in-depth good manufacturing practice (GMP) knowledge within the pharmaceutical, biotechnology and medical device industries. It provides critical knowledge regarding regulations, compliance/GxP, product development and quality assurance within this heavily regulated industry, an essential ingredient for career development.

Areas of Study
Good manufacturing practice, manufacturing operations, validation principles, quality assurance, good laboratory practice, contamination control, good auditing practices, risk management.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c06115

Career Opportunities
Career options include:
- Production Manager/Supervisor, Quality Assurance Manager/Associate, Industrial Pharmacist, Quality Control Manager, Documentation Manager, Validation Manager, Supply Chain Manager and Regulatory Affairs Manager/Associate in the pharmaceutical, biotechnology, medical device and allied industry.
- Auditor in government regulatory agencies, consultant in consulting firms and managers and practitioners in various other associated companies where good manufacturing practices are required.
Graduate Certificate in Good Manufacturing Practice

Course Description
The Graduate Certificate in Good Manufacturing Practice provides up-to-date and in-depth good manufacturing practice (GMP) knowledge within the pharmaceutical, biotechnology and medical device industries. The course provides critical knowledge regarding regulations, compliance/GxP, product development and quality assurance within this heavily regulated industry, an essential ingredient for career development or ongoing study.

Areas of Study
Good manufacturing practice, manufacturing operations, validation principles, quality assurance, good laboratory practice.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11249

Career Opportunities
Career options include:

- Production Manager/Supervisor, Quality Assurance Manager/Associate, Industrial Pharmacist, Quality Control Manager, Documentation Manager, Validation Manager, Supply Chain Manager and Regulatory Affairs Manager/Associate in the pharmaceutical, biotechnology, medical device and allied industry.
- Auditor in government regulatory agencies, consultant in consulting firms and managers and practitioners in various other associated companies where good manufacturing practices are required.

Course code: C11249
CRICOS code: 084261F
Course duration: 0.5 Years
Number of credit points: 24
Intake: Feb/Jul
Location: City campus
Fees: A$18,415 per session

Academic and additional requirements: See page 158
English language requirements: See page 158

The published fee is per session, based on a full-time, 24 credit-point study load.
Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166–208).

Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.
Master of Clinical Psychology ▲

Course Description
The UTS Master of Clinical Psychology provides students with a practice-based and research-led education in clinical psychology, encompassing on-campus and online learning, on-campus and off-campus clinical placement, and research. The course is delivered in custom-built, state-of-the-art facilities including the on-campus 100 Broadway Clinic.

Areas of Study
Core principles of psychotherapy, adult assessment, child and adolescent assessment, psychopathology, research methodologies, cognitive behaviour therapy, psychology, health and wellbeing.

Professional Recognition
The Master of Clinical Psychology provides the fifth and sixth year of study required to register as a psychologist in Australia. Graduates are eligible, following two years of supervised practice (external to the university), for endorsement as a clinical psychologist with the Psychology Board of Australia (PsyBA) and full membership of the College of Clinical Psychologists of the Australian Psychological Society.

The UTS program has full accreditation by the Australian Psychology Accreditation Council (APAC).

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04300

Career Opportunities
Career options include work in hospitals, community health, specialist and private practice settings addressing, among others, adult mental health, child and family health, and drug and alcohol difficulties.

Master of Genetic Counselling ▲

Course Description
The two-year, graduate entry coursework Master of Genetic Counselling is the entry-level qualification for work as a genetic counsellor. This program is developed and delivered by experienced genetic counsellors, supported by expert learning designers, broad consultation with the genetic counselling profession and a skilled Curriculum Advisory Committee.

Areas of Study
Genetic counselling, genetics, genomics, counselling, professional practice, research.

Professional Recognition
A two-year Master of Genetic Counselling from a program accredited by the Human Genetics Society of Australasia (HGSA) is required in order to apply for Board Eligible status through the HGSA. Board Eligible candidates complete a portfolio of work in order to complete certification as a genetic counsellor and become a Fellow of the Human Genetics Society of Australasia (FHGSA).

The UTS Master of Genetic Counselling is accredited by the HGSA.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04374

Career Opportunities
Genetic counsellors have specialist knowledge in human genetics and genomics, counselling and health communication. With rapid developments in genetics and genomics, there is a growing number of newer opportunities for genetic counsellors in the coming years. Career options include clinical roles in public and private settings, research, education, policy, and laboratory and biotech company genetic counselling roles.
Master of Orthoptics ▲

Course Description

The Master of Orthoptics provides the requisite in-depth knowledge, skills and experience to work as an orthoptist in the multidisciplinary eye healthcare sector. Innovative and practice-based in approach, it enables the development of specialist knowledge and skills while preparing students for changing practices in response to new evidence and rapidly emerging medical technologies. The UTS Master of Orthoptics is the only postgraduate course for orthoptics in Australia.

Areas of Study

Orthoptics, ocular motility, binocular vision, ophthalmic neurology, ophthalmology, eye health for children and adults, rehabilitation strategies, professional practice and research.

Professional Recognition

The Master of Orthoptics is fully accredited by the Australian Orthoptic Board. Upon completion of the degree, graduates are eligible for registration as an orthoptist.

Course Structure

For further details, please refer to the UTS Handbook: 
handbook.uts.edu.au/courses/c04299

Career Opportunities

Career options include working in hospital, private practice and community settings providing paediatric and adult eye care, neuro-ophthalmic and low vision rehabilitation, with the option of employment in ophthalmic industry and research.

Master of Pharmacy ▲

Course Description

The Master of Pharmacy is an accredited two-year graduate-entry degree leading to eligibility for registration as a pharmacist. Innovative and practice-based in approach, the course builds on students' strong scientific foundation to provide specialist, comprehensive knowledge relevant to contemporary pharmacy practice. In addition to the pharmaceutical sciences, this includes professional pharmacy services, integrated therapeutics and the unique capstone subject, 96014 Molecule to Market, supported by industry leader Adjunct Professor John Montgomery. Two elective subjects provide students with the opportunity to individualise their studies with their choice of any available postgraduate subject offered at UTS.

Note: This course includes non-standard teaching sessions. It has a higher number of credit points per session.

Areas of Study

Pharmaceutical sciences, clinical therapeutics, pharmacy practice, professional services.

Professional Recognition

This program has been granted accreditation by the Australian Pharmacy Council and is approved by the Pharmacy Board of Australia as a qualification leading to registration as a pharmacist in Australia.

Upon completion of the degree, graduates must complete a compulsory pre-registration training period and Intern Training Program in order to be eligible for registration.

International students

International students intending to apply for registration with the Pharmacy Board of Australia must meet the Pharmacy English Language Skills Registration Standard.

Course code: C04252
CRICOS code: 074915M
Course duration: 2 Years
Number of credit points: 120
Intake: Feb
Location: City campus
Fees: A$23,345 per session
Academic and additional requirements: See page 158
English language requirements: See page 158

The published fee is per session, based on a full-time, 24 credit-point study load.

Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208).

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04252

Career Opportunities
Career options include: community pharmacy; professional pharmacy services; hospital pharmacy; drug research, design and development; professional roles in pharmaceutical industry; primary health care; consultancy; education; government and policy; the armed forces; and non-profit organisations.

Master of Pharmacy (International) ▲

Course Description
The Master of Pharmacy (International) is an accredited three-year graduate-entry degree leading to eligibility for registration as a pharmacist. The course is an Australian first, extending the Master of Pharmacy (C04252) program to include a one-year overseas clinical placement. This allows students to expand their knowledge even further, gaining practice-based experience of pharmacy in a global context and an understanding of the international factors that influence pharmacy practice and healthcare provision. Overseas clinical placements include those in Canada, Germany or the United Kingdom. Language and culture subjects cater to both beginners and students with prior language knowledge. The course is innovative and practice-based in approach, building on students’ strong scientific foundation to provide specialist, comprehensive knowledge relevant to contemporary pharmacy practice. In addition to the pharmaceutical sciences, this includes professional pharmacy services, integrated therapeutics and the unique capstone subject, 96014 Molecule to Market, supported by industry leader Adjunct Professor John Montgomery. Two elective subjects provide students with the opportunity to individualise their studies with their choice of any available postgraduate subject offered at UTS.

Note: This course includes non-standard teaching sessions. It has a higher number of credit points per session.

Areas of Study
Pharmaceutical sciences, clinical therapeutics, pharmacy practice, professional services.

Professional Recognition
This program has been granted accreditation by the Australian Pharmacy Council and is approved by the Pharmacy Board of Australia as a qualification leading to registration as a pharmacist in Australia.

Upon completion of the degree, graduates must complete a compulsory pre-registration training period and Intern Training Program in order to be eligible for registration.

International students
International students intending to apply for registration with the Pharmacy Board of Australia must meet the Pharmacy English Language Skills Registration Standard.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04395

Career Opportunities
Career options include: community pharmacy; professional pharmacy services; hospital pharmacy; drug research, design and development; professional roles in pharmaceutical industry; primary health care; consultancy; education; government and policy; the armed forces; and non-profit organisations.
Master of Physiotherapy ▲

Course Description
The Master of Physiotherapy is a two-year, graduate-entry degree leading to eligibility for registration as a physiotherapist in Australia. Innovative and practice-based in approach, the course’s core areas of study include musculoskeletal, neurological, orthopaedic and cardiorespiratory physiotherapy across the lifespan.

Areas of Study
Physiotherapy, musculoskeletal, neurological, cardiorespiratory, acute care, rehabilitation, aged care, paediatrics, community health, professional practice, research.

Professional Recognition
The Master of Physiotherapy is fully accredited by the Australian Physiotherapy Council, and approved by the Australian Physiotherapy Board of Australia and the Australian Health Practitioner Regulation Agency (AHPRA) as a qualification leading to registration as a physiotherapist in Australia.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04306

Career Opportunities
Physiotherapists work in a variety of specialisations across public, private or community settings, sporting clubs and rehabilitation centres. The UTS Master of Physiotherapy prepares students for a rewarding career helping improve peoples’ quality of life.

Master of Speech Pathology ▲

Course Description
The UTS Master of Speech Pathology is a two-year, graduate-entry course. Grounded firmly in the profession with an innovative and practice-based approach, the course enables students to actively participate in learning as they acquire the clinical and professional skills needed to enter the profession of speech pathology.

Areas of Study
Speech pathology, language, speech, swallowing, voice, stuttering, augmentative and alternative communication, multimodal communication, disability, disorders, research, children, adults, adolescents, health, disability, education, rights.

Professional Recognition
The University of Technology’s Master of Speech Pathology program is accredited with Speech Pathology Australia. Graduates are qualified to practice as Speech Pathologists in Australia and are eligible to apply for certified practicing membership of Speech Pathology Australia.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04386

Career Opportunities
Speech pathologists work with children and adults with communication and swallowing disability in a range of settings including hospitals, health centres, schools and private practices. With the constant advancements in information and communication technologies and digital health solutions, along with growth in the private sector and clinical research, speech pathologists have a diverse range of career trajectories. The UTS Master of Speech Pathology prepares students for a rewarding career that empowers individuals and communities towards improved communication and swallowing, for participation and inclusion in all aspects of society.
Rapid advances in IT are reshaping the future of work. Get a competitive edge with the latest technical knowledge and key leadership skills. Work with global experts in state-of-the-art facilities and explore future technologies that benefit our world.

FLEXIBLE WORK-LIFE BALANCE
We understand there’s more to life than study. Schedule classes for day or night around your other life commitments.

BE AMONG THE BEST
We’re ranked in the top 100 universities globally for Engineering and Technology (QS Field Rankings 2022).

PIONEERS IN RESEARCH
Our research centres are recognised as world leading by our partners and industry.

INNOVATION HUB
UTS is located in an innovation precinct surrounded by 40 per cent of Australia’s top startup firms.

INTERNATIONAL PERSPECTIVES
Address global challenges through interdisciplinary connections with international universities, researchers and industry partners.

Shamsheer Verma
India
Senior Data Analyst, Commonwealth Bank
Master of Information Technology

“UTS’s societies and clubs helped me build a diverse and supportive network, and because UTS is centrally located, I could find opportunities related to my field of study.”
### Master of Cybersecurity (Extension)

**Course Description**
The Master of Cybersecurity (Extension) is designed to meet the need for well-rounded industry professionals to help organisations and society manage the increasing challenges of creating and maintaining secure online systems. The course is aimed at computing science, information technology or computer engineering graduates, with or without cybersecurity experience, who wish to learn or extend their knowledge of cybersecurity and supporting technologies.

**Areas of Study**
Cybersecurity, network security, cloud computing, information technology, networking, digital forensics, cryptography, systems programming.

**Course Structure**
For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04431](http://handbook.uts.edu.au/courses/c04431)

**Career Opportunities**
Career options include security analyst, security engineer, ICT security specialist, computer network and systems engineer, network administrator.

### Master of Cybersecurity

**Course Description**
The Master of Cybersecurity is designed to meet the need for specialised industry professionals to help organisations and society manage the increasing challenges of creating and maintaining secure online systems. The course is aimed at computing science, information technology or computer engineering graduates, with or without cybersecurity experience, who wish to learn or extend their knowledge of cybersecurity in various contexts.

**Areas of Study**
Cybersecurity, network security, cloud computing, information technology, networking, digital forensics, cryptography, systems programming.

**Course Structure**
For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04430](http://handbook.uts.edu.au/courses/c04430)

**Career Opportunities**
Career options include security analyst, security engineer, ICT security specialist.
Master of Artificial Intelligence

Course Description

Artificial Intelligence (AI) is one of the most promising technologies, driven by big data and advancements in computing power and algorithms. It has huge potential to transform economies and uncover new societal and environmental values. This course enables students to gain fundamental and advanced knowledge in data analytics and visualisation, machine learning, deep learning, and various aspects of AI. Students have opportunities to gain expertise in specialised areas such as Computer Vision or Natural Language Processing and to solve real-world problems. Hands-on experience with real-world research and industry projects enables graduates to manage the increasing challenges of creating and maintaining AI systems. Graduates from this course become socially responsible and technically competent as AI specialists, to help current and future industry across many sectors, such as banking and finance, healthcare, agriculture, infrastructure development, or natural resource management. This course is aimed at graduates from computing science, information technology or computer engineering, who wish to learn or extend their knowledge of AI in various contexts.

Areas of Study

Artificial intelligence, machine learning, data science, data engineering, data analytics, data visualisation, computer vision, Natural Language Processing (NLP), software development

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04443

Career Opportunities

Career options include AI Analyst, Machine Learning Engineer, AI Specialist, Computer Vision Engineer, Natural Language Processing Engineer.

Graduate Diploma in Artificial Intelligence

Course Description

The graduate diploma artificial intelligence course provides IT and computing professionals with the opportunity to upskill and meet the demands of this rapidly changing field. The course covers a broad range of current and emerging areas of AI including data analytics, data visualization, machine learning and neural networks.

This course provides ideal preparation for graduates seeking careers in data analytics, AI/ML engineer and its related domains. Students in the course engage in practical and hands-on learning by using technologies to develop algorithms in various AI fields.

Areas of Study

Artificial intelligence, machine learning, data analytics, data visualisation, software development

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c06147

Career Opportunities

Career options include Junior Analyst- Machine learning, Software Engineer -Machine Learning, Junior AI Specialist, Junior Data Analyst, Junior Machine Learning Engineer.

The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208).

Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.
Pathway to UTS Information Technology

UTS College Graduate Certificate in Technology Practice

The UTS College Graduate Certificate in Technology Practice guarantees your way to a range of exciting master's degrees offered by the UTS Faculty of Engineering and Information Technology (FEIT)*. This program will give you the confidence, knowledge and skills you need to take your professional engineering or IT qualifications to the next level. With our personalised support, small class size and close ties to the UTS Faculty of Engineering and Information Technology, we create a seamless transition from Pre-master’s program to postgraduate degree.

Program benefits

- 24 credit points with guaranteed entry to UTS*
- Direct entry into the second session of your UTS Engineering or Information Technology master’s degree*
- Focuses on employability skills and improving career prospects
- Internationally recognised qualification
- Learn practical technology solutions and systems management

Pathways to UTS

This course leads to Master of Engineering (Extension) (C04277), Master of Professional Engineering (C04309), Master of Information Technology (Extension) (C04296), Master of Information Technology (C04295) or Master of Data Science and Innovation (C04372) at UTS. The pathway you take into UTS will depend on your English language proficiency and academic qualifications.

More information

For further details, including academic and English language requirements, please refer to the UTS College website:

---

* Articulation requirements to UTS master’s degrees vary for individual graduate certificates at UTS College. See website for details: [utscollege.edu.au/pre-masters-programs](utscollege.edu.au/pre-masters-programs)

** You will only be required to enter a UTS College Academic English program if you do not meet the English language entry requirements.

UTS College CRICOS provider code: D0859D
Master of Information Technology (Extension)

Course Description
This course is designed to enable students to achieve a comprehensive and greater understanding of information technology in specialised technical or management areas for the IT professional. The wide range of specialisations allows students to tailor the course to satisfy and to broaden their career development needs.

Majors
Business information systems, cyber security, data analytics, interactive media, internetworking, software development, no specified major.

Sub-Majors
Business information systems, cyber security, data analytics, interactive media, internetworking, software development, no specified sub-major.

Professional Recognition
Graduates are eligible to apply for professional-level membership of the Australian Computer Society.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04296

Career Opportunities
Depending on the major selected, career options include a wide variety of positions in the IT industry, including business intelligence expert, e-business developer, games developer, information systems manager, IT security analyst, IT security manager, ICT security analyst, IT security consultant, pen testing, IT project manager, movie animator, software architect, software quality/testing specialist and systems analyst.

Master of Information Technology

Course Description
This course is designed to enable students to achieve a comprehensive and greater understanding of information technology in specialised technical or management areas. The wide range of specialisations allows students to tailor the course to satisfy their career development needs. Students with an undergraduate background in an information technology-related field are advised to consider the Master of Information Technology (Extension) (C04290).

Majors
Business information systems, cyber security, data analytics, interactive media, internetworking, software development, no specified major.

Professional Recognition
Graduates are eligible to apply for professional-level membership of the Australian Computer Society.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04295

Career Opportunities
Depending on the major selected, career options include a wide variety of positions in the IT industry, including business intelligence expert, e-business developer, games developer, information systems manager, IT security analyst, IT security manager, ICT security analyst, IT security consultant, pen testing, IT project manager, movie animator, software architect, software quality/testing specialist and systems analyst.
Graduate Certificate in Information Technology

Course Description
This course enables those with an IT or related degree to undertake a specialised sequence of subjects to upskill or study subjects in an area not covered in their previous studies.

Areas of Study
Business Information Systems, cyber security, data analytics, interactive media, internetworking, software development.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11142

Career Opportunities
Career options include database developer, junior programmer/analyst or business analyst.

Graduate Certificate in Information Technology Studies

Course Description
This course enables those with a non-IT or related degree to undertake an introductory sequence of subjects to upskill or study subjects in an area not covered in their previous studies.

Areas of Study
This is a course that enables those with a non-IT background to undertake an introductory sequence of subjects to upskill and assist in career development.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11247

Career Opportunities
Career options include database developer, junior programmer/analyst or business analyst.

The published fee is per session, based on a full-time, 24-credit-point study load.
Most subjects at UTS are valued at 6-8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.

Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.
Master of Interaction Design (Extension)

Course Description

Interaction design is concerned with designing interactive digital products, digital environments, systems, and services that can satisfactorily meet the needs and desires of the intended users. The Master of Interaction Design (Extension) prepares and equips students with up-to-date theoretical knowledge and requisite practical industry-standard skills in this rapidly advancing field.

Areas of Study

Interaction design, graduate research, data analytics, games design, interaction programming, user experience, human-centred design methods.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04234

Career Opportunities

Graduates can gain employment in a range of technology design–related roles such as interaction designer, UX designer, UX researcher, service designer, or digital experience architect.

For those currently working in closely related jobs, such as web design, graphic design, interface design, etc., this course provides the necessary formal training in the discipline in order to make a more definitive move into jobs in interaction design. Similarly, many find themselves working within the field of interaction design without formal training, and this course provides a good foundation and opportunities to extend their interaction design skills more formally.

For those not working in a job related to interaction design, this course provides the opportunity to learn about the discipline and to transition into the various jobs under the interaction design umbrella.

Master of Interaction Design

Master of Professional Practice

Course Description

Become an agile leader in complexity

Technology, industry 4.0, climate action, globalisation and more: we live and work in a time of unprecedented change that affects the ways we live and work. This course gives students a multidisciplinary advantage to lead in organisations and the wider community, where a diverse range of skills is increasingly in demand.

Flexible, individualised learning

The Master of Professional Practice combines practice-based subjects, called Studios, with elective subjects from across the university, to adapt the degree to the needs of the student.

Practice-based learning

In Studios, students work with academics and professional peers in collaborative, intensive workshops on complex problems honing problem solving skills and critical thinking on sustainable development solutions.

The studios will teach design and systems thinking frameworks for students to research, apply and synthesise their technical knowledge and skills. The studios provide mentorship and a collaborative practice-based learning environment to develop competencies. The capstone studio enables students to apply their breadth and depth of knowledge in an industry project.

The course teaches students to think in different ways that enable them to tackle complexity and unravel problems, while building postgraduate level content knowledge in subject areas of interest to students.

The Master of Professional Practice studios enables students to explore, apply and integrate information, technology and human-centred design.

Areas of Study

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04404

Career Opportunities

Whether students want to thrive in a large organisation or create a start-up, the Master of Professional Practice will provide the expertise to help them get there.

The flexible course structure allows students to choose up to two sub-majors, including sub-majors which may be individually configured and named to suit the unique requirements and study plan of every student.

Technology, Industry 4.0, climate action, globalisation and more: we live and work in a time of unprecedented change that affects the ways we live and work. This degree gives students a multidisciplinary perspective on their roles in organisations and the wider community, where a diverse range of skills is increasingly in demand.

Flexible, individualised learning
The Graduate Certificate in Professional Practice combines practice-based subjects, called Studios, with elective subjects from across the university, to adapt the course to the student's needs.

Practice-based learning
In Studios, students work with academics and professional peers in collaborative, intensive workshops honing problem solving skills and critical thinking on their professional development.

The studio teach a systems thinking framework for students to apply and evaluate their technical knowledge and skills. The studio provide mentorship and a collaborative practice-based learning environment to develop competencies.

The course teaches students to think in different ways that enable them to unravel problems, while building postgraduate level content knowledge in subject areas of their choice.
Course Structure

handbook.uts.edu.au/courses/c11298

Career Opportunities

Whether students want to thrive in a large organisation or create a new career pathway, the Graduate Certificate in Professional Practice helps them set goals and acquire knowledge and skills to support their career plans.

Master of Technology

Course Description

Gain skills to innovate and lead

Industries and organisations are being transformed by technology. This course gives students the multidisciplinary skills to lead change in this rapidly changing world by developing a set of capabilities, in technology and other areas that enable them to succeed in digitally disrupted organisations and industries.

Flexible, individualised learning

The Master of Technology combines practice-based subjects, called Studios, with elective subjects from across the university, to adapt the course to the needs of students.

Practice-based learning

In Studios, students work with academics and professional peers in collaborative, intensive workshops on complex problems honing problem solving skills and critical thinking on sustainable development solutions.

The studios teach design and systems thinking frameworks for students to research, apply and synthesise their technical knowledge and skills. The studios provide mentorship and a collaborative practice-based learning environment to develop competencies. The capstone studio enables students to apply their breadth and depth of knowledge in an industry project.

The course teaches students to think in different ways that enable them to tackle complexity and unravel problems, while building postgraduate level content knowledge in subject areas of their choice including postgraduate subjects focused on the intersection of technology and community, and scientific or technological processes or skills.

The Master of Technology studios enable students to explore, apply and integrate information, digital technology and design thinking.

Areas of Study

Course Structure

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04406

Career Opportunities

Whether students want to thrive in a large organisation or create a start-up, the Master of Technology will provide the expertise to help students get there.

The flexible course structure allows students to choose up to two sub-majors, including sub-majors which may be individually configured and named to suit the unique requirements and study plans of every student.
Graduate Diploma in Technology

Course Description

Gain skills to innovate and lead

Industries and organisations are being transformed by technology. This course gives the students the multidisciplinary skills to tackle complex problems in this rapidly changing world by developing a set of capabilities, in technology and other areas that enable them to succeed in digitally disrupted organisations and industries.

Flexible, individualised learning

The Graduate Diploma in Technology combines practice-based subjects, called Studios, with elective subjects from across the university, to adapt the course to the needs of students. We understand that’s a lot of freedom.

Practice-based learning

In Studios, students work with academics and professional peers in collaborative, intensive workshops on complex problems honing problem solving skills and critical thinking on sustainable development solutions.

The studios teach design and systems thinking frameworks for students to apply and evaluate their technical knowledge and skills. The studios provide mentorship and a collaborative practice-based learning environment to develop competencies.

Whether students want to thrive in a large organisation or create a new career pathway, the Graduate Certificate in Technology helps them set goals and acquire knowledge and skills to support their career plans.
UTS has partnered with Australia's leading digital animation studio Animal Logic to provide industry-led education in emerging 3D animation and visualisation technologies. We’re producing the next-generation of digital artists and technical experts to drive the future of the industry.

**LEARN FROM THE BEST**
Study under the mentorship of leading professionals from the animation and visualisation industries.

**BUILD SKILLS THAT COUNT**
Develop advanced capabilities in story, art and character development, layout and pre-visualisation, modelling, rigging and surfacing, 3D animation, lighting, visual effects, compositing, technical directing and production coordination, and explore emerging technologies such as real-time animation, virtual production, AR, VR, MR and more.

**PRACTICAL LEARNING**
Featuring state-of-the-art technology, our custom-built digital studio is designed to replicate real-world production environments.

**CREATIVE COLLABORATION**
Collaborate with fellow students under the mentorship of our industry leads, using your combined expertise to deliver advanced solutions to complex creative challenges.

**GAIN MORE THAN KNOWLEDGE**
Expand your career opportunities by developing industry connections and building professional networks.

---

**Hannah Chu**
Taiwan (PRC)
Master of Animation and Visualisation

“I’ve had the chance to develop skills in new technologies, and most important of all, the academy provided me with the experience to understand how it feels to work in the VFX industry.”
### Course Description

The Master of Animation and Visualisation has been developed in partnership with the industry-leading digital animation studio Animal Logic and is offered through the UTS Animal Logic Academy. The course develops creative professional practice, conceptual skills and technical dexterity in animation and visualisation production. Under the guidance and mentorship of practitioners and leaders from the industry, learning is modelled on real-world production work structures in a custom-built digital production studio, engineered to the highest industry standards with tools and technologies that are leading the animation and visualisation industries into the future.

Note: This course includes non-standard teaching sessions.

### Areas of Study

- 3D Animation, Visualisation, Computer Generated Imagery (CGI), Computer Graphics (CG)

### Course Structure

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04423

### Career Opportunities

Graduates are able to enter industry with advanced knowledge, skills and collaborative large-project experience. In addition, they gain creative project development and presentation experience, and can contribute to the development of technology projects and industry sectors. They gain experience that can be applied across a range of roles, from story development, pre-visualisation, modelling, rigging, asset creation, 3D animation, visual effects and digital pipeline production, to creating immersive visualisation experiences and across emerging technologies.
Graduate Certificate in Animation and Visualisation

Course Description
The Graduate Certificate in Animation and Visualisation has been developed in partnership with the industry-leading digital animation studio Animal Logic and is offered through the UTS Animal Logic Academy. The course develops creative professional practice, conceptual skills and technical dexterity in the early-stage development of a 3D animated project production. Under the guidance and mentorship of practitioners and leaders from the industry, learning takes place in a custom-built digital production studio modelled on real-world production work structure and engineered to the highest industry standards, with tools and technologies that are leading the animation and visualisation industries into the future.

Areas of Study
Story development, concept art, storyboarding, character and environment design, layout and pre-visualisation, modelling, rigging, blocking, animation, production coordination.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11326

Career Opportunities
Students graduate with experience working with professional workflows on collaborative, large-scale projects. They further develop their knowledge and skills in a number of aspects of animation and visualisation project production, gaining valuable real-world experience which prepares them for professional roles in industry.
Ready to enhance your legal career? Expand your knowledge of legal principles, and develop transferable skills with a UTS postgraduate Law degree.

WORK-READY AND WELL-ROUNDED
Our courses prepare you for the real world. You will be trained to become a self-motivated legal professional through building your skills in critical evaluation, collaboration and effective communication.

REAL EXPERIENCE BEFORE YOU’RE IN THE REAL WORLD
There’s no shortage of experiential learning to challenge you here. Pursue internships, fieldwork placements, leadership programs, international study, mooting, and mentoring opportunities.

Anulika Ezembaukwu
Nigeria
Juris Doctor and Graduate Certificate in Professional Legal Practice

“My lecturers at UTS have been supportive and encouraging. It is here that I realised I can really do it – I can be a good lawyer. I believe in my abilities and UTS brought that out in me. I can now talk confidently about Law. I can understand the issues; I can solve problems. I have learnt to think like a lawyer – that is what UTS has taught me.”

* You cannot obtain a student visa to study this program in Australia as it’s offered by distance only.
Graduate Diploma in Australian Law

Course Description
This course is for qualified lawyers from jurisdictions outside Australia who are seeking admission to practise law in NSW. Based on an assessment by the Legal Profession Admission Board (LPAB) of the Supreme Court of NSW, UTS builds a tailored program of study for each student. Upon successful completion, students meet the academic requirements for admission as a lawyer of the NSW Supreme Court.

Areas of Study
Australian law, Australian constitutional law, administrative law, civil practice, commercial law, contracts, criminal law and procedure, equity and trusts, ethics law, evidence, foundations of law, principles of company law, real property, torts.

Professional Recognition
This course may satisfy the requirements for admission to the Supreme Court of NSW. The Legal Profession Admission Board may recognise subjects attempted within this course. Applicants are advised to obtain written confirmation of the LPAB in recognition of subjects attempted within this course prior to enrolling.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c07073

Career Opportunities
Career options include lawyer in NSW within a government or corporate department, private law firm or community law centre, providing students also undertake a course in practical legal training (PLT).

Graduate Certificate in Australian Law

Course Description
This course is for qualified lawyers from common law jurisdictions outside Australia who are seeking admission to practise law in NSW. Students complete 30 credit points of core subjects spanning ethics, property, constitutional and administrative law.

Areas of Study
Australian law, Australian constitutional law, administrative law, real property, ethics law and justice.

Professional Recognition
This course may satisfy the requirements for admission to the Supreme Court of NSW. The Legal Profession Admission Board may recognise subjects attempted within this course. Applicants are advised to obtain written confirmation of the LPAB in recognition of subjects attempted within this course prior to enrolling.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11211

Career Opportunities
Career options include lawyer in NSW within a government or corporate department, private law firm or community law centre, providing students also undertake a course in practical legal training such as the Graduate Certificate in Professional Legal Practice (C11232).
Master of Intellectual Property

Course Description

UTS has established expertise in and a reputation for providing courses relevant to the needs of the patent and trademark professions. The UTS Master of Intellectual Property is the first course at an Australian university that fulfills the entire educational requirements for registration as a registered Trans-Tasman patent attorney in Australia and New Zealand under the Trans-Tasman IP Attorneys Board, as well as registration as an Australian trade marks attorney.

Areas of Study

Intellectual property, trade marks law, patent law, copyright, drafting and registering patents.

Professional Recognition

The educational requirements for registration as a patent attorney and trade marks attorney in Australia and New Zealand with the Trans-Tasman IP Attorneys Board for Patent and Trade Marks Attorneys can be fulfilled by completing all eight accredited subjects in this course.

Prospective students should check with the Trans-Tasman IP Attorneys Board for specific subjects required to be completed for registration.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04251

Career Opportunities

Depending on the subjects taken, graduates may seek registration as a trade mark attorney and/or Trans-Tasman patent attorney in Australia and New Zealand. Arts administrators or media professionals may enhance career options through building expertise in the commercialisation or management of intellectual property assets. Other career options include patent and trade marks attorney, IP lawyer, IP portfolio manager, policy maker and government regulator.
**Graduate Diploma in Intellectual Property**

**Course Description**

UTS has established expertise and a reputation for providing courses relevant to the needs of the patent and trade mark professions. The UTS Intellectual Property program is the first at an Australian university that fulfills the entire educational requirements for registration as a registered Trans-Tasman patent attorney in Australia and New Zealand under the Trans-Tasman IP Attorneys Board, as well as registration as an Australian trade marks attorney.

Note: Students commencing in Spring session (July) may require an additional session to complete the course.

**Areas of Study**

Intellectual property, trade marks law, patent law, copyright, drafting and registering patents.

**Professional Recognition**

Subject to final board approval, where applicants have a requisite tertiary qualification as stipulated by the Trans-Tasman IP Attorneys Board for Patent and Trade Marks Attorneys, this course provides accredited subjects which satisfy the educational requirements necessary for registration as a trade marks attorney or which lead to completing the educational requirements necessary for registration as a patent attorney in Australia and New Zealand.

Prospective students should check with the Trans-Tasman IP Attorneys Board for specific subjects required to be completed for registration.

**Course Structure**

For further details, please refer to the UTS Handbook:

handbook.uts.edu.au/courses/c06099

**Career Opportunities**

Depending on the subjects taken, graduates may seek registration as a trade mark attorney in Australia and may fulfil most of the educational requirements for registration as a Trans-Tasman patent attorney in Australia and New Zealand. Arts administrators or media professionals may enhance career options through building expertise in the commercialisation or management of intellectual property assets. Other career options include: IP lawyer, IP portfolio manager, policy maker and government regulator.

This course enables overseas registered attorneys to undertake the necessary subjects that the Trans-Tasman IP Attorneys Board requires for Australian or New Zealand registration.

Graduate Diploma in Migration Law and Practice

Course Description
The Graduate Diploma in Migration Law and Practice develops subject expertise and practical skills in the niche field of migration law. This course is developed by migration experts and is offered entirely online, giving students the flexibility to study when and where they choose. All lectures, tutorials, course materials and assessments are available via a range of web-based technologies and electronic media.

Areas of Study
Migration law and practice.

Professional Recognition
The prescribed knowledge requirements for registration as a migration agent with the Office of the Migration Agents Registration Authority in Australia can be fulfilled by completing all accredited subjects in this course and passing an external capstone exam approved and facilitated externally by the Office of Migration Agents Registration Authority (OMARA).

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c06122

Career Opportunities
Career options include registration as a migration agent and specialist work in the migration advice and policy industry, provided non-lawyer graduates also pass a capstone exam approved and facilitated externally by Office of Migration Agents Registration Authority, and fulfil all other prescribed requirements for registration. Holders of unrestricted legal practising certificates can give immigration assistance without OMARA registration, and by successfully completing this Program, they gain the skills and knowledge necessary to advise migration clients.

Graduate Certificate in Professional Legal Practice

Course Description
This is a Practical Legal Training (PLT) course, which is a mandatory requirement for admission to practise law in NSW and UTS was the first university in Sydney to offer a PLT qualification. This course includes a compulsory 13 weeks of full-time (or equivalent part-time) approved practical experience.

Areas of Study
Practical legal training.

Professional Recognition
This course satisfies the practical legal training requirements for admission as a lawyer to the Supreme Court of NSW.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11232

Career Opportunities
Career options include lawyer, provided graduates have fulfilled all other academic requirements.

The published fee is per session, based on a full-time, 24 credit-point study load. Most subjects at UTS are valued at 6–8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166–208)
▲ Courses flagged with this icon include a work-based training component which must be undertaken as part of the course of study and refers to all clinical, professional and industrial or other work placements.
● Courses flagged with this icon are offered by distance only. You cannot obtain a student visa to study these programs in Australia.
World-class facilities, research integrated learning and practical courses. UTS Science postgraduate courses will sharpen your skills and dare you to think outside the box.

**RESEARCH THAT SHAPES THE WORLD**
Learn from academics actively engaged in current research, in partnership with leading industry organisations. Whether you’re a research or coursework student, everything you learn will be informed by the latest findings from our own experts and from around the world.

**REAL WORLD SKILLS**
Beyond the scientific expertise you'll gain, our courses provide professional skills such as proposal writing and advanced communication skills in science. Learn how to generate ideas, develop products and pitch to investors.

**INDUSTRY CONNECTIONS**
Engage with future employers and researchers who are part of UTS’s extensive industry and public sector connections. Network with industry leaders from organisations such as General Electric and the Commonwealth Scientific and Industrial Research Organisation, or work on research projects with partners such as Sydney Water or the Australian Federal Police.

---

**Prakriti Siwakota**  
Nepal  
**Master of Philosophy in Medical Biotechnology**

“Studying Medical Biotechnology has helped me in understanding more about what research actually is. I transferred into the Master of Philosophy in Medical Biotechnology to start my research journey after first year of the Medical Biotechnology (Extension). My plan for the future is to conduct research into diseases affecting women’s health like preeclampsia and infertility, and drug delivery.”
Master of Data Science in Quantitative Finance

Course Description
The Master of Data Science in Quantitative Finance provides students with cutting-edge skills, knowledge and tools allowing them to tackle data problems on a new scale and complexity for tasks in portfolio optimisation, market modelling and credit risk. Data science techniques including machine learning have already transformed the world of asset management, changing how sophisticated investors approach portfolio construction and risk management.

Areas of Study
Computational methods and model implementation, interest rates and credit risk models, derivative security pricing, numerical methods in finance, probability theory and stochastic analysis, portfolio analysis, financial market instruments, risk management, statistics, financial econometrics.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04418

Career Opportunities
Career opportunities for graduates include quantitative analyst, data scientist, data analyst, quantitative analyst, quantitative structurer, quantitative developer, forecaster, trader, model verification, financial engineer, market risk analyst, credit risk analyst, data engineer, data modeller, and investment analyst and financial engineer across investment banks, trading banks, hedge funds, investment management firms, consulting companies, energy and mining companies, regulatory bodies and government organisations.

Master of Forensic Science (Extension)

Course Description
The Master of Forensic Science (Extension) prepares students for professional and specialist work in the discipline of forensic science and is designed for professional scientists wishing to update and broaden their scientific and professional skillset with managerial/business acumen or research experience.

Areas of Study
Forensic science processes, forensic inference and interpretation, chemical criminalistics, human identification (fingerprints, DNA profiling, biometrics), forensic toxicology, recreational drugs, crime scene investigation, advanced scientific communication, statistical design, project or laboratory management, ethics, innovation and science business models.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04392

Career Opportunities
Depending on the area of specialisation, graduates may pursue employment with organisations such as the Australian Federal Police, state policing agencies, ASIO, CSIRO, ANSTO, customs, immigration, and private forensic agencies. Career options include criminalist, trace evidence specialist, forensic toxicologist, DNA specialist, scene-of-crime officer, team leader in investigations, fire investigator, and fingerprint analyst.

Graduates may also proceed to a career in research by transferring into the Master of Philosophy in Forensic Science (C04393).
Master of Forensic Science

Course Description
The Master of Forensic Science prepares students for professional and specialist work in the discipline of forensic science and is designed for professional scientists wishing to update their industry-related skills for career advancement and students considering a research degree.

Areas of Study
Forensic science processes, forensic inference and interpretation, chemical criminalistics, human identification (fingerprints, DNA profiling, biometrics), forensic toxicology, recreational drugs, crime scene investigation, advanced scientific communication, statistical design, project or laboratory management, ethics, innovation and science business models.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04391

Career Opportunities
Depending on the area of specialisation, graduates may pursue employment with organisations such as the Australian Federal Police, state policing agencies, ASIO, CSIRO, ANSTO, customs, immigration, and private forensic agencies. Career options include criminalist, trace evidence specialist, forensic toxicologist, DNA specialist, scene-of-crime officer, team leader in investigations, fire investigator, fingerprint analyst.

Graduates may also proceed to a career in research by transferring into the Master of Philosophy in Forensic Science (C04393).

Graduate Diploma in Forensic Science

Course Description
The Graduate Diploma in Forensic Science prepares students for professional and specialist work in the discipline of forensic science and is designed for professional scientists wishing to update their industry-related skills for career advancement.

Areas of Study
Forensic science processes, forensic inference and interpretation, advanced scientific communication, statistical design, project or laboratory management, ethics, innovation and science business models.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c07137

Career Opportunities
Depending on the area of specialisation, graduates may pursue employment with organisations such as the Australian Federal Police, state policing agencies, ASIO, CSIRO, ANSTO, customs, immigration, and private forensic agencies. Career options include criminalist, trace evidence specialist, forensic toxicologist, DNA specialist, scene-of-crime officer, team leader in investigations, fire investigator, fingerprint analyst.
### Master of Mathematics and Quantitative Finance

**Course Description**

The Master of Mathematics and Quantitative Finance provides the opportunity to acquire the detailed specialised knowledge and the professional competency required to work as a quantitative finance analyst in the modern finance industry, performing at the cutting edge of the discipline.

**Areas of Study**

Computational methods and model implementation, interest rates and credit risk models, derivative security pricing, numerical methods in finance, probability theory and stochastic analysis, portfolio analysis, financial market instruments, risk management, statistics, financial econometrics.

**Course Structure**

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04419](http://handbook.uts.edu.au/courses/c04419)

**Career Opportunities**

Career opportunities for graduates include quantitative analyst, risk analyst, quantitative structurer, quantitative developer, forecaster, trader, investment analyst and financial engineer across investment banks, trading banks, hedge funds, and investment management firms, consulting companies, energy and mining companies, regulatory bodies and government organisations.

### Master of Medical Biotechnology (Extension)

**Course Description**

The Master of Medical Biotechnology (Extension) is for two distinct groups of students, namely the professional scientists wishing to update their industry-related skills for career advancement and students considering a research degree.

**Areas of Study**

Advanced communication skills in science, the scientific method, innovation, entrepreneurship, commercialisation.

**Course Structure**

For further details, please refer to the UTS Handbook: [handbook.uts.edu.au/courses/c04388](http://handbook.uts.edu.au/courses/c04388)

**Career Opportunities**

All graduates have training in the professional attributes that employers seek. The skills learnt expand career horizons and enhance prospects for promotion in the rapidly evolving science professions. Graduates may also proceed to a career in research by transferring into the Master of Philosophy in Medical Biotechnology (C04389) as a pathway to a PhD.

Graduates of this course are well prepared for careers in medical device and biotechnology companies, government policy and regulation, hospitals, and research organisations where the ability to combine biology and biotechnology to solve medical problems is required.
Master of Medical Biotechnology

Course Description
The Master of Medical Biotechnology is for two distinct groups of students, namely the professional scientists wishing to update their industry-related skills for career advancement and students considering a research degree.

Areas of Study
Advanced communication skills in science, the scientific method, innovation, entrepreneurship, commercialisation

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04390

Career Opportunities
All graduates have training in the professional attributes that employers seek. The skills learnt expand career horizons and enhance prospects for promotion in the rapidly evolving science professions. Graduates may also proceed to a career in research by transferring into the Master of Philosophy in Medical Biotechnology (C04389) as a pathway to a PhD.

Graduates are well prepared for careers in medical device and biotechnology companies, government policy and regulation, hospitals, and research organisations where the ability to combine biology and biotechnology to solve medical problems is required.

Graduate Diploma in Medical Biotechnology

Course Description
The Graduate Diploma in Medical Biotechnology is designed for two distinct groups of students, namely the professional scientists wishing to update their industry-related skills for career advancement and students considering a research degree.

Areas of Study
Advanced communication skills in science, the scientific method, project management, innovation, entrepreneurship, and commercialisation.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c07136

Career Opportunities
The course provides a backbone of skills important to a professional scientist; be they engaged in research, science business, industries or government organisations. Graduates can pursue careers with private and public agencies, such as medical and health sustainability.

Master of Quantitative Finance

Course Description
The Master of Quantitative Finance provides the full gamut of specialised quantitative finance skills and development of professional competency required to be a quantitative finance specialist performing at the cutting edge of the discipline.

Participants have the opportunity to see the application of quantitative finance to advanced financial instruments, an integrated approach to risk management and how to implement quantitative finance strategies.

Note: This course includes a non-standard teaching session.

Areas of Study
Computational methods and model implementation, interest rates and credit risk models, derivative security pricing, numerical methods in finance, probability theory and stochastic analysis, portfolio analysis, financial market instruments, risk management, statistics, financial econometrics.
Graduates of the Master of Science (Extension) course aim to renew and broaden students’ scientific and industry experience with skills in business, management, data science, mathematics and high-level subject specific knowledge. It provides students with numerous opportunities by value-adding to their existing specialisations and bringing them up to speed on knowledge and technologies, or by expanding into different majors of interest to acquire professional and management skills.

### Majors

- Advanced studies, biomedical engineering, environmental consultancy and conservation, mathematical and statistical modelling.

### Career Opportunities

Diverse and exciting career pathways are opened depending on the major chosen, and all graduates receive training in the professional attributes that employers seek. These skills expand career horizons and enhance prospects for promotion in rapidly-evolving professions.

- **Graduates of the Biomedical Engineering major** are prepared for innovative careers in medical device and biotechnology companies, hospitals, government policy and regulatory agencies, bionanomaterial production, clinical engineering, and research and development teams where the ability to creatively combine biology with technology leads to scientific discovery.

- **Graduates of the Environmental Consultancy and Conservation major** are highly-skilled in ecology and site assessment methods, including land contamination, vegetation surveys, water analysis, as well as animal surveys and handling techniques for native fauna. Graduates are well-positioned for evolving careers within consultancy firms, government agencies (e.g. local councils, environmental protection agencies, land and water services), the National Parks and Wildlife Service, research institutes, sustainability roles in many sectors, tourism centres and natural resource management.

- **Graduates of the Mathematical and Statistical Modelling major** can apply their logistic, statistical and modelling skills across a diverse range of global organisations and industries, including banking and finance sectors, health, information technology, commercialisation, and market research.

- **Graduates of the Medical Laboratory Science major** are well-positioned for careers in hospital laboratories, diagnostic medical laboratories, pharmaceutical companies, medical technicians, biomedical and biotechnology development industries, and public and community education.

- **Graduates of the Advanced Studies major** have a well-rounded set of professional skills tailored towards the career directions of their choice, including careers in laboratory and scientific practice, digital skills and data analytics, research and development pathways, or wider careers in science and technology.
Master of Science

Course Description

The Master of Science has been developed to train scientists to meet current and future demands for industry-relevant skills, promote career advancement, and open new pathways for PhD research or professional employment across a wide range of destinations.

Majors

Advanced studies, biomedical engineering, environmental consultancy and conservation, mathematical and statistical modelling.

Course Structure

For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04241

Career Opportunities

Diverse and exciting career pathways are opened depending on the major chosen, and all graduates receive training in the professional attributes that employers seek. These skills expand career horizons and enhance prospects for promotion in rapidly-evolving professions.

- Graduates of the Biomedical Engineering major are prepared for innovative careers in medical device and biotechnology companies, hospitals, government policy and regulatory agencies, bionanomaterial production, clinical engineering, and research and development teams where the ability to creatively combine biology with technology leads to scientific discovery.

- Graduates of Environmental Consultancy and Conservation major are highly-skilled in ecology and site assessment methods, including land contamination, vegetation surveys, water analysis, as well as animal surveys and handling techniques for native fauna. Graduates are well-positioned for evolving careers within consultancy firms, government agencies (e.g. local councils, EPA, land and water services), the National Parks and Wildlife Service, research institutes, tourism centres and natural resource management.

- Graduates of the Mathematical and Statistical Modelling major can apply their logistic, statistical and modelling skills across a diverse range of global organisations and industries, including banking and finance sectors, health, information technology, commercialisation, and market research.

- Graduates of Medical Laboratory Science major are well-positioned for careers in hospital laboratories, diagnostic medical laboratories, pharmaceutical companies, medical technicians, biomedical and biotechnology development industries, and public and community education.

- Graduates of Advanced Studies major have a well-rounded set of professional skills tailored towards the career directions of their choice, including careers in laboratory and scientific practice, digital skills and data analytics, research and development pathways, or wider careers in science and technology.
Gain a professional edge with a degree that responds to the future of work and the challenges that are ahead. Our courses are about building expertise beyond traditional discipline-specific approaches. Gain practical, in-demand skills in collaboration and complexity, and learn to embed innovation in your professional practice.

LEARN FROM THE BEST
You’ll learn from experienced academics and work with leading industry professionals to build valuable connections that will help you supercharge your career.

FLEXIBLE OPTIONS
Designed to accommodate the different learning objectives of our students, we offer a range of flexible learning options so you can focus on developing the specific skills you need, when you need them.

REAL-WORLD LEARNING
Our courses will connect you with industry experiences, real-world briefs and meaningful professional networks across a wide range of professional disciplines.

LEARN TO COLLABORATE AND INNOVATE
You’ll work collaboratively with peers from a range of academic and professional backgrounds whose expertise will challenge and complement your own.

Yogitha Mariyappa
India
Data Analyst, Commonwealth Bank of Australia
Master of Data Science and Innovation

“What sets the MDSI apart from other programs is its transdisciplinary, practice-based approach. The Innovation Labs are a fantastic opportunity for us to work with live data and solve real-world problems. Within a month of finishing the degree’s coursework, I had three job offers from government, consulting and banking areas.”
Master of Creative Intelligence and Strategic Innovation

Course Description
The Master of Creative Intelligence and Strategic Innovation (MCISI) is a new type of postgraduate product specifically positioned to transform organisational capacity to develop new ways to respond to the open, complex, dynamic and networked problems they now face in their work.

This course provides flexible transdisciplinary professional learning pathways that allow participants to traverse the boundaries between disciplines, professional fields and sectors to stimulate innovation. It also enables groups of participants from partner organisations to learn by immersing themselves in authentic transdisciplinary professional learning experiences, working with staff across UTS and international experts on the re-invention of their organisations, professions, and sectors based on emerging transdisciplinary ways of working.

The course has been designed to suit both the needs of partner organisations and individual participants’ aspirations by offering flexible, blended, and bespoke elements.

Note: This course is taught in intensive mode in short sessions.

Areas of Study
Dealing with complexity, multi-stakeholder collaboration, transdisciplinarity, future-focused innovation and building ecosystems.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c04403

Career Opportunities
Career options include line managers, team leaders, middle and senior professionals.

Graduate Diploma in Creative Intelligence and Strategic Innovation

Course Description
This course is based on the master’s program, but requires fewer units of study. In most circumstances, participants can choose to progress to the Master of Creative Intelligence and Strategic Innovation on satisfactory completion of this course.

Note: This course is taught in intensive mode in short sessions.

Areas of Study
Dealing with complexity, multi-stakeholder collaboration, transdisciplinarity, future-focused innovation and building ecosystems.

Course Structure
For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c06135

Career Opportunities
Career options include line managers, team leaders, middle and senior professionals.
Graduate Certificate in Creative Intelligence and Strategic Innovation

Course Description
This course consists of five different types of learning activities delivered through a blended learning environment, combining the best of face-to-face and online learning. It is one of the courses in the Master of Creative Intelligence and Strategic Innovation set.

Note: This course is taught in intensive mode in short sessions.

Areas of Study
Dealing with complexity, multi-stakeholder collaboration, transdisciplinarity, future-focused innovation and building ecosystems.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c11297

Career Opportunities
Career options include line managers, team leaders, middle and senior professionals.

Master of Data Science and Innovation

Course Description
The Master of Data Science and Innovation is a world-leading program of study in analytics and data science.

Taking a transdisciplinary approach, the course utilises a range of perspectives from diverse fields and integrates them with industry experiences, real-world projects and self-directed study, equipping graduates with an understanding of the potential of analytics to transform practice. The course is delivered in a range of modes, including contemporary online and face-to-face learning experiences in UTS’s leading-edge facilities.

Industry partnerships and engagement are a core part of the course. The course curriculum and subjects are co-designed and developed by UTS academic data experts and industry partners, and regularly reviewed and updated to keep up with the current market needs and latest data science trends. During the course study, students have abundant opportunities working on real world data sets/projects.

Areas of Study
Data sciences practices, leading data science initiatives and innovation laboratories.

Course Structure
For further details, please refer to the UTS Handbook: handbook.uts.edu.au/courses/c04372

Career Opportunities
The course prepares students to participate in a variety of emerging careers with the growth of data science - data scientist, data engineer, data griot, data analyst, data artist, data journalist and data-driven policy expert, to name a few. While other offerings also provide the basis for these careers, this unique transdisciplinary course is the first of its kind in Australia where creativity and innovation are integral components, producing industry-ready graduates with strong technical, creative thinking and data ethics skills.

The published fee is per session, based on a full-time, 24 credit-point study load.
Most subjects at UTS are valued at 6–8 credit points each. Refer to the online handbook for the most up-to-date information and for specific information on available electives and their credit-point value (handbook.uts.edu.au).

For combined and research degrees, please see course summary tables (pages 166-208)

### Graduate Certificate in Data Science and Innovation ▲

#### Course Description
The Graduate Certificate in Data Science and Innovation is designed for students to gain data science skills in a fast-paced mode. It has a flexible and comprehensive course structure with a group of fundamental and advanced subjects. This allows people with different backgrounds and learning objectives to take the course either as a fast-track pathway into the data science industry, or to develop specialised skills to further enhance their data science career.

Taking a transdisciplinary approach, the course integrates fundamental theories with industry experiences, real-world projects and self-directed study, equipping graduates with an understanding of the potential of analytics to transform practice. The course is delivered in a range of modes, including contemporary online and face-to-face learning experiences in UTS's leading-edge facilities.

Upon successful completion of the graduate certificate, students can also choose to progress to the Graduate Diploma in Data Science and Innovation (C06124) or Master of Data Science and Innovation (C04372), a world-leading program of study in analytics and data science.

#### Areas of Study
Data science practices, leading data science initiatives and innovation laboratories.

#### Career Opportunities
The course prepares students to participate in a variety of emerging careers with the growth of data science. While other offerings also provide the basis for these careers, this unique transdisciplinary course is the first of its kind in Australia where creativity and innovation are integral components, producing industry-ready graduates with strong technical, creative thinking and data ethics skills.

Graduate Certificate in Transdisciplinary Learning

Course Description

How do we educate people for a rapidly changing, uncertain and complex world? What kind of education futures do we want to make?

The Graduate Certificate in Transdisciplinary Learning is for educators, learning professionals and education leaders who want to think differently about the education and professional learning challenges we face, whether in the education sector (schools, TAFE, universities), industry, public sector or community. By reimagining education as transdisciplinary, the course explores the generative potential of collectives and collaboration across disciplinary boundaries. Participants study transdisciplinary learning as it occurs in real-time, reframe problems and trial problem solving approaches, develop educational prototypes and design inquiry, all in the process of testing the worth of transdisciplinary practices, methods and strategies in operation. With its focus on collective learning, the course engages participants in designing learning opportunities that prepare young people and professionals for dealing creatively, critically and ethically with ambiguous challenges.

Designed with busy professionals in mind, the course provides a range of flexible learning pathways to suit individual needs. Self-paced, fully online small credit-point subjects (also offered as microcredentials) provide participants with mentoring opportunities to probe transdisciplinary learning approaches in the context of their own practice and collegial communities. In the studio subjects, participants contribute to immersive, online collaborative sessions. They work on small-scale challenge projects and generate novel, actionable educational proposals or experiments that can enable individuals, teams, communities and industries to flourish into the future. The lab subject connects participants with live research projects centred on educational or professional learning initiatives and collective action.

Areas of Study

Transdisciplinary learning, educational design, education innovation, transdisciplinary methodologies.

Course Structure

For further details, please refer to the UTS Handbook:
handbook.uts.edu.au/courses/c11335

Career Opportunities

The course is designed for educators, learning professionals and education leaders working in the education sector (schools, TAFE, universities), industry, public sector, community or other settings who are responsible for learning provision or teaching, designing professional learning or leading educational initiatives to address challenges or leverage emerging opportunities.
Admission requirements

Academic requirements

For admission into most postgraduate courses, you are required to hold at minimum a recognised degree equivalent to an Australian bachelor’s degree. Your academic performance at the bachelor’s level will be considered as part of your application assessment.

In some instances, you may also require relevant work experience and/or research experience. If applicable, you may demonstrate this through submission of a CV, portfolio, and/or a personal statement.

For the current academic requirements for a particular course, please refer to the Course Summary Tables on pages 166-208 or visit uts.edu.au/study/international/essential-information/entry-requirements

Note: Eligibility for admission to a research degree is not a guarantee of acceptance. Submission of a research proposal is also required.

English language requirements

UTS has English language proficiency requirements for all its courses. Please check the requirements that apply to you.

WHAT IS AN ASSESSABLE QUALIFICATION?

Assessable qualifications must come from the countries listed. They may be accepted as satisfying English proficiency if they include:

- senior secondary studies comparable with the NSW HSC;
- one full year of Australian or comparable tertiary studies, including RATE Associate Diploma and Advanced Diploma, Associate Degree, Bachelor Degree and postgraduate studies;
- comparable AQF Diploma and Advanced Diploma; or
- Australian or comparable non-award studies and tertiary preparation courses, with a full-time equivalence of one year.

COMPLETED A COURSE TAUGHT IN ENGLISH

If you do not have an assessable qualification from one of the countries listed, but have successfully completed the equivalent of one year (full-time) of a UTS-recognised, government-accredited, public or private post-secondary/secondary course that is taught in English, you may satisfy the UTS English-language requirement.

This course must be equivalent to the level of Australian Year 12 or higher.

You will need to provide an official document from your institution (on the institution letterhead) that certifies that your qualification was instructed in English.

OTHER ACCEPTABLE QUALIFICATIONS AND ENGLISH PROGRAMS

The following are also recognised by UTS as meeting the English-language requirements:

- UTS College Academic English (AE) program at the level of AE5, for admission to UTS courses with English language proficiency requirements of IELTS Academic overall score of 6.5 with 6.0 in writing
- UTS College Academic English Level 6 (AE6) – “Pass” for courses with an English language admission requirement of IELTS 7.0 with 7.0 in writing
- Australian TAFE (NSW) Certificate IV in English for Academic Purposes (EAP)
- high school English mark equal to or greater than 75 per cent from Austria, Denmark, Finland, France, Germany, Sweden, the Netherlands, Norway or Switzerland
- successful completion of International Baccalaureate Diploma Program subjects English A: literature or English A: language and literature, where the Diploma Program was taught in a language other than English
- C2 Proficiency (formerly Cambridge English: Proficiency CPE):
  - for courses requiring an IELTS academic overall score of 8.0 – Overall CCPE score of 200 or above;
  - for courses requiring an IELTS academic overall score of 7.5 – Overall CCPE score of 191-199;
  - for courses requiring an IELTS academic overall score of 7.0 – Overall CCPE score of 185-190;
  - for courses requiring an IELTS academic overall score of 6.5 (6 in writing) – Overall CCPE score of 176-184, with a writing score of 169.
- level 4 or above in the core subject English in the Hong Kong Diploma of Secondary Education (HKDSE) Examination.

ASSESSABLE QUALIFICATION UNDERTAKEN IN ENGLISH

You satisfy the UTS English language requirements if you have an assessable qualification that was undertaken in English from one of the following countries:

- American Samoa
- Australia
- Botswana
- Canada
- Fiji
- Ghana
- Guyana
- Jamaica
- Kenya
- Lesotho
- Liberia
- New Zealand
- Nigeria
- Papua New Guinea
- Republic of Ireland
- Singapore
- Solomon Islands
- South Africa
- Tonga
- Trinidad and Tobago
- United Kingdom (including Northern Ireland)
- United States of America
- Zambia
- Zimbabwe.

Admission requirements

Previous education not conducted in English

If your previous education was not conducted in English, you are required to demonstrate proficiency in English by completing an English language test or program recognised by UTS. English language proficiency test scores are recognised by UTS provided they were obtained less than two years prior to application at UTS.

The table opposite shows the results required to meet UTS English language requirements for entry into the respective courses. For all combined courses the highest English language requirement test scores apply.

ENGLISH LANGUAGE TESTS

Cambridge Certificate in Advanced English (C1A)
cambridgeesol.org

IELTS
utscollege.edu.au/ielts

Pearson Test of English (PTE)
pearsonpte.com

TOEFL
If you sit the TOEFL test, you must arrange for the official score report to be sent directly to UTS. The UTS institutional code for TOEFL is 0743.
ets.org/toefl

UTS College Academic English Program Level 1 (AE5) and Level 6 (AE6)

Special requirements

SPECIAL REQUIREMENTS FOR EVIDENCE OF MEDIUM OF INSTRUCTION FOR GRADUATE SCHOOL OF HEALTH COURSES

Applicants of:
- Master of Pharmacy (C04252)
- Master of Pharmacy (International) (C04395)
- Master of Physiotherapy (C04306)
- Master of Orthoptics (C04299)
- Master of Speech Pathology (C04386)
- Master of Genetic Counselling (C04374)

who have previously studied in English, may only satisfy the English language requirements for these courses if they have successfully completed a tertiary qualification of at least three years that was taught and assessed solely in English from one of the below approved countries:
- Australia
- Canada
- New Zealand
- Republic of Ireland
- South Africa
- United Kingdom (England, Scotland, Wales and Northern Ireland)
- United States of America

In order to provide sufficient evidence to support this, you will need to submit an official document from your institution on the institution letterhead certifying that your tertiary qualification was taught and assessed solely in English.

If you have completed studies in English but do not fulfil the above requirements, you will need to provide evidence of the results for a UTS recognised English language test. Please refer to Previous education not conducted in English section.

It is important to note that for Pharmacy and Physiotherapy courses, Australian Health Practitioner Regulation Agency (AHPRA) may have additional English Language Requirements for registration at the completion of the course.

Master of Clinical Psychology (C04300) applicants who provide evidence that their previous studies were taught in English must demonstrate their English competency in one of the approved pathways listed in the English Language Skills Registration Standard outlined by the Psychology Board of Australia. These requirements are also applied by the Australian Health Practitioner Regulation Agency (AHPRA) for eligibility for Provisional Registration once students are enrolled in the course.

The information in this table is correct as of the publication date and is subject to change. For the most up-to-date information on English requirements visit uts.edu.au/study/international/essential-information/entry-requirements/english-language-requirements
SPECIAL REQUIREMENTS FOR EVIDENCE OF MEDIUM OF INSTRUCTION FOR FACULTY OF ARTS AND SOCIAL SCIENCES COURSES

C04255 Master of Teaching in Secondary Education applicants who have previously studied in English, may only satisfy the English language requirements for this course if they have successfully completed an undergraduate qualification of at least three years taught and assessed solely in English from one of the below countries:
- Australia
- Canada
- New Zealand
- Republic of Ireland
- South Africa
- United Kingdom (England, Scotland, Wales and Northern Ireland)
- United States of America

STUDENTS SPONSORED THROUGH AID PROGRAMS

Special consideration for English language requirements may be given to applicants sponsored through aid programs (e.g. Australia Awards, World Bank, etc.).

In some countries the Australian embassy may have different English language requirements for those seeking a student visa. Check with your nearest Australian Diplomatic Post before registering for an English language test.

UTS also accepts diplomas and advanced diplomas from Australian Qualifications Framework (AQF) recognised tertiary institutions in Australia as well as most other Australian foundation studies programs.

Simplified Student Visa Framework (SSVF)

UTS participates in the Australian Government’s Simplified Student Visa Framework (SSVF) and recruits students into its degree courses under the SSVF arrangements of the Department of Home Affairs. The SSVF is designed to make the process of applying for a student visa simpler for genuine students.

As an international student, you should apply for a single student visa (subclass 500) regardless of your chosen course of study. When you are granted a visa under SSVF, you must continue to maintain enrolment in an eligible course and continue to have sufficient financial capacity to support your study and stay in Australia.

All student visa (subclass 500) holders must maintain enrolment at the same or higher Australian Qualification Framework (AQF) level for which they were granted a visa. If you are undertaking a doctoral degree (AQF10) or transferring to a master degree (AQF9), this condition does not apply. Transferring to a lower AQF level course or transferring from an AQF level course to a non-AQF Award course is a breach of the student visa condition and might result in cancellation of your visa.

You must take this important information into account when choosing a course and when considering a course change or a move to another provider.

For more information about student visas, visit the Department of Home Affairs website: homeaffairs.gov.au

Certification of documentation

UTS will accept copies certified by employees of one of the following:
- Australian Overseas Diplomatic Mission
- UTS Authorised Representative or Agent
- Public Notary Office
- the administration of the institution that issued the relevant document
- an Australian university.

Alternatively, documents verified by someone who is currently employed in Australia as:
- an accountant – members of the Institute of Chartered Accountants in Australia or the Australian Society of Certified Practising Accountants, or the Institute of Public Accountants, or the Association of Taxation and Management Accountants or Registered Tax Agents
- a bank or credit union manager
- a barrister, solicitor or patent attorney
- a police officer with the rank of sergeant and above
- a post office manager
- a principal of an Australian secondary college, high school or primary school
- a commissioner for declarations
- a Justice of the Peace where the registration number is clearly indicated.

WHAT DOES CORRECTLY CERTIFIED MEAN?

Correctly certified means that your original document has been sighted and the copy has been sworn to be a true copy of the original by one of the authorised people mentioned above. Scanned documents or photocopies will not be accepted.

PERSONAL STATEMENT

You may need to submit a personal statement for some courses. The personal statement should be written by you and should:
- describe your educational experience and how it has prepared you for studying this course
- indicate your knowledge and interest in the area in which you plan to study
- outline your expectations of the course for which you are applying
- reflect on any work (paid or voluntary) you have undertaken – you may also wish to include details of your work history
- mention anything else about you that will help us assess your application.

If you need to submit a personal statement, UTS will contact you with details.

PORTFOLIO

The Master of Animation and Visualisation requires a portfolio. A portfolio may also be required when you apply to study certain design courses at UTS.
How to apply

1. Complete the application form

ONLINE:
Login and register to apply online: student.uts.apply.studylink.com

PAPER:
Download an application form: uts.edu.au/study/international/essential-information/applying-study-uts

2. Attach supporting documents

You must attach:
- a certified† copy of your academic records. Documents not issued in English must be officially translated and submitted together with certified copies in the original language.
- a certified† copy of your English test score (or an official document stating that your previous education was conducted in English, see page 160)
- a portfolio or personal statement (where applicable, see page 161)
- a bank draft of A$100 non-refundable application fee or a copy of Tax Invoice (proof of payment) for A$100 non-refundable application fee.

ONLINE: Documents should be scanned and uploaded with your online application.

PAPER: Copy your documents and submit certified† copies with your application form*.

3. Submit your application

ONLINE:
1. Check that you have completed all sections.
2. Agree to the Terms & Conditions.
3. Pay your application fee online.
4. Submit

PAPER:
1. Pay the application fee, by either:
   - attaching a bank draft or bank cheque to your application form, or
   - making a payment via our secure payment site: uts.edu.au/internationaladmissionpayments
   After your payment has been approved, you must print a (PDF) copy of the tax invoice and submit it with your application.
2. Submit your application, in one of several ways:
   - in-person at UTS International*
   - by post to our postal address or by courier/registered post to our street address*
   - to a UTS Representative at an education event.
   - to one of our agents or representatives worldwide.

For contact details visit: international.uts.edu.au

† See Certification of Documentation on page 161
* See back cover for our address
Acknowledgement of application

- ONLINE: You’ll receive immediate acknowledgement by email.
- PAPER: You’ll receive acknowledgement by email approximately one week after it has been received by UTS.

Your acknowledgement email will include a UTS application number. Refer to this in any future correspondence with us. After receiving all of your documents, the application process usually takes four to six weeks. We’ll advise you by email of your application outcome.

Application outcome

- ADDITIONAL INFORMATION: If your documents are insufficient for assessment, you will receive a request for additional information by email.
- CONDITIONAL OFFER LETTER: If your application is approved, but there are conditions you still need to satisfy, you will receive a conditional offer letter by email. Once these conditions have been met, you will receive an unconditional offer by email.
- OFFER LETTER: If you have met all specific requirements you will receive an unconditional offer letter by email.

Accept your offer

You will receive information on how to accept your offer with your Letter of Offer.

UTS reserves the right to withdraw an offer of admission or Confirmation of Enrolment (CoE) in cases where an applicant has not provided true and complete information for admission to a course or where UTS is not satisfied that the student meets the Genuine Temporary Entrant and/or Genuine Student requirements set by the Department of Home Affairs.

Application closing dates

- **Autumn session (February/March start)**
  - Applicants based outside Australia: 30 November
  - Applicants based in Australia: 15 December

- **Spring session (July start)**
  - Applicants based outside Australia: 30 April
  - Applicants based in Australia: 31 May

- **Summer session (November start)**
  - Applicants based outside Australia: 30 August
  - Applicants based in Australia: 30 September
Fees, finance and RPL

Tuition fees

Tuition fees vary between UTS courses and must be paid in advance of each session. Textbooks and other course materials are additional expenses.

The fees for any session are determined by the number of credit points being undertaken in that session. Unless noted, the quoted session tuition fee assumes you will enrol in a standard 100 per cent credit point load for your chosen course, which is normally 24 credit points per session. Your actual session course cost may differ from this figure depending on the course and the number of credit points taken per session.

Fees listed are correct for 2023 only and are subject to an increase each calendar year.

For the most up-to-date information about tuition fees for UTS courses and the UTS Fees and Refund Protocol, visit: uts.edu.au/study/international/essential-information/fees-information

Student services and amenities fee

Australian universities charge a Student Services and Amenities Fee (SSAF) to support the maintenance of a range of student services at universities. At UTS, the SSAF provides support to Students’ Association sponsored activities. This includes the second-hand bookstore, services for skills and language development, the UTS Student Legal Centre, food, beverage and retail outlets, and student clubs run by Activate UTS.

The SSAF is applicable to all students at UTS. You are required to pay it in Autumn and Spring sessions in which you are enrolled. Your liability for the SSAF is based on your enrolled study load as at the census date. Students withdrawing after the census date are not eligible for a refund or remission of this fee.

To give you an estimate of the cost, in 2022 the SSAF was A$157.50 per session for full-time students (those with a study load of 18 credit points and above per session). The SSAF is subject to an annual government set indexation increase.

For further information go to:
us.edu.au/current-students/managing-your-course/fees-and-payment/student-services-and-amenities-fee-ssaf

Health cover

You are required to arrange Overseas Student Health Cover (OSHC) for the entire time that you are in Australia on a student visa. It is also a visa condition, and your responsibility as a student, to purchase and maintain this health cover throughout your stay in Australia. Students from Belgium, Norway and Sweden who have health cover in their home countries may be exempt from OSHC.

OSHC is insurance to assist international students to meet the costs of medical and hospital care that they may need while in Australia. OSHC will also pay limited benefits for pharmaceuticals and ambulance services.

Medibank is the UTS preferred provider for OSHC, but you may purchase OSHC from an authorised provider of your choice. The cost of cover may differ between insurers and the plan you choose. Please note that you will need to submit evidence of your OSHC arrangements when you lodge your visa application with the Department of Home Affairs.

For further information visit:
usbankoshc.com.au/uts
homeaffairs.gov.au

Recognition of prior learning (credit recognition)

Your prior learning may be considered for credit towards a UTS graduate coursework program where the prior learning is related to assessable components of the course. For example, you may be granted:

– exemption from studying a specific subject within your UTS course if you can prove that you have previously studied a subject equivalent to a required UTS subject
– general advanced standing for a specific number of subjects if you can prove your prior studies are relevant to your UTS course, but do not directly correspond to specific subjects in the course and
– automatic credit if the subject and version required for your current course has been completed as part of another UTS course.

Note: Determination of eligibility for recognition of prior learning towards a particular course does not imply or guarantee that a place is available in that course.

APPLYING FOR RECOGNITION OF PRIOR LEARNING

You can apply for recognition of prior learning in your International Student Application form.

The following documents must be attached to your application:

1. certified copy of academic transcript(s)
2. copies of official subject outlines.

For each subject exemption sought, you must provide a subject outline with the following details:

– year the subject outline is relevant to (this must be the same year in which you passed the subject)
– topics covered in the subject
– number of hours of class time
– method of assessment used
– textbooks required.

A paragraph from an institution’s calendar or handbook is not sufficient. Inadequate outlines will not be accepted.

Subject outlines must be in English. If subject outlines have been translated into English, they must be certified and stamped as translated by a professional translator.
## Accommodation and living costs

</tr>
</tbody>
</table>

This table details approximate costs that you may incur while studying at UTS and living in Sydney. It should be used as a guide only.

It’s a requirement of the Australian Government that prospective international students demonstrate they have access to at least A$21,041 a year (as of October 2019) to fund their living costs and additional funds if bringing partners or family. For the latest figures please refer to the Australian Government website: studyinaustralia.gov.au/english/live-in-australia/living-costs

Note: Prices vary depending on the condition of the property, the number of people you share with and the proximity of the accommodation to the centre of Sydney.

* This figure is correct for 2022. It will increase in future years.
** Any amount below this will likely be twin share.
^ Transport costs will vary depending on how close you live to campus.

A UTS recognised bachelor’s degree or an equivalent or higher qualification. Previous qualifications must be in the field of society and culture (e.g. Bachelor of Arts) or creative arts.

For applicants with a bachelor’s, master’s, graduate diploma or graduate certificate qualification:
- the degree must be in the field of society and culture (e.g. Bachelor of Arts) or creative arts
- if the degree is not in the field of society and culture or creative arts, applicants must provide a curriculum vitae (CV), which should include details of paid and voluntary work or other experiences (e.g. special interest groups) that could be relevant to the course, and provide a personal statement that outlines their interest in the course and demonstrates an understanding of the opportunities present in the emerging media industries. Employment experience is assessed according to the response provided by applicants via the employment question on their UTS application.

Applicants who have not completed a bachelor’s, master’s, graduate diploma or graduate certificate qualification in any field of study (or overseas equivalent) must:
- have a minimum of four years’ related professional work experience
- provide a personal statement that outlines their interest in the course and demonstrates an understanding of the opportunities present in the emerging media industries, and
- provide a curriculum vitae (CV), which should include details of paid and voluntary work or other experiences (e.g. special interest groups) that could be relevant to the course.

Note: Fees listed are correct for 2023 only and are subject to an increase each calendar year. The published fee is based on 24 credit points per session, unless otherwise noted. Please see UTS website for fee details. To find the latest information about your course, please search here: uts.edu.au/study

A UTS recognised bachelor’s degree, or an equivalent. Applicants must have a UTS Bachelor of Design in Architecture or equivalent, or a UTS Bachelor of Design (Honours) in Architecture (Architectural Studies for Interior Architecture pathway), or a UTS Bachelor of Design (Honours) in Architecture (Architectural Studies for Landscape Architects pathway).

Applicants with a completed UTS Bachelor of Design in Architecture, or a UTS Bachelor of Design (Honours) in Architecture (Architectural Studies for Interior Architecture pathway), or a UTS Bachelor of Design (Honours) in Architecture (Architectural Studies for Landscape Architects pathway) must have attained an overall GPA of 5.50.

All other applicants with a completed equivalent degree must have attained an overall GPA of 5 or above and must provide:
- a digital portfolio (min 3 to max 5 examples of design projects) in PDF format consisting of their architectural projects from previous studies (university level), professional or creative work. Portfolio should emphasize prior individual academic work over related professional work, AND
- a two-page CV in PDF format that clearly articulates their design or related experience
- employer’s letter confirming the dates of employment, and the position held, AND
- a personal statement of 300 words (maximum) in PDF format addressing their reasons to undertake the Master of Architecture.

Note: Fees listed are correct for 2023 only and are subject to an increase each calendar year. The published fee is based on 24 credit points per session, unless otherwise noted. Please see UTS website for fee details. To find the latest information about your course, please search here: uts.edu.au/study

A UTS recognised bachelor’s degree, or an equivalent or higher qualification in a cognate field (Landscape Architecture), or UTS Bachelor of Landscape Architecture or UTS Bachelor of Design (Honours) in Architecture (Landscape Studies for Architects pathway), or UTS Bachelor of Landscape Architecture (Honours) or equivalent, or UTS Graduate Diploma in Landscape Architecture.

Applicants with a completed UTS Bachelor of Landscape Architecture or UTS Bachelor of Landscape Architecture (Honours) or UTS Bachelor of Design (Honours) in Architecture (Landscape Studies for Architects pathway) must have attained a minimum GPA of 5.00.

Applicants with a UTS Bachelor of Landscape Architecture or UTS Bachelor of Landscape Architecture (Honours) or equivalent OR UTS Bachelor of Design (Honours) in Architecture (Landscape Studies for Architects pathway) OR non-UTS applicants in a relevant cognate field must have attained a minimum GPA of 4.50 and must provide:

- a digital portfolio (min. 3 to max. 5 examples of design projects) in PDF format consisting of the applicant's landscape architectural projects.
- a personal statement of 300 words (maximum) in PDF format addressing reasons for wanting to undertake the Master of Landscape Architecture.

Applicants are required to undertake an interview with the course director to discuss the portfolio.

A UTS recognised bachelor’s degree, or an equivalent or higher qualification, or a UTS Graduate Diploma in Local Government, or a UTS Graduate Certificate in Local Government.

Applications based on a UTS recognised Bachelor’s degree or equivalent, or higher qualification must provide:

- personal statement (max. 300 words) addressing their reasons for wanting to undertake the Master of Local Government AND
- CV clearly articulating local government sector related work with a minimum experience of 5 years.

Applicants who do not satisfy the academic requirements may be considered on the ability to demonstrate equivalency through a minimum of 5 years’ relevant work experience and must provide:

- a CV clearly articulating relevant experience AND
- a personal statement (max. 300 words) explaining the reasons for wanting to study the Master of Local Government. If applicable, details should be provided about general or professional qualifications that demonstrate potential to pursue graduate studies.

**Note:** Fees listed are correct for 2023 only and are subject to an increase each calendar year. The published fee is based on 24 credit points per session, unless otherwise noted. | C04252      | 074915M     | Pharmacy    | 4**                | $23,345                  | Feb 111 | | A UTS recognised bachelor’s degree, or an equivalent or higher qualification and successful completion of the following prerequisite subjects at tertiary level within the 10 years prior to application:  
- one pharmacology subject  
- two chemistry subjects  
- one biochemistry subject  
- one human physiology subject, and  
- one mathematics or statistics subject.  
You are required to provide relevant subject outlines to support your application. Entry is competitive and assessment is based on grade point average (GPA).  
Applicants who have already completed a pharmacy degree overseas are also required to submit a personal statement to articulate their motivations for wanting to repeat a pharmacy qualification.  
Selected applicants are required to undertake a short interview with a panel. Applicants are assessed in the areas of communication skills, interpersonal skills, interest in pharmacy, and commitment to pharmacy as a career. This will be conducted by video call if the student is unable to attend campus. |

---

** This course is an intensive two-year degree. It includes 4 standard sessions, 1 short teaching session and 1 non-standard teaching session. In addition to coursework during sessions, students are required to undertake weekly clinical placements during session and block clinical placements during mid-session breaks. This course has a non-standard credit point loading.

^ This course is offered by distance only. You cannot obtain a student visa to study this program in Australia.

### Genetic Counselling

- **Course Code:** C04374
- **CRICOS Code:** 098052M
- **Course Name:** Genetic Counselling
- **Course Duration:** 4 Session(s)
- **Course Fee:** $27,885 (A$/Session)
- **Course Intake:** Feb 110
- **Minimum Entry Requirements:**
  - A UTS recognised bachelor’s degree, or an equivalent or higher qualification.
  - Applicants must have completed either:
    - an undergraduate degree in a cognate discipline such as science, biomedical science, health science, social work, psychology, medicine, or related discipline, or
    - an undergraduate degree in any discipline and documented relevant work experience including clear evidence of career development, professional writing, and professional achievement or practice comparable to that expected of undergraduate degree holders in cognate disciplines.
  - In addition to a completed bachelor’s degree, applicants must have also completed the following subjects at a tertiary level within the last 10 years:
    - one human genetics subject (to second- or third-year undergraduate level, or equivalent).
  - Applicants must also provide the following:
    - relevant subject outlines and the Prerequisite Assessment Table
    - at least two, and no more than three written references as evidence of relevant voluntary/paid work experience in a caring role via UTS Referee Report System. Referees may include: teacher/lecturer/academic, employer/supervisor of paid work, supervisor of peer counselling/volunteer work/placement. Referees should include a statement regarding how long they have known the applicant and the capacity in which they know the applicant. Referees are asked to comment on the applicant’s character, ability, and suitability to be a genetic counsellor. The references should be submitted as a PDF and, where possible, include the signature of the referee.
    - a personal statement of up to 1000 words. The personal statement should describe the skills and qualities applicants bring to a career in genetic counselling and explain how they meet the selection criteria. Applicants should also include a statement confirming that this is their own work.
  - Selected applicants are required to undertake a short interview with a panel and final offers are dependent upon interview rank. Applicants are assessed in the areas of communication skills, interpersonal skills, interest in genetic counselling, and commitment to genetic counselling as a career. This will be conducted by Skype if the student is unable to attend campus.

To make it easy for you to use this course guide, we’ve defined some of our key terms below. If you need more information, visit our website international.uts.edu.au or contact us at international@uts.edu.au

**Academic adviser:** a member of academic staff in a specific faculty who advises students to ensure they satisfy academic progression requirements.

**Admission:** the process of applying for a course or program at UTS, then being made an offer of admission, accepting that offer, and being admitted to study at UTS.

**Advanced standing:** see Credit recognition.

**Assumed knowledge:** additional prior knowledge specified by some courses as part of the entry requirements. This prior knowledge is often gained in specific subjects (such as physics or chemistry), or it may have been obtained elsewhere. If you do not have the required assumed knowledge, you may still be accepted, but a bridging course may be required.

**Campus:** the university grounds including the buildings.

**Combined degree:** the opportunity to study two programs from different academic areas at the same time and graduate with two degrees.

**Course:** an award course, non-award study or any part of a program of study offered by UTS, e.g. Master of Business.

**Credit point:** the unit of measure of workload for individual subjects (allocated based on the amount of work required in that subject). Credit points are gained by students enrolled in award courses when subjects are passed. When accumulated, credit points form one measure of the total requirements of a course. Most subjects at UTS are 6 or 8 credit points each.

**Credit recognition:** (also known as ‘advanced standing’, ‘recognition of prior learning’ and in some cases referred to as ‘exemption’ or ‘credit’) is the granting of credit to students for their previous learning for credit towards a course. For more information, please go to page 164.

**CRICOS code:** CRICOS stands for Commonwealth Register of Institutions and Courses for Overseas Students. The CRICOS code is an official code given to a course and institution to confirm that it is registered to be offered to international students.

**Distance mode:** a teaching method that does not require students to attend classes on campus. Instead, distance mode students access their subject materials online. International students undertaking distance mode courses cannot obtain a student visa to study the course in Australia.

**Electives:** some courses allow you to choose elective subjects outside your core study area as part of your course. Not all electives are available each session. Due to timetabling, you may not always get your first choice electives.

**English language requirements:** To be eligible for admission into a course, you must demonstrate proficiency in written and spoken English if your previous education was not conducted in English. Please see page 160 for specific English language requirements for each course. These are subject to change.

**Fees:** are charged per credit point. The cost of each credit point will depend on the course you are studying (see uts.edu.au/study/ international/essential-information/fees-information for the most up-to-date information on fees). The fees in this course guide have been calculated based on a 24 credit point session in 2023, unless otherwise stated.

**Lectures:** classes that are taught in large groups, usually conducted in lecture halls. The lecturer will provide students with course material, which is often later discussed and debated in smaller tutorial groups.

**Major:** an area you choose to specialise in during your studies. Your course will be structured around a sequence of subjects that form this major. Students can choose other unrelated subjects to undertake in conjunction with major subjects, but cannot graduate unless the criteria of their chosen major is met.

**Pre-requisite:** one or more units of subject/s, specified by the faculty board that a student must already have completed before being eligible to enrol in a particular unit or course.

**Recognition of prior learning (RPL):** see Credit recognition.

**Sessions:** the blocks of time during which classes run on campus. At UTS, an academic year has three sessions: Autumn, Spring and Summer. For academic calendar dates, see page 211.

**Sub-major:** a group of subjects which, alongside the major, will form the structure of your course. The sub-major works the same way as your major in that there will be a specific number of required credit points that need to be met.

**Subjects:** units that cover different areas within your chosen course. They are a combination of core subjects (these are compulsory) and electives.

**Subject outline:** an official document that represents the statement of subject requirements that is authoritative for both the university and the students undertaking the subject. It includes details of the minimum essential requirements necessary to pass the subject, material and equipment that may be taken into an examination and may prescribe attendance and/or participation requirements. All students should receive a subject outline for every subject in the first week of class.

**Transnational:** delivery of Australian (or UTS) courses and qualifications overseas, allowing students to study Australian qualifications in their home country or region. Also known as offshore courses.

**Tutorials:** small classes of students that provide a more personal, interactive teaching space for students and tutors to discuss and debate topics related to the subject. Students can also ask any questions they may have about the course material.
2023 Academic calendar

The UTS academic calendar includes three teaching periods: Autumn, Spring and Summer. Our courses are scheduled to ensure students can progress through the standard Autumn and Spring teaching periods. Some courses may offer a Summer session intake; please visit uts.edu.au/study/international/discover-uts/summer-session for more information about Summer session intake dates.

For more information about our intake dates, visit handbook.uts.edu.au/dates_academic_2023
